*Harmful Content on the Internet and in Video Games* Great Britain. Parliament. House of Commons. Culture, Media, and Sport Committee,2008-07-31 The Internet has become an indispensable tool for communications, research and commerce. But this report addresses the growing public concern at the Internet's dark side: the easy availability of hardcore pornography, which people may find offensive, the uploading by ordinary people of film of real fights, bullying or alleged rape, or the setting up of websites encouraging others to follow extreme diets, or self-harm, or even commit suicide. In particular, there is increasing anxiety among parents about the use of social networking sites and chatrooms for grooming and sexual predation. The Committee welcomes the Government-commissioned report by Dr Tanya Byron on the risks posed by the Internet to children, and agrees that a UK Council for Child Internet Safety should be established. Sites which host user-generated content-typically photos and videos uploaded by members of the public-have taken some steps to set minimum standards for that content. The Committee recommends that proactive review of content should be standard practice for such sites, and calls for provision of high profile facilities for reporting abuse or unwelcome behaviour directly to law enforcement and support organisations. There is a distinct issue about labelling of video games to indicate the nature of their content. Two systems currently exist side by side: the industry awards its own ratings, and the British Board of Film Classification awards classifications to a small number of games which feature content unsuitable for children. The dual system is confusing, and BBFC should have responsibility for rating games with content appropriate for adults or teenagers.

**Asian Video Cultures** Joshua Neves,Bhaskar Sarkar,2017-11-16 The contributors to this volume theorize Asian video cultures in the context of social movements, market economies, and local popular cultures to complicate notions of the Asian experience of global media. Whether discussing video platforms in Japan and Indonesia, K-pop reception videos, amateur music videos circulated via microSD cards in India, or the censorship of Bollywood films in Nigeria, the essays trace the myriad ways Asian video reshapes media politics and aesthetic practices. While many influential commentators overlook, denounce, and trivialize Asian video, the contributors here show how it belongs to the shifting core of contemporary global media, thereby moving conversations about Asian media beyond static East-West imaginaries, residual Cold War mentalities, triumphalist declarations about resurgent Asias, and budding jingoisms. In so doing, they write Asia's vibrant media practices into the mainstream of global media and cultural theories while challenging and complicating hegemonic ideas about the global as well as digital media. Contributors. Conerly Casey, Jenny Chio, Michelle Cho, Kay Dickinson, Bishnupriya Ghosh, Feng-Mei Heberer, Tzu-hui Celina Hung, Rahul Mukherjee, Joshua Neves, Bhaskar Sarkar, Nishant Shah, Abhigyan Singh, SV Srinivas, Marc Steinberg, Chia-chi Wu, Patricia Zimmerman

Transformation processes in Egypt after 2011 Radoslaw Fiedler,Przemyslaw Osiewicz,2015-08-17 The main advantage of this monograph is that it attempts to conduct the most up-to-date analysis possible of the present political situation in Egypt and the Middle East. Therefore we receive a monograph which allows us not only to look at the Arab Spring from a historical perspective, but primarily to reflect on the consequences of these past events that it was hoped would spark political reforms in Arab states and facilitate greater public participation in the system of governance. Thus, this publication allows the verification of many of the judgments and opinions expressed during the Arab Spring, on the possible direction of development of the political processes initiated by the massive social revolts in Arab countries.

**The Post-9/11 Video Game** Marc A. Ouellette,Jason C. Thompson,2017-03-17 This critical study of video games since 9/11 shows how a distinct genre emerged following the terrorist attacks and their aftermath. Comparisons of pre and post-9/11 titles of popular game franchises--Call of Duty, Battlefield, Medal of Honor, Grand Theft Auto and Syphon Filter--reveal reshaped notions of identity, urban and suburban spaces and the citizen's role as both a producer and consumer of culture: New York represents America; the mall embodies American values; zombies symbolize foreign invasion. By revisiting a national trauma, these games offer a therapeutic solution to the geopolitical upheaval of 9/11 and, along with film and television, help redefine American identity and masculinity in a time of conflict.

**The Last Lecture** Randy Pausch,2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

**Sage on the Screen** Bill Ferster,2016-11-15 A critical look at the success of film, video, television, and the Internet in education. Since the days of Thomas Edison, technology has held the promise of lowering the cost of education. The fantasy of leveraging a fixed production cost to reach an unlimited number of consumers is an enticing economic proposition, one that has been repeatedly attempted with each new media format, from radio and television to MOOCs, where star academics make online video lectures available to millions of students at little cost. In Sage on the Screen, Bill Ferster explores the historical, theoretical, and practical perspectives of using broadcast media to teach by examining a century of efforts to use it at home and in the classroom. Along the way, he shares stories from teachers, administrators, entrepreneurs, and innovators who promoted the use of cutting-edge technology—while critically evaluating their motives for doing so. Taking a close look at the origins of various media forms, their interrelatedness, and their impact on education thus far, Ferster asks why broadcast media has been so much more successful at entertaining people than it has been at educating them. Accessibly written and full of explanatory art, Sage on the Screen offers fresh insight into the current and future uses of instructional technology, from K12 through non-institutionally-based learning.
