*Knowledge Management, Information Systems, E-Learning, and Sustainability Research* Miltiadis D. Lytras, Patricia Ordonez De Pablos, Adrian Ziderman, Alan Roulstone, Hermann Maurer, Jonathan B. Imber, 2010-09-27 It is a great pleasure to share with you the Springer CCIS 111 proceedings of the Third World Summit on the Knowledge Society--WSKS 2010--that was organized by the International Scientific Council for the Knowledge Society, and supported by the Open Research Society, NGO, (<http://www.open-knowledge-society.org>) and the International Journal of the Knowledge Society Research, (<http://www.igi-global.com/ijksr>), and took place in Aquis Corfu Holiday Palace Hotel, on Corfu island, Greece, September 22-24, 2010. The Third World Summit on the Knowledge Society (WSKS 2010) was an international scientific event devoted to promoting the dialogue on the main aspects of the knowledge society towards a better world for all. The multidimensional economic and social crisis of the last couple years brings to the fore the need to discuss in depth new policies and strategies for a human-centric developmental process in the global context. This annual summit brings together key stakeholders of knowledge society development worldwide, from academia, industry, government, policy makers, and active citizens to look at the impact and prospects of information technology, and the knowledge-based era it is creating, on key facets of living, working, learning, innovating, and collaborating in today's hyper-complex world.

10th International Conference on Soft Computing Models in Industrial and Environmental Applications Álvaro Herrero, Javier Sedano, Bruno Baroque, Héctor Quintián, Emilio Corchado, 2015-05-31 This volume of *Advances in Intelligent and Soft Computing* contains accepted papers presented at the 10th International Conference on Soft Computing Models in Industrial and Environmental Applications (SOCO 2015), held in the beautiful and historic city of Burgos (Spain), in June 2015. Soft computing represents a collection or set of computational techniques in machine learning, computer science and some engineering disciplines, which investigate, simulate and analyze very complex issues and phenomena. This Conference is mainly focused on its industrial and environmental applications. After a thorough peer-review process, the SOCO 2015 International Program Committee selected 41 papers, written by authors from 15 different countries. These papers are published in present conference proceedings, achieving an acceptance rate of 40%. The selection of papers was extremely rigorous in order to maintain the high quality of the conference and we would like to thank the members of the International Program Committees for their hard work during the review process. This is a crucial issue for creation of a high standard conference and the SOCO conference would not exist without their help.

*Web Information Systems Engineering - WISE 2009* Gottfried Vossen, Darrell D. E. Long, Jeffrey Xu Yu, 2009-10-13 Welcome to the tenth anniversary of the International Conference on Web Information Systems Engineering, WISE 2009. This year the WISE conference continued the tradition that has evolved from the inaugural conference held in 2000 in Hong Kong and since then has made its journey around the world: 2001 Kyoto (Japan), 2002 Singapore, 2003 Rome (Italy), 2004 Brisbane (Australia), 2005 New York (USA), 2006 Wuhan (China), 2007 Nancy (France), and 2008 Auckland (New Zealand). This year we were happy to hold the event in Poznan, a city of 600,000 inhabitants in western Poland. Poznan is the capital of the most affluent province of the country - Wielkopolska - which means "Greater Poland". For more than 1,000 years, Poznan's geographical location has predestined the city to be a significant scientific, cultural and economic center with more than just regional influence. The city is situated on the strategic cross-roads from Paris and Berlin in the west, to Warsaw and Moscow in the east, and from Scandinavia through the Baltic Sea in the north to the Balkans in the south. Poznan is a great research and university center with a dynamic potential. In all, 140,000 students are enrolled in 26 state-run and private institutions of higher education here, among which the Poznan University of Economics with its 12,000 students is one of the biggest. The WISE 2009 Conference provided a forum for engineers and scientists to present their latest findings in Web-related technologies and solutions.

*Human Error, Safety and Systems Development* Philippe Palanque, Jean Vanderdonckt, Marco Winckler, 2010-02-12 th HESSD 2009 was the 7 IFIP WG 13.5 Working Conference in the series on Human Error, Safety and Systems Development which looks at integration of usability, human factors and human-computer interaction within system development. This edition was jointly organized with the 8 TAMODIA event on Tasks, Models and Diagrams for User Interface Development. There is an obvious synergy between the two previously separated events, as a rigorous, engineering approach to user interface development can help in the prevention of human error and the maintenance of safety in critical interactive systems. Following the tradition of HESSD events, the papers in these proceedings address the problem of developing systems that support human interaction with complex, safety-critical applications. The last 30 years have seen a significant reduction in the accident rates across many different industries. Given these achievements, why do we need further research in this area? Recent accidents in a range of industries have increased concern over the design, management and control of safety-critical systems. Therefore, any system that involves human lives in its functioning is subject to safety-critical aspects. Contributions such as the one by Holloway and Johnson (2004) report that over 80% of accidents in aeronautics are attributed to human error.

**Natural Language Processing and Information Systems** Mokrane Bouzeghoub, Zoubida Kedad, Elisabeth Metais, 2001-04-18 This book constitutes the thoroughly refereed post-proceedings of the 5th International Conference on Application of Natural Language to Information Systems, NLDB 2000, held in Versailles, France, in June 2000. **The Power of Intuition** Gary Klein, 2007-12-18 At times in our careers, we've all been aware of a gut feeling guiding our decisions. Too often,

we dismiss these feelings as hunches and therefore untrustworthy. But renowned researcher Gary Klein reveals that, in fact, 90 percent of the critical decisions we make is based on our intuition. In his new book, *THE POWER OF INTUITION*, Klein shows that intuition, far from being an innate sixth sense, is a learnable--and essential--skill. Based on interviews with senior executives who make important judgments swiftly, as well as firefighters, emergency medical staff, soldiers, and others who often face decisions with immediate life-and-death implications, Klein demonstrates that the expertise to recognize patterns and other cues that enable us--intuitively--to make the right decisions--is a natural extension of experience. Through a three-tiered process called the Exceleration Program, Klein provides readers with the tools they need to build the intuitive skills that will help them make tough choices, spot potential problems, manage uncertainty, and size up situations quickly. Klein also shows how to communicate such decisions more effectively, coach others in the art of intuition, and recognize and defend against an overdependence on information technology. The first book to demystify the role of intuition in decision making, *THE POWER OF INTUITION* is essential reading for those who wish to develop their intuition skills, wherever they are in the organizational hierarchy.
