**Challenges and Choices for Patient, Carer and Professional at the End of Life** Catherine Proot,Michael Yorke,2021-03-18 Living with Uncertainty gives a broad perspective on the complexities and challenges of the practice of end-of-life care, as well as the perceived benefits and limitations of medical intervention. Drawn from research and clinical and pastoral experience, the book examines the feelings associated with the end of life, highlighting the demands that people are faced with and their consequences. It moves into the difficult area of people who feel defeated by their illness and can or want to live no longer, as well as the family, caregivers and professionals who surround them. These perspectives have been built upon around a hundred narratives of lived experience, combined with the wider clinical and practical range of voices. A topical post-script Lessons from Covid-19 captures the choices and challenges on a personal, professional and systemic level which the pandemic acutely revealed with a multiplicity of examples. This will be essential reading for students and professionals in palliative and end-of-life care. Families and friends will also benefit from this book as they try to come to terms with the delicate but universal issues of death and dying.

Teaching at Twilight Ahmed Afzaal,2023-09-15 This book delivers an unsettling but urgent message to all educators . . . Today, humanity finds itself on the cusp of a long period of inexorable decline and disruption, the likes of which no previous generation has experienced. Large-scale behavioral changes are imperative, not necessarily to save the planet but to reduce unnecessary pain and suffering. Yet, the vast majority of educators are still functioning in the normal mode, teaching the same subjects and skills, year after year, even as the nature of the challenges our students will face is undergoing dramatic changes. This mismatch is causing a moral and spiritual crisis that is threatening to make our lives and our work meaningless. Teaching at Twilight invites all educators to take an unflinching look at the rapidly deteriorating state of the earth's life-support system, become aware of its implications for human civilization, and rethink their responsibility in light of that awareness. The book attempts to answer, from an educator's viewpoint, the practical but challenging question that Roy Scranton posed a few years ago: We Are Doomed. Now What?

Interdisciplinary Approaches to Twilight Mariah Larsson,Ann Steiner,2011-01-01 The Twilight novels by Stephenie Meyer have developed from a book series into a powerful phenomenon with an astonishing impact. Not only have the books been adapted for the screen, but they have also spawned a huge number of works by fans, readers, reviewers, and scholars. The multi-faceted Interdisciplinary Approaches to Twilight brings together scholars from a variety of disciplines in order to address the key themes in the complex global phenomenon that is Twilight; a phenomenon that transcends the boundaries between continents, generations, and producers and consumers, and not least between different genres and media. The authors present in-depth literary and film analyses, and shed new light on perspectives on gender, fandom, vampire fiction and the economics of the book market. The book fills a void in Twilight research, and, linked by their cutting-edge research and unique theoretical and analytical perspectives, the authors compellingly map a massive global experience that speaks to the realities of contemporary culture.

**In Twilight and in Dawn** Barnett Richling,2012-10-01 When New Zealand-born and Oxford-educated anthropologist Diamond Jenness set aside hopes of building a career in the South Pacific to join Vilhjalmur Stefansson's Canadian Arctic Expedition, he had little idea of what lay ahead. But Jenness thrived under the duress of that transformational experience: the groundbreaking ethnographic work he accomplished, recounted in People of the Twilight and in Dawn in Arctic Alaska, proved to be a lasting contribution to twentieth-century anthropology, and the foundation of a career he would devote to researching Canada's first peoples. Barnett Richling draws upon a wealth of documentary sources to shed light on Jenness's tenure with the Anthropological Division of the National Museum of Canada - a forerunner of the Canadian Museum of Civilization - during which his investigations took him beyond the Arctic to seven First Nations communities from Georgian Bay to British Columbia's interior. Jenness was renowned as a pre-eminent scholar of Inuit culture, but he also stood out for the contributions his field work made to linguistics, ethnology, material culture, and Northern archaeology. His story is also an institutional one: Jenness worked as a public servant at a time when the federal government spearheaded anthropological research, although his abiding commitment to the first peoples of his adopted homeland placed him at odds with Ottawa's approach to aboriginal affairs. In Twilight and in Dawn is an exploration of one man's life in anthropology,

and of the conditions - at the museum, on the reserves, in society's mainstream, and in the world at large - that inspired and shaped Jenness's contributions to science, to his profession, and to public life. An informative study of the evolution of a discipline focused through the life of one of its leading practitioners, In Twilight and in Dawn is an illuminating look at anthropological thought and practice in Canada during the first half of the twentieth century.

**The Twilight of the Gothic?** Joseph Crawford,2014-05-15 This book explores the history of the paranormal romance genre; from its origins in the revisionist horror fiction of the 1970s, via its emergence as a minor sub-genre of romantic fiction in the early 1990s, to its contemporary expansion in recent years into an often-controversial genre of mainstream fiction. Tracing the genre from its roots in older Gothic fiction written by and for women, it explores the interconnected histories of Gothic and romantic fiction, from Ann Radcliffe and Jane Austen in the eighteenth century to Buffy, Twilight, True Blood and The Vampire Diaries in the present day. In doing so, it investigates the extent to which the post-Twilight paranormal romance really does represent a break from older traditions of Gothic fiction – and just what it is about the genre that has made it so extraordinarily divisive, captivating millions of readers whilst simultaneously infuriating and repelling so many others.
