Towards a Collaborative Memory Sara Jones, 2022-08-12 Focusing on the memory of the German Democratic Republic, *Towards a Collaborative Memory* explores the cross-border collaborations of three German institutions. Using an innovative theoretical and methodological framework, drawing on relational sociology, network analysis and narrative, the study highlights the epistemic coloniality that has underpinned global partnerships across European actors and institutions. Sara Jones reconceptualizes transnational memory towards an approach that is collaborative not only in its practices, but also in its ethics, and shows how these institutions position themselves within dominant relationship cultures reflected between East and West, and North and South.

The Post-Communist Condition Aleksandra Galasińska,Dariusz Galasiński,2010-06-17 This volume offers interdisciplinary perspectives on discourses in one national context of post-communist transformation. Proposing a macro-micro approach to discourse analysis and transformation, it examines a spectrum of topics including Polish history, with its 'interpreters'; changes in political bodies and the media, policies of the Catholic Church and

the Institute of National Remembrance; xenophobia and anti-Semitism, with the emergence of unemployment and homelessness; experiences of new gender relations and migrations. In effect, drawing upon unique sets of data, the book shows how post-communist transformation can be understood through analyses of the changing public and private discourses. It shows Polish post-communism as a fragile and uneasy transformation, with people and institutions struggling to make sense of it and of life within it. The volume will be of interest to a broad range of social scientists: discourse analysts, sociologists, modern historians and political scientists, as well as to the informed lay public.

Designing and Implementing Public Policy in Contemporary Society Dorota Szaban, Magdalena Zapotoczna, Piotr Pochyły, 2022-12-12 Public policies are an arena of collective actions that respond to the main problems of society. They are understood as a cycle of decisions and actions of public administration aimed at achieving the desired benefits in the future. They are mostly used when market mechanisms fail and are not able to deal with the problem on their own, or when they do not work effectively enough. The multiplicity of problems and the inadequacies in their solutions create opportunities for the emergence of new sectoral policies and interventions that address both entirely new and traditional phenomena of social life, but require a new approach that recognizes the special importance of political factors. The main objective of sectoral policies is to support the development of the identified key areas of development. This anthology presents the ways of creating and implementing public policies related to educational, demographic and social problems.

Contending with Antisemitism in a Rapidly Changing Political Climate Alvin H.

Rosenfeld,2021-11-02 Today's highly fraught historical moment brings a resurgence of

antisemitism. Antisemitic incidents of all kinds are on the rise across the world, including hate speech, the spread of neo-Nazi graffiti and other forms of verbal and written threats, the defacement of synagogues and Jewish cemeteries, and acts of murderous terror. Contending with Antisemitism in a Rapidly Changing Political Climate is an edited collection of 18 essays that address antisemitism in its new and resurgent forms. Against a backdrop of concerning political developments such as rising nationalism and illiberalism on the right, new forms of intolerance and anti-liberal movements on the left, and militant deeds and demands by Islamic extremists, the contributors to this timely and necessary volume seek to better understand and effectively contend with today's antisemitism.
