Blade Servers and Virtualization Barb Goldworm,Anne Skamarock,2007-05-21 Blade server systems and virtualization are key building blocks for Next Generation Enterprise Data centers Blades offer modular, pre-wired, ultra high-density servers (up to 10x traditional servers) with shared components (power, cooling, switches) – reducing complexity and cost, and improving flexibility, availability, manageability, and maintainability Virtualization enables consolidation of physical servers by allowing many virtual servers to run concurrently on one physical server – improving system utilization, reducing the total number of physical servers, reducing costs, and increasing flexibility This is the first book covering these complementary technologies and how, together, they provide a strong foundation for the future It examines the history, architectures, features, examples, and user case studies of blade systems and virtualization, and offers guidance and considerations for how to evaluate and implement solutions

Exploring IBM EServer XSeries Jim Hoskins,Bill Wilson,Ray Winkel,2003 Annotation Introducing the brands of Intel-based IBM computers, this guide shows how to integrate these systems into business for greater efficiency, productivity, and overall business management. Written for nontechnical users, the most current xSeries information is included. Differences and uses for the assorted computers are detailed, as are the latest peripherals, software options, and networking issues. Guidelines for choosing operating systems to fit business needs are also discussed.

Migration, Diaspora and Identity Georgina Tsolidis,2013-10-07 Framed in relation to diaspora this collection engages with the subject of how cultural difference is lived and how complex and shifting identities shape and respond to spatial politics of belonging. Diaspora is understood in a variety of ways, which makes this an eclectic collection of papers. Authors use various theoretical frameworks to explore diverse groups of people with a variety of experiences in a wide range of settings. They are making sense of the experiences of women and men from a range of ethnic backgrounds, negotiating identities through family, work and education. The micro dynamics of the everyday offer an evocative 'bottom up' means of understanding the tensions implicit in living multiple belongings. The common thread for the collection comes from the glimpses these authors provide into the remaking of our globalized world. The aim is to shed light on racism, dislocation and alienation on the one hand, and on the other hand, to consider how the complex power relations within the everyday mediate a sense of resistance and hope. The papers are arranged around four themes; 1. Multiple Belongings, 2. Representing a Way of Being, 3. Sexualised Identifications and 4. Marriage and Family.

Medical Image Computing and Computer-Assisted Intervention -- MICCAI 2010 Tianzi Jiang,Nassir Navab,Josien P.W. Pluim,Max A. Viergever,2010-09-21

The 13th International Conference on Medical Image Computing and Computer-Assisted Intervention, MICCAI 2010, was held in Beijing, China from 20-24

September, 2010. The venue was the China National Convention Center (CNCC), China's largest and newest conference center with excellent facilities and a prime location in the heart of the Olympic Green, adjacent to characteristic constructions like the Bird's Nest (National Stadium) and the Water Cube (National Aquatics Center). MICCAI is the foremost international scientific event in the field of medical image computing and computer-assisted interventions. The annual conference has a high scientific standard by virtue of the threshold for acceptance, and accordingly MICCAI has built up a track record of attracting leading scientists, engineers and clinicians from a wider range of technical and biomedical disciplines. This year, we received 786 submissions, well in line with the previous two conferences in New York and London. Three program chairs and a program committee of 31 scientists, all with a recognized standing in the field of the conference, were responsible for the selection of the papers. The review process was set up such that each paper was considered by the three program chairs, two program committee members, and a minimum of three external reviewers. The review process was double-blind, so the reviewers did not know the identity of the authors of the submission. After a careful evaluation procedure, in which all controversial and gray area papers were discussed individually, we arrived at a total of 251 accepted papers for MICCAI 2010, of which 45 were selected for podium presentation and 206 for poster presentation. The acceptance percentage (32%) was in keeping with that of previous MICCAI conferences. All 251 papers are included in the three MICCAI 2010 LNCS volumes.

Gold Catalysis F Dean Toste, Véronique Michelet, 2014-06-20 Research on designing new catalytic systems has been one of the most important fields in modern organic chemistry. One reason for this is the predominant contribution of catalysis to the concepts of atom economy and green chemistry in the 21st century. Gold, considered catalytically inactive for a long time, is now a fascinating partner of modern chemistry, as scientists such as Bond, Teles, Haruta, Hutchings, Ito and Hayashi opened new perspectives for the whole synthetic chemist community. This book presents the major advances in homogeneous catalysis, emphasizing the methodologies that create carbon-carbon and carbon-heteroatom bonds, the applications that create diversity and synthesize natural products, and the recent advances and challenges in asymmetric catalysis and computational research. It provides readers with in-depth information about homogeneous gold-catalyzed reactions and presents several explanations for the scientific design of a catalyst. Readers will be able to understand the entire gold area and find solutions to problems in catalysis. *Gold Catalysis — An Homogeneous Approach* is part of the Catalytic Science Series and features prominent authors who are experts in their respective fields. Contents: From Gold in Nature to Gold Catalysts (Søren Kramer and Fabien Gagosz) Homogeneous Gold-Catalyzed Oxidation and Reduction Reactions (Liming Zhang) Gold-Catalyzed Addition of Carbon Nucleophiles to C-C Multiple Bonds, Carbonyls, and other Electrophiles (Bryon L Simmons and Hong C Shen) Gold-Catalyzed Addition of Heteroatom Nucleophile to C-C Multiple Bond (Naoki Asao, Naoya Hatakeyama and Yoshinori Yamamoto) Gold-Catalyzed Synthesis of Heterocycles (Antonio Arcadi) Gold-Catalyzed Multi-Component Reactions (Rachid Skouta and Chao-Jun Li) Gold Catalysis on Tandem and Cascade Reactions (Rai-Shung Liu) Cycloisomerization Reactions of 1, N-Enynes (Núria Huguet and Antonio M Echavarren) Gold-Catalyzed Reactions of Propargylic Esters (Louis Fensterbank, Jean-Philippe Goddard, Max Malacria and Antoine Simonneau) Gold-Catalyzed Cross-Coupling Reactions (Suzanne A Blum) Gold-Catalyzed Reactions: A Computational Approach (Elena Soriano and José Marco-Contelles) Recent Developments in Asymmetric Catalysis (Patrick Y Toullec, Alexandre Pradal and Véronique Michelet) Gold Catalysis in Natural Product Synthesis (Michael R Gesinski and F Dean Toste) Readership: Graduate students and researchers in organic chemistry. Key Features: First book on homogeneous gold catalysis Prominent authors From catalysts design to target-oriented applications A fascinating partner for modern chemistry Keywords: Gold; Catalysis; Heterocycles; Tandem; Cascade Reactions Reviews: "Gold Catalysis gives an excellent overview of a rapidly growing field. All of the thirteen chapters are written by the best practitioners. This book is certainly a "must" for laboratories working with coinage metals, but also for any organometallic group." Beyond BIOS Vincent Zimmer, Michael Rothman, Suresh Marisetty, 2017 This book provides an overview of modern boot firmware, including the Unified Extensible Firmware Interface (UEFI) and its associated EFI Developer Kit II (EDKII) firmware. The authors have each made significant contributions to developments in these areas. The reader will learn to use the latest developments in UEFI on modern hardware, including open source firmware and open hardware designs. The book begins with an exploration of interfaces exposed to higher-level software and operating systems, and commences to the left of the boot timeline, describing the flow of typical systems, beginning with the machine restart event. Software engineers working with UEFI will benefit greatly from this book, while specific sections of the book address topics relevant for a general audience: system architects, pre-operating-system application developers, operating system vendors (loader, kernel), independent hardware vendors (such as for plug-in adapters), and developers of end-user applications. As a secondary audience, project technical leaders or managers may be interested in this book to get a feel for what their engineers are doing. The reader will find: An overview of UEFI and underlying Platform Initialization (PI) specifications How to create UEFI applications and drivers Workflow to design the firmware solution for a modern platform Advanced usages of UEFI firmware for security and manageability

Bootstrapping Trust in Modern Computers Bryan Parno, Jonathan M. McCune, Adrian Perrig, 2011-08-27 Trusting a computer for a security-sensitive task (such as checking email or banking online) requires the user to know something about the computer's state. We examine research on securely capturing a computer's state, and consider the utility of this information both for improving security on the local computer (e.g., to convince the user that her computer is not infected with malware) and for communicating a remote computer's state (e.g., to enable the user to check that a web server will adequately protect her data). Although the recent Trusted Computing initiative has drawn both positive and negative attention to this area, we consider the older and broader topic of bootstrapping trust in a computer. We cover issues ranging from the wide collection of secure hardware that can serve as a foundation for trust, to the usability issues that arise when trying to convey computer state information to humans. This approach unifies disparate research efforts and highlights opportunities for additional work that can guide real-world improvements in computer security.

Autonomous and Integrated Parking and Transportation Services Amalendu Chatterjee, 2019-11-08 In this book, the author outlines a Robust Web Parking, Truck and Transportation Portal (RWPTTP) for integrating parking and transportation services – a revolutionary approach in contrast to incremental change for managing traffic congestion. Autonomous vehicle technology, artificial intelligence, internet of things (IOT), and other interconnected hardware and software tools will assist autonomous parking and transportation services and provide next-century infrastructure for consolidated transportation customer services. The book highlights currently available autonomous parking and transportation technologies, and the development of an integrated and intelligent transportation service/system (IITS) platform, with specific use of technologies to reconfigure

the transportation industry. The author also suggests many regulatory and policy changes to simplify data collection, traffic operation, introduction of a duplicate transportation system using light rail (LRs) and high speed rail (SPRs), and redistribution of parking spaces along such routes, using renewable energy.
