Broadband Speed Martin Laurence,2015-09-14 Have you ever had frustratingly slow Broadband? Did you know that your very house; the architecture, how far away you are from your Router or even your phone line could be causing the slowdowns? I explain the various methods, simplistic, yet innovative ways to get the maximum from your Internet connection that anyone can do. 7 Reasons you can become the MacGyver of your home Broadband with the tips and tricks provided in this book: 1) Introduction to Broadband Speed Problems 2) How to Know if your Phone Line is Working Correctly 3) Learn the difference between Hard-Wiring and Wi-Fi 4) List of Equipment and Tools - many of which you'll have to do the job 5) Guide of How to Move your Router in your House 6) Guide of How to cable direct from your Router to your computer 7) All connections and Testing We spend a huge amount of our time on the internet both work and socially and when it goes wrong it can cause chaos. But this doesn't mean you can't solve the problems yourself. From moving your Router to cabling a hard-wired link, your entire online life will change once you learn these hacks. As a Data and Telecommunications Engineer for over 15 years I've encountered almost every type of problem many people are struggling with their broadband. One of the biggest speed restrictions is Wi-Fi. Did you know Wi-Fi is an incredibly ineffective way of using the Internet? In most cases it's the house that is the problem; thick walls, perhaps there's metal inside the construction, multiple floors, and/or you may simply may be out of range. This is common if your Router is at the front of the house and you're trying to use a computer at the rear of the house. The signal can't reach that far. So I explain the various solutions which are to move your Router or Hard-Wire a cable from the Router direct to your computer. I go into what equipment you will need to cable to the data socket, the actual data cabling - looking for the best cable route, what to avoid, and neatness. I go into connecting your new socket and finally testing. The simple aim of this book is to give someone a simple ''How to'' to max out your broadband speed. Chapters Cover: 1. Introduction to Broadband Problems 2. Line Quality 3. Checking Your Optimal Speed 4. Hard-Wiring Vs Wi-Fi 5. Using Only Wi-Fi and Maximising it 6. Equipment Needed to Move Hard-Wire a Data link 7. Equipment Needed to Move the Router 8. Preparation 9. Cabling from the Router - Data Sockets 10. Moving the Router - A New Socket 11. Connecting a Data Cable 12. Connecting a Line Socket 13. Testing the Hard-Wired Socket 14. Testing the Router 15. Faster and Finished! So number 1 before we even get into the rest of the book - let's check our Broadband speed right now. With everything as it is, what ever you're using - W-Fi or Hard-Wiring. You can go onto websites like 'Speed Checker' and it will tell you your maximum 'Upload' and 'Download' speed. This is a barometer for us to know where we stand right now and gives us a guide as to how much we can improve. Write both numbers down. Okay done that? We now have our current speed - now let's improve it! Download your copy of 'How To Maximize Router Speed' to learn these innovative ideas, tips, and tricks of getting the maximum speed from your Broadband. Spending thousands on engineers to come out isn't necessary when you can follow these secrets. Scroll up and grab a copy.

Broadband Robert W. Crandall,James H. Alleman,2004-05-13 There is widespread concern in the telecommunications industry that public policy may be impeding the continued development of the Internet into a high-speed communications network. In the absence of ubiquitous, high-speed ¡°broadband¡± Internet connections for residential and small-business customers, the demand for IT equipment and new Internet service applications may stagnate. Broadband policy is controversial in large part because of the differences in the regulatory regimes faced by different types of carriers. Cable television companies face neither retail price regulation of their cable modem services nor any requirements to make their facilities available to competitors. Local telephone companies, on the other hand, face both retail price regulation for their DSL service and a requirement imposed by the 1996 Telecommunications Act that they ¡°unbundle¡± their network facilities and lease them to rivals. Finally, new entrants are largely unregulated, but many rely on facilities leased from the incumbent telephone companies at regulated rates to connect to their customers. This asymmetric regulation is the focus of this volume, in which telecommunications scholars address the public policy issues that have arisen over the deployment of new high-speed telecommunications services. Robert W. Crandall is a senior fellow in the Economic Studies program at the Brookings Institution. His previous books include (with Martin Cave) Telecommunications Liberalization on Two Sides of the Atlantic (2001) and (with Leonard Waverman) Who Pays for Universal Service? (Brookings 2000). James H. Alleman is an associate professor in interdisciplinary telecommunications at the College of Engineering and Applied Science, University of Colorado, on leave at Columbia University.

Internet-Speed Development A Clear and Concise Reference Gerardus Blokdyk,

High-Speed Internet Access on Tribal Lands Alice Chambers,2016 High-speed Internet service is viewed as a critical component of the nations infrastructure and an economic driver, particularly to remote tribal communities. However, in 2015, the Federal Communications Commissions (FCC) reported that the lack of service in tribal areas presents impediments. This book examines perspectives of tribes and providers on high-speed Internet access and barriers to increasing this access; the level of interrelation and coordination between federal programs that promote high-speed Internet access on tribal lands; and existing data and performance measures related to high-speed Internet on tribal lands.

Hardware Based Packet Classification for High Speed Internet Routers Chad R. Meiners,Alex X. Liu,Eric Torng,2010-06-04 Hardware Based Packet Classification for High Speed Internet Routers presents the most recent developments in hardware based packet classification algorithms and architectures. This book describes five methods which reduce the space that classifiers occupy within TCAMs; TCAM Razor, All-Match Redundancy Removal, Bit Weaving, Sequential Decomposition, and Topological Transformations. These methods demonstrate that in most cases a substantial reduction of space is achieved. Case studies and examples are provided throughout this book. About this book: • Presents the only book in the market that exclusively covers hardware based packet classification algorithms and architectures. • Describes five methods which reduce the space that classifiers occupy within TCAMs: TCAM Razor, All-Match Redundancy Removal, Bit Weaving, Sequential Decomposition, and Topological Transformations. • Provides case studies and examples throughout. Hardware Based Packet Classification for High Speed Internet Routers is designed for professionals and researchers who work within the related field of router design. Advanced-level students concentrating on computer science and electrical engineering will also find this book valuable as a text or reference book.

Broadband At the Speed of Light: How Three Communities Built Next-Generation Networks Christopher Mitchell,2012-04-09 Frustrated by ever-increasing prices for telecommunication services and the reluctance of incumbent providers to upgrade their networks to meet 21st century needs, more than 150 communities have built their own citywide cable and FTTH networks. Against great odds and in the face of ferocious opposition by the existing telephone and cable companies in the courts, at the legislature, and in the marketplace, the vast majority have succeeded.To understand how this has occurred and to extract lessons that might be useful for cities deciding whether to build their own networks, we undertook an in-depth examination of three municipally owned networks in Bristol Va., Chattanooga, Tenn., and Lafayette, La. Each of these communities already had access to the Internet via DSL and cable. But in the words of Lafayette City-Parish President Joey Durel, They wanted more. Without investment in next-generation networks, these cities feared they would be left behind in the transition to the digital economy of the Internet era.
