Configuring Internal Controls for Software as a Service Chong Ee, 2018-09-12 This book taps into an inherent paradox: with the ease of reliance on external, cloud providers to provide robust functionality and regular enhancements comes, as their very own audited service organization control (SOC) reports are quick to point out, the need for client organizations to devise and sustain a system of effective internal controls. By addressing the practitioner in the field, it provides tangible, cost effective and thus pragmatic means to mitigate key risks whilst leveraging built-in cloud capabilities and overarching principles of effective system design.

**Observation and Audit Techniques for Measuring Retail Sales (Classic**

**Reprint)** Earl E. Houseman, 2018-01-08 Excerpt from Observation and Audit Techniques for Measuring Retail Sales The purchase invoice technique. - Another variation of the observation technique used to derive estimates of retail sales of certain products is the purchase invoice technique. It is particularly relevant to items that have a relatively large turn over compared with their inventory at any time. Retailer purchase invoices as estimates of retailer sales can likewise be used for other high-turnover products, such as fresh milk and ice cream. There is a constant flow of deliveries of these products and thus little need for any substantial retail inventory. Direct measures of sales. - Frequently the problem of partial cooperation has been encountered among retailers in auditing products that have high unit cost. Often retailers will permit the collection of certain types of information but not others. In auditing jewelry and cameras, a variation of the warranty card procedure has been employed with the card being filled out at the retail counter. As each consumer purchase is made, the retailer fills out a form attached to the sales slip, then this form is mailed directly to the surveying company. In effect, this provides a direct measure of the sales of these items without having to take complete inventory and collect purchase invoice data. *Business Criminal Law* Lukas Staffler, 2021-12-14 This textbook deals with business criminal law from the perspective of Germany, Austria, Liechtenstein and Switzerland. It primarily addresses students in business and economics (master's programme) as well as business practitioners, but is also meant for lawyers and law students. As criminal law legislators exert considerable influence on economic life, raising and growing awareness in the area of criminal law seems compulsory for future managers and executives. This textbook approaches the legal field less normatively and rather in a practical and entrepreneurial way. Its contents are based on the master level class Business Criminal Law at MCI | The Entrepreneurial School taught by the author. This textbook has been recommended and developed for university courses in Germany, Austria and Switzerland.
