*Accounting and Business in a Sustainable post-Covid World: New Perspectives and Challenges* Joanna Dyczkowska,2022-10-19  
Książka zwraca uwagę na wyzwania i perspektywy w obszarze rachunkowości i biznesu w kontekście zrównoważonego rozwoju w erze postpandemicznej. Zaprezentowano w niej długofalowe spojrzenie na efekty globalnego kryzysu zdrowotnego. Wskazano, że pandemia Covid-19 może być postrzegana jako istotny czynnik napędzający zmiany organizacyjne, gospodarcze i społeczne. Publikacja może zainteresować badaczy rachunkowości i zarządzania, doktorantów i studentów studiów społeczno-ekonomicznych, a także praktyków gospodarczych.

Ittekkot, 2022-10-19 The ocean is a major source of income for many coastal nations, particularly in the developing world. Economic benefits from the ocean in the long-term depend on its wise science and technology-based management. The intersection of science, technology, and economy are most obvious in nations' coastal zones. This book highlights the need for the application of ocean science and technology for best economic outcomes. It gives examples of ocean resources and the threats to them from climate change and other human interventions, as well as provides information on the available ocean research and observation tools to monitor their impact as well as on the related internationally available opportunities for capacity development.

**Handbook of European Environmental and Climate Law**

Patrick Thieffry, 2021-05-06 This Handbook of European Environment and Climate Law is the 2nd edition of the work previously titled Handbook of European Environment Law. It is associated with the *Traité de droit européen de l'environnement et du climat* and the *Manuel de droit européen de l'environnement et du climat*, both in the French language and published in the same collection, and with which it shares a same

structure. The *Traité* provides a more in-depth approach, with further historic, policy and caselaw considerations, and more complete references. The introduction in the book's title of the climate dimension, while it was already quite present in the previous edition, is testimony to its growing importance absent a dedicated EU policy and corresponding legislative basis. Climate law is covered in its many occurrences along the work, its specificities noted, and their consequences recognized, especially with respect to the international background which brings about novel legal interventions, an upheaval of classical approaches, through the creation of a new governance for the implementation of the Paris Agreement and of the resulting EU legislation. The recurring changes in the many and diverse environmental legislations are also of course presented in context, including in light of the growing importance of circular economy and the proposal of a European Green Deal. The growing interference of fundamental rights is henceforth considered: Charter of Fundamental Rights of the Union, Convention for the Protection of Human Rights and Fundamental Freedoms, etc. More broadly, the development of environmental and climate disputes settlement is accounted for beyond the traditional recourse to the EU judges, in the national courts including through transnational private litigation, and in international arbitration.
