China's International Investment Strategy Julien Chaisse, 2019-02-21 Since China adopted its 'open door' policy in 1978, which altered its development strategy from self-sufficiency to active participation in the world market, its goal has remained unchanged: to assist the readjustment of China's economy, to coordinate its modernization programs, and to improve its quality of life. With the 1997 launch of the 'Going Global' policy, an outward focus regarding foreign investment was added, to circumvent trade barriers and improve the competitiveness of Chinese firms. In order to accommodate inward and outward investment, China's participation in the international investment regime has underpinned its efforts to join multilateral investment-related legal instruments and conclude international investment agreements. This collection, compiled by award-winning scholar Professor Julien Chaisse, explores the three distinct tracks of China's investment policy and strategy: bilateral agreements including those with the US and the EU; regional agreements including the Free Trade Area of the Asia Pacific; and global initiatives, spear-headed by China's presidency of the G20 and its 'Belt and Road initiative'. The book's overarching topic is whether these three tracks compete with each other, or whether they complement one another - a question of profound importance for the country's political and economic future and world investment governance.

China-India Relations Kanti Bajpai, Jing Huang, Kishore Mahbubani, 2015-12-14 The question of whether China and India can cooperate is at the core of global geopolitics. As the two countries grow their economies, the potential for conflict is no longer simply a geopolitical one based on relative power, influence and traditional quarrels over land boundaries. This book assesses the varying interests of China and India in economics, environment, energy, and water and addresses the possibility of cooperation in these domains. Containing analyses by leading authorities on China and India, it analyses the nature of existing and emerging conflict, describes the extent of cooperation, and suggests possibilities for collaboration in the future. While it is often suggested that conflict between the giants of Asia is the norm, there are a number of opportunities for cooperation in trade, international and regional financial institutions, renewable energy development and climate change, and shared rivers. This book will be of interest to researchers in the fields of Asian Studies, International Relations, and Asian Politics.

India and China Rajiv Narayanan, Prof Qiu Yonghui, 2020-06-18 By the early 21st century with the rise of China economies of East Asia and India, the prognosis of a strong Asia showed promise. The Indo - Pacific Region (essentially Western Pacific and the Indian Ocean) deservedly came to be recognised as the new 'Centre of Gravity' in the evolving world economic order. Asian states have exhibited leadership in a range of significant areas, such as economics, diplomacy, military power, science & technology, innovation, and soft power thus adding traction to the notion of 'Asia Century' of shared prosperity and common destiny. Under this overarching geo-strategic environment, it is imperative that the two most populous and growing economic powers, India and China, move towards achieving consensus, co-operation and strategic trust rather than compete and contest. However, since the tumultuous border war of 1962, there exists a deep distrust of each other's motives across the Himalayan barriers. To achieve this India and China ought to share their perspectives on the key drivers of divergences and work towards mitigating the same to build strategic trust. This book seeks to assess the causes of strategic mistrust in Sino - India relations and recommend measures for building trust and improving bilateral relations. Towards that end, the ten divergences have been taken as individual chapters, with both Indian and Chinese scholars providing respective perspectives.

Governance and Regionalism in Asia Nicholas Thomas, 2009-01-13 In the decade since the Asian financial crisis the ten states of Southeast Asia that form ASEAN, together with China, Japan and South Korea have formed the basis of a community intended to support the well-being of its member states, markets and peoples. This highly successful regionalisation was not anticipated by the region's leaders, however, and as a result, policy makers are increasingly talking about 'meeting fatigue' and the need to find a better way to govern regional affairs. Among the reforms being considered is a shift towards a more rules-based culture as well as the more explicit incorporation of both private sector and civil society organisations into the policy processes. In short, ASEAN+3 is seeking to develop new norms and processes for its networks and institutions. This book explores the pressures currently influencing East Asian regionalist policy debates, analysing the trend towards deeper integration and the emergence of a governance model for managing regional processes. Combining state and subnational perspectives in conjunction with an examination of the role of the business community and civil society organisations, this book highlights the policy challenges confronting regionalism and governance in East Asia, including key issues such as the rule of law, financial cooperation and a case study on disaster management.

Introduction to International Migration Jeannette Money, Sarah P. Lockhart, 2021-05-30 Introduction to International Migration introduces students to state-of-the-art knowledge on international migration, a contemporary issue of central importance to virtually all countries around the globe. Original chapters by prominent women migration scholars cover a complex and multifaceted issue area including various types of migration, the mechanisms of migration governance, the impact of migration on both host and home societies, the migrants themselves in a transnational space, and the nexus between migration and other aspects of globalization. Key topics include labor, gender, citizenship, public opinion, development, security, climate, and ethics. Refugee flows are tracked from beginning to end. Photos, figures, text boxes with real-world examples, discussion questions, and recommended readings provide pedagogical structure for each chapter. Intended as a core text for courses on migration and immigration and a supplement to more general courses in global studies, this book is appropriate for both undergraduate and graduate students in the variety of disciplines that deal with the challenges of international migration. Special Features Consistently structured original chapters by notable scholars include an Introduction, Empirical Overview, Theoretical Evolution, Continuing Issues, and Summary for every chapter. Chapter pedagogy includes Discussion Questions, Suggested Readings, and References as well as a Data Appendix for the book. Photos with thematic captions and Text Boxes on hot topics round out the visual and substantive appeal of the text.

Asian Security and the Rise of China David Martin Jones, Michael Lawrence Rowan Smith, Nicholas Khoo, 2013-01-01 Khoo, Jones, and Smith have pulled off a remarkable balancing act, crafting a well-grounded and multifaceted survey of China's rise in the context of Asian security. In a field which is often marked more by scholarly effervescence than substance, the authors provide a refreshingly detailed portrait of the last two decades, and fair-mindedly point out evidence which might support both extremes of the debates they challenge with their own 'third way'. Frank Scott Douglas, US Naval War College, US Congratulations to the authors for a clearly argued and comprehensive treatment of China's post Cold War rise and what it means for existing and future dynamics of the Asia-Pacific region. Effectively employing realist theory in a fair-minded treatment of regional developments, the volume shows how and why power realities are more important than non-material factors in determining the region's trajectory and thereby demonstrates that China's ascendance in Asia remains complicated and conflicted. Robert Sutter, George Washington University, US East Asia is without question a region of huge economic, political and security significance. Asian Security and the Rise of China offers a comprehensive overview and assessment of the international politics of the Asia-Pacific since the end of the Cold War, seeking to address the overarching question of how we can most convincingly explain the central dynamics of Asia's international relations. Via a realist perspective on the dynamics and frictions associated with accommodating the rise of powerful states, this timely book addresses the core issue in contemporary Asian politics: the rise of China. The contributors expertly evaluate China's rise and the impact it has had on the dynamics of regional relations in North East and South East Asia. It demonstrates that China's economic development and its regional and international ambition increasingly conflict with the existing consensus-based regional arrangements like the ASEAN Regional Forum and the East Asian Summit mechanism. As a consequence, smaller states in the region increasingly resort to hedging and balancing strategies in an attempt to mitigate Chinese hegemony. This leaves the region in the grip of a complex and potentially destabilizing security dilemma. The book offers a compelling analysis of the problem that China presents for its region that will enlighten undergraduate students of regional political studies and international relations. Postgraduate and Master's students on courses addressing East and South East Asia will also find plenty of information in this invaluable book.
