Reviews, Zeitschriften, Revues Sophie Levie,1994 This study of six early twentieth-century periodicals serves to refine the traditional image of the inter-war journal as the pre-eminent vehicle of artistic and intellectual renewal. Every periodical has its own history but general themes are clearly identified. Traces emerge of a common commitment to the internationalisation of the arts and we find early and unexpected discussion of Freud, Chaplin and Joyce in Brussels and Berlin, jazz in Vienna and Brussels, Ezra Pound in the Netherlands and Belgium. In contrast to this internationalisation are the ambitions of the various editors to play a significant role in their national cultures. This tension between national and international influences was in the first instance stimulating and innovative. Later, as a result of political and socio-economic developments, the newly achieved openness and exchange were gradually diminished and finally disappeared as did the periodicals themselves.

Richard Strauss in Context Morten Kristiansen,Joseph E. Jones,2020-10-29 Richard Strauss in Context offers a distinctive approach to the study of a composer in that it places the emphasis on contextualizing topics rather than on biography and artistic output. One might say that it inverts the relationship between composer and context. Rather than studies of Strauss's librettists that discuss the texts themselves and his musical settings, for instance, this book offers essays on the writers themselves: their biographical circumstances, styles, landmark works, and broader positions in literary history. Likewise, Strauss's contributions to the concert hall are positioned within the broader development of the orchestra and trends in programmatic music. In short, readers will benefit from an elaboration of material that is either absent from or treated only briefly in existing publications. Through this supplemental and broader contextual approach, this book serves as a valuable and unique resource for students, scholars, and a general readership.

Genetic Criticism and the Creative Process William Kinderman,Joseph E. Jones,2009 Studies of the genesis of musical, literary, and theatrical works.

Cross-Cultural Pragmatics Anna Wierzbicka,2009-09-04 This book, which can be seen as both a research monograph and a text book, challenges the approaches to human interaction based on supposedly universal maxims of conversation and principles of politeness, which fly in the face of reality as experienced by millions of people - refugees, immigrants, crosscultural families, and so on. By contrast to such approaches, which can be of no use in crosscultural communication and education, this book is both theoretical and practical: it shows that in different societies, norms of human interaction are different and reflect different cultural attitudes and values; and it offers a framework within which different cultural norms and different ways of speaking can be effectively explored, explained, and taught. The book discusses data from a wide range of languages, including English, Italian, Russian, Polish, Yiddish, Hebrew, Japanese, Korean, and Walmatjari (an Australian Aboriginal language), and it shows that the meanings expressed in human interaction and the different cultural scripts prevailing in different speech communities can be described and compared in a way that is clear, simple, rigorous, and free of ethnocentric bias by using a natural semantic metalanguage, based on empirically established universal human concepts. As the book shows, this metalanguage can be used as a basis for teaching successful cross-cultural communication and education, including the teaching of languages in a cultural context.

Herbert Eimert and the Darmstadt School Max Erwin,2020-12-03 After 1951, the discourse surrounding both the Darmstadt courses in particular and European New Music more broadly shifted away from a dodecaphonic vocabulary in favour of concepts such as 'punctual music', 'post-Webern music', and 'static music', all collected under the newly-christened unity of the Darmstadt School. This study proposes a genealogy of the Darmstadt School through the institutional influence and writings of Herbert Eimert. It demonstrates that Eimert's understanding of music history - whereby technical procedures are universalised as the acme of historical progress - was adopted as the institutional discourse of New Music in Europe, and remains central to both textbook and critical scholarly accounts which attempt to make sense of the avant-garde after World War II.

Handbook of the Psychology of Religion and Spirituality, Second Edition Raymond F. Paloutzian,Crystal L. Park,2014-12-19 Paloutzian (experimental and social psychology, Westmont College) and Park (psychology, U. of Connecticut) provide a 33-chapter handbook on the psychology of religion and spirituality, for social and clinical psychologists, pastoral counselors, and students and researchers in psychology and religious studies. Psychologists and a few religious studies specialists from the US and some countries in Europe address the foundations, including definitions, core issues, measurement assessment, research methods, psychodynamic psychology and religion, and evolutionary psychology as a foundation for the psychology of religion; religious and spiritual development across the lifespan; and the neural and cognitive bases of religion and connections to emotion, personality, culture, and social behavior. They discuss religious practices and rituals, conversion experiences, prayer, spiritual struggles, fundamentalism, forgiveness, values, and morality, and implications for individual and collective well-being in terms of health, mental health, coping, psychotherapy, workplace spirituality research, terrorism, and other areas. New topics in this edition include cross-cultural issues, spiritual goals, emotional values, and mindfulness. Most chapters have been redesigned or rewritten, with 25 new and eight revised chapters. The main themes of the book are more integrated, and the introductory and concluding chapters argue that the application of religious meaning systems and the multilevel interdisciplinary paradigm can allow reconceptualization of the field and expand research.
