Nick Pollotta

Invasion from Uranus Nick Pollotta, 2008-02 THEY WANTED TO TERRAFORM...THE EARTH?

Once more, Nick Pollotta has unleashed a baker's dozen of his comedy short stories, this collection ranging from Science Fiction to Mystery, and each tale crowned with his hallmark twist endings. * After an exhausted wizard grants a young king a special favor, the history of the world is changed forever because of a snappy Broadway musical. * Battling the ultimate evil, the only hope for a desperate British lawman is a new, and innovative, use of condiments. * Ever wonder what would happen if Sherlock Holmes discovered that his best friend was a murderer? So did Watson, but not anymore. * When nuclear war turns Earth into a savage paradise, a boy and his pet robot learn the ultimate rule for survival: keep your damn mouth shut. * There is an excellent reason that rap stars always wear a crucifix and carry so many guns. The answer is simple...fangbangers. So turn down the lights, lock the doors, butter the cat, and prepare for the unexpected! **BONUS:** Also included is the complete script for Nick's comedy radio play, *Doc Bronze, Hero With a Tan*, available for the first time to the general

public.

Friends From Uranus R C Olmsted, 2023-09-19 FRIENDS FROM URANUS is an Action packed comedy for Middle Grade Readers age 8-12, grades 3rd to 5th. Aslan finds a microscopic alien residing in a spider after he smashes it. He learns they're aliens, Uranian's from Uranus. They need Aslan's help to defeat the Martian invaders who are controlling his Dad and trying to take over Earth. Aslan shrinks down to help, hopefully before his Dad's memories are erased. Well, before all of Earth is invaded.

Zombie Butts from Uranus! Andy Griffiths, 2016-11-29 In this exciting sequel to *The Day My Butt Went Psycho*, a boy and his butt must protect the planet from ruthless rumps from outer space. Zack Freeman is on his way to becoming a first-rate butt-fighter. He has gone butt-to-butt with all kinds of stinky scoundrels and butts-gone-bad. But even our doody-full hero is a-gassed by these latest stench invaders. Their odor is unstoppable. Their mission is downright foul. And they won't rest until Earth is wiped away by their nasty fumes! They're **Zombie Butts from Uranus!** And the galaxy is but one boy

(and his butt) away from total reek-dom . . . Praise for Zombie Butts from Uranus “Delivers innumerable gag-worthy gags.” —Publishers Weekly

Space Invaders Michel van Pelt, 2010-05-05 Manned space programs attract the most media attention, and it is not hard to understand why: the danger, the heroism, the sheer adventure we as earthbound observers can imagine when humans are involved. But robotic missions deserve a

respectful and detailed history and analysis of their own, and this book provides it. Instead of describing one specific spacecraft or mission, Michel van Pelt offers a behind the scenes look at the life of a space probe from its first conceptual design to the analysis of the scientific data returned by the spacecraft.

Weird Tales , 1924

Invaders from the Infinite John Wood Campbell, 2022-11-29 The alien spaceship was unthinkably huge, enormously powerful, apparently irresistible. It came from the void and settled on Earth, striking awe into the hearts of all who saw it. Its burden, however, was not conquest -- but a call for help! First contact was a job for the brilliant team of scientists, Arcot, Wade, and Morey, explorers of the Islands of Space. And what they learned was an offer of an alliance against an invading foe so powerful that no known force could turn them back!

Suicide in the Entertainment Industry David K. Frasier, 2015-09-11 This work covers 840 intentional suicide cases initially reported in Daily Variety (the entertainment industry's trade journal), but also drawing attention from mainstream news media. These cases are taken from the ranks of vaudeville, film, theatre, dance, music, literature (writers with direct connections to film), and other allied fields in the entertainment industry from 1905 through 2000. Accidentally self-inflicted deaths are omitted, except for a few controversial cases. It includes the suicides of well-known personalities such as actress Peg Entwistle, who is the only person to ever commit suicide by jumping from the top of the

Hollywood Sign, Marilyn Monroe and Dorothy Dandridge, who are believed to have overdosed on drugs, and Richard Farnsworth and Brian Keith, who shot themselves to end the misery of terminal cancer. Also mentioned, but in less detail, are the suicides of unknown and lesser-known members of the entertainment industry. Arranged alphabetically, each entry covers the person's personal and professional background, method of suicide, and, in some instances, includes actual statements taken from the suicide note.

The History of Science Fiction and Its Toy Figurines Luigi Toiati, 2023-12-21 Science fiction, as the name suggests, is the combination of science and fantasy. In addition to a literary form, it also encompasses film, TV, comics, toys and our beloved toy astronauts, or other figures such as aliens, monsters and other playable genres. The term science fiction was coined by publisher Hugo Gernsbach around the first decades of the last century to refer to the predominantly 'space' adventures covered in his magazines. Space invaded radio, cinema, TV, and consequently for a long time toy figurines were predominantly space-related, later evolving into other themes. This lavishly illustrated

book covers both the history of literary science fiction, following in the footsteps of contemporary official criticism, and toy figurines inspired by science fiction. You will also find several other themes, such as the link between science fiction figures and cinema, radio, TV, comics, and more. Luigi Toiati offers to both guide the reader on an often-nostalgic walk through science fiction in all its various forms, and to describe the figurines and brands associated with it.

Invaders Vaughn Heppner, 2016-10-03 The battle for Earth begins with a secret invasion...They came from the brightest star in the southern constellation of Carina. First they studied us. Now they're among us, threatening human existence as they search for the Starcore, the greatest device of the lost Polarions. Logan is captured in the Nevada desert, but escapes in Greenland. There he finds an extraterrestrial stealth ship, giving him the means to take the battle to the enemy. He will fight the aliens underground. He will fight them in the sky, and he will fight them in space. He will never surrender. Logan becomes a one-man wrecking crew while using alien technology better than any being alive.

Interesting History of Uranus Emily Stehr,2019-09-22 Interesting History of Uranus

Definition of Uranus: Astronomy - the planet seventh in order from the sun, having an equatorial diameter of 32,600 miles (56,460 kilometers), a mean distance from the sun of 1,784 million miles (2,871 million kilometers), a period of revolution of 84.07 years, and 15 moons.<https://www.dictionary.com/browse/uranus>

William Herschel; On Nebulous Stars, Properly So Called; Royal Society of London; 1791 William Herschel writes: But what a field of novelty is here opened to our conceptions! A shining fluid, of a brightness sufficient to reach us from the remote regions of a star of the 8th, 9th, 10th, 11th or 12th magnitude, and of an extent so considerable as to take up 3, 4, 5, or 6, minutes in diameter! Can we compare it to the coruscations of the electrical fluid in the aurora borealis? Or to the more magnificent cone of the zodiacal light as we see it in spring or autumn? The latter, notwithstanding I have observed it to reach at least 90 degrees from the sun, is yet of so little extent and brightness as probably not to be perceived even by the inhabitants of Saturn or the Georgian planet [Uranus], and must be utterly invisible at the remoteness of the nearest fixed star.

Neptune Ben Bova, 2021-08-17 Hugo Award winner Ben Bova continues his grand tour of the human settled solar system with a fan-pleasing look at life in the Outer Planets, among the moons of Neptune. In the future, humanity has spread throughout the solar system, on planets and moons once visited only by robots or explored at a distance by far-voyaging spacecraft. No matter how hostile or welcoming the environment, mankind has forged a path and found a home. In the far reaches of the solar system, the outer planets—billions of miles from Earth, unknown for millennia—are being settled. Neptune, the ice giant, is swathed in clouds of hydrogen, helium, and methane and circled by rings of rock and dust. Three years ago, Ilona Magyr's father, Miklos, disappeared while exploring the seas of Neptune. Everyone believes he is dead—crushed, frozen, or boiled alive in Neptune's turbulent seas. With legendary space explorer Derek Humbolt piloting her ship and planetary scientist Jan Meitner guiding the search, Ilona Magyr knows she will find her father—alive—on Neptune. Her plans are irrevocably altered when she and her team discover the wreckage of an alien ship deep in Neptune's ocean, a discovery which changes humanity's understanding of its future...and its past. Invaders from Earth Robert Silverberg, Ed Emshwiller, 1958

Invaders (a Sequel to Vaz, Tiona and Disc) Laurence E. Dahners, 2016-08-26 *Invaders* is about events that occur several years after those in the novel *Disc*. GSI (Gettnor Space Industries) is beginning to investigate our solar system and mine the asteroids. Aircraft and automobile companies are beginning to switch over to thrusters from their more traditional products. New uses for thrusters are popping up in the healthcare and sports industries. However, at Epsilon Eridani, a race of aliens has so overpopulated their own solar system that they must move many tens of billions of their people to another system before overcrowding destroys them. They send an exploratory vessel to our solar system to determine whether it would be a suitable place to move. The mere presence of another intelligent race doesn't deter them-they've always just wiped out any problem species in new systems. When the aliens first arrive through a wormhole near the sun, their ship is thought to be an asteroid in a highly elliptical orbit. Earth isn't even aware that an alien race has arrived until the aliens separate a

lander and send it to study Earth. Attempts to communicate with the aliens fail. The aliens' complete lack of any interest in communication with us contributes to these failures. The aliens are far ahead of us in biotechnology, materials technology, and wormhole physics. They aren't really worried about any threats from the human race, but don't recognize that we have advantages in computing and thruster technology. Will the aliens be able to successfully deploy their bio weapon, destroying the human race and moving their excess population to our solar system? Or can we fight back...somehow?

Invaders from the Infinite John Campbell, 2007-05 The alien spaceship was unthinkably huge, enormously powerful, apparently irresistible. It came from the void and settled on Earth, striking awe into the hearts of all who saw it. Its mission, however, was not conquest -- but a call for help! First contact was a job for the brilliant team of scientists, Arcot, Wade, and Morey. And what they received was an offer of an alliance against an invading foe so powerful that no known force could turn it back! John W. Campbell's INVADERS FROM THE INFINITE is a veritable odyssey of the universe, exploring world after world and uncovering cosmic secret after cosmic secret. Here is a classic novel of super-

science that may never be surpassed!
