**Student Engagement in Today's Learning Environments** Justin A. Collins,2014-05-01 This book argues that a key element of reform has remained in plain view for decades but has gone unmentioned, unmeasured, and unused in reform plans: student engagement.

**Battling the Student Engagement Front** Justin A. Collins,2014-06-04 This book sought to explore whether school funding practices satisfy the equity and adequacy standards delineated by policymakers and judges, and demanded by the broader public. A funding formula myopia, the book argues, has left student engagement largely overlooked. It comes as no surprise, therefore, that vast funding enhancements have introduced disappointing outcomes results. The book argues the front of the classroom must become and remain the epicenter of reform activity: and that transforming instructional and engagement behaviors are effort-intensive endeavors that very little in pecuniary terms.

**The Law and Practice of the International Criminal Court** Carsten Stahn,2015-05-28 Some parts of this publication are open access, available under the terms of a CC BY-NC-ND 4.0 International licence. Chapters 2, 4, 10, 47 and 49 are offered as a free PDF download from OUP and selected open access locations. The International Criminal Court is a controversial and important body within international law; one that is significantly growing in importance, particularly as other international criminal tribunals close down. After a decade of Court practice, this book takes stock of the activities of the International Criminal Court, identifying the key issues in need of re-thinking or potential reform. It provides a systematic and in-depth thematic account of the law and practice of the Court, including its changes context, the challenges it faces, and its overall contribution to international criminal law. The book is written by over forty leading practitioners and scholars from both inside and outside the Court. They provide an unparalleled insight into the Court as an institution, its jurisprudence, the impact of its activities, and its future development. The work addresses the ways in which the practice of the International Criminal Court has emerged, and identifies ways in which this practice could be refined or improved in future cases. The book is organised along six key themes: (i) the context of International Criminal Court investigations and prosecutions; (ii) the relationship of the Court to domestic jurisdictions; (iii) prosecutorial policy and practice; (iv) the applicable law; (v) fairness and expeditiousness of proceedings; and (vi) its impact and lessons learned. It shows the ways in which the Court has offered fresh perspectives on the theorization and conception of crimes, charges and individual criminal responsibility. It examines the procedural framework of the Court, including the functioning of different stages of proceedings. The Court's decisions have significant repercussions: on domestic law, criminal theory, and the law of other international courts and tribunals. In this context, the book assesses the extent to which specific approaches and assumptions, both positive and negative, regarding the potential impact of the Court are in need of re-thinking. This book will be essential reading for practitioners, scholars, and students of international criminal law.

**UN Peacekeeping Doctrine in a New Era** Cedric de Coning, Chiyuki Aoi, John Karlsrud, 2017-02-20 This edited volume offers a thorough review of peacekeeping theory and reality in contemporary contexts, and aligns the two to help inform practice. Recent UN peacekeeping operations have challenged the traditional peacekeeping principles of consent, impartiality and the minimum use of force. The pace and scope of these changes have now reached a tipping point, as the new mandates are fundamentally challenging the continued validity of the UN peacekeeping's core principles and identity. In response the volume analyses the growing gap between these actual practices and existing UN peacekeeping doctrine, exploring how it undermines the effectiveness of UN operations, and endangers lives, arguing that a common doctrine is a critical starting point for effective multi-national operations. In order to determine the degree to which this general principle applies to the current state of UN peacekeeping, this book: Provides a review of conceptual and doctrinal developments in UN peacekeeping operations through a historical perspective Examines the debate related to peace operations doctrine and concepts among key Member States Focuses on the actual practice of peacekeeping by conducting case studies of several UN peacekeeping missions in order to identify gaps between practice and doctrine Critically analyses gaps between emerging peacekeeping practice and existing doctrine Recommends that the UN moves beyond the peacekeeping principles and doctrine of the past Combining empirical case-based studies on UN peace operations, with studies on the views and policies of key UN Security Council members that generate these mandates, and views of key contributors of UN peacekeepers, this volume will be of great use to policy-makers; UN officials and peace operations practitioners; and academics working on peace and conflict/security studies, international organizations and conflict management.

**Foreign Policy in Post-Apartheid South Africa** Adekeye Adebajo, Kudrat Virk, 2017-12-18 South Africa is the most industrialized power in Africa. It was rated the continent's largest economy in 2016 and is the only African member of the G20. It is also the only strategic partner of the EU in Africa. Yet despite being so strategically and economically significant, there is little scholarship that focuses on South Africa as a regional hegemon. This book provides the first comprehensive assessment of South Africa's post-Apartheid foreign policy. Over its 23 chapters - and with contributions from established Africa, Western, Asian and American scholars, as well as diplomats and analysts - the book examines the current pattern of the country's foreign relations in impressive detail. The geographic and thematic coverage is extensive, including chapters on: the domestic imperatives of South Africa's foreign policy; peace-making; defence and security; bilateral relations in Southern, Central, West, Eastern and North Africa; bilateral relations with the US, China, Britain, France and Japan; the country's key external multilateral relations with the UN; the BRICS economic grouping; the African, Caribbean and Pacific Group (ACP); as well as the EU and the World Trade Organization (WTO). An essential resource for researchers, the book will be relevant to the fields of area studies, foreign policy, history, international relations, international law, security studies, political economy and development studies.
