The 09 - 11 project T.G. Wallace,2024-02-27 What if we told you that the CIA agents who identified the Abbottabad complex as Osama Bin Laden's hideout were unfortunately also responsible for the burning of the spire of the Notre Dame de Paris cathedral and many other technical errors?... What if clumsy and slightly incompetent people had technology at their disposal to travel through time? Embark on this absurd journey where slapstick humor punctuates CIA agents Rosen, Kumar, Heavens and Lowell's investigation and their actions have catastrophic consequences on the history of humanity

Integrated Cost and Schedule Control for Construction Projects Frederick W. Mueller,2012-12-06 Management and administrative processes within the construction industry have been undergoing major changes in the last several decades. These changes have involved significant adjustments in management science and management techniques, brought about by the need for contemporary valid information with which to manage the construction process. In short, management in the construction industry is changing significantly; change will continue at an accelerated pace at least through the next decade. The responses required of construction industry management are now resulting in a movement away from an entrepreneurial management style to professional management techniques and procedures. THE COMPELLING ECONOMIC ISSUES The issues forcing these changes are economic. The rising costs of construction and of money are forcing the buyers of construction services to be more demanding. Their demands are for more construction economies, more production, and more productivity than at any time in the past. Nowhere has this been more evident than in the Business Roundtable on construction and in the response of the construction industry to it. To be successfully responsive, management in the construction industry will be required to use the best project management methods available for cost control, schedule control, and for financial and accounting controls. But responsive professional management can survive and will flourish within this more demanding economic environment.

2010/11 Social Accounting Matrix for Ethiopia: A Nexus Project SAM Ahmed, Hashim A.,Tebekew, Tewodros,Thurlow, James,2017-11-17 The purpose of this paper is used to document the different steps followed to construct the 2010/11 Social Accounting Matrix for Ethiopia. The SAM is an extension of the Standard Nexus Structure. It consists of 63 activity sectors, 67 commodity sectors, three types of factors of production: labor (rural and urban disaggregated by level of education), land, and capital (disaggregated by crops, livestock, mining and other sectors). The household sector is divided spatially into urban and rural households. Rural households are further disaggregated into households that earn crop and/or livestock incomes (i.e., farm households) and those that do no earn incomes from either source (i.e., nonfarm households). Households are further disaggregated into per capita expenditure quintiles. This SAM allows analyzing issues at the detailed level and to better understand the potential impacts of policy changes for both better off and more vulnerable households.

Archeologia e Calcolatori, Supplemento 11, 2019. The Archeolab Project in the Doclea Valley, Montenegro (Campaign 2017). Archaeology, Technologies and Future Perspectives Lucia Alberti,2019-06-26 I saggi raccolti in questo volume illustrano i risultati scientifici del primo anno di attività che un team italo-montenegrino ha svolto sul sito di Doclea e sul territorio circostante (ArcheoLab Italia Montenegro). Il progetto nasce da una serie di accordi bilaterali che dal 2015 l’Istituto di Studi sul Mediterraneo Antico e il Dipartimento Scienze Umane e Sociali, Patrimonio culturale del Consiglio Nazionale delle Ricerche ha intrattenuto con il Ministero della Scienza, il Ministero della Cultura del Montenegro e l’Historical Institute dell’Università del Montenegro. Oggetto della ricerca è la città romana di Doclea e il suo territorio: fondata come municipio romano nel I sec. d.C. in una pianura circondata da colline e delimitata da tre corsi d’acqua, si trova a circa tre chilometri dall’attuale capitale del paese, Podgorica. Scavata soprattutto alla fine del XIX secolo e solo in parte nel corso del XX secolo, fu la seconda città importante per dimensioni della Dalmazia romana. Ancora oggi sono visibili un grande foro, terme, templi e case private, tre chiese di epoca medievale oltre a un imponente circuito murario. Alcuni discutibili interventi moderni, quali la costruzione di una ferrovia che negli anni ’40 ha tagliato a metà il sito archeologico e la mancanza di una vera politica di conservazione e valorizzazione, stanno mettendo a rischio l’integrità e la capacità di fruizione del sito, che rappresenta uno dei monumenti più importanti per l’identità culturale della nazione montenegrina. Dalle ricerche di archivio e bibliografiche alla ricognizione archeologica, fino all’applicazione di nuove tecnologie di indagine, il testo è il risultato di un dialogo interdisciplinare che ha lo scopo di conoscere e valorizzare il sito e il suo paesaggio. Dal 2018 l’ArcheoLab Italia Montenegro è divenuto Progetto di Grande Rilevanza del Ministero degli Affari Esteri e della Cooperazione Internazionale con il titolo “Il Futuro del Passato: studio e valorizzazione dell’antica Doclea, Montenegro” (2018-2020).
