Bioethics in Singapore John Elliott,W. Calvin Ho,Sylvia S. N. Lim,2010 This book provides an analysis of the ways in which the BAC has established an ethical framework for biomedical research in Singapore, following the launch of the Biomedical Sciences Initiative by the Singapore Government. The editors and authors have an intimate knowledge of the working of the BAC, and the focus of the book includes the ways in which international forces have influenced the form and substance of bioethics in Singapore. Together, the authors offer a comparative account of the institutionalisation of biomedical research ethics in Singapore, considered in the wider context of international regulatory efforts. The book reviews the work of the BAC by placing it within the broader cultural, social and political discourses that have emerged in relation to the life sciences since the turn of the 21st century. This book is not primarily intended to be a retrospect or an appraisal of the contribution of the BAC, though this is one aspect of it. Rather, the main intention is to make a substantive contribution to the rapidly emerging field of bioethics. Ethical discussions in the book include consideration of stem cell research and cloning, genetics and research with human participants, and focus on likely future developments as well as the past.Many of the contributors of the book have been personally involved in this work, and hence they write with an authoritative first-hand knowledge that scholars in bioethics and public policy may appreciate. As indicated above, the book also explains the way in which ethics and science ? international and local ? have interacted in a policy setting. Scholars and policy makers may find the Singaporean experience to be a valuable resource, as the approach has been to make the ethical governance of research in Singapore consistent with international best practice while observing the requirements of a properly localised application of universally accepted principles. In addition, at least three chapters (the first three chapters in particular) are accessible to the lay reader interested in the development of bioethics and biomedical sciences, both inside and outside Singapore, from 2000 (the year in which the BAC was established). Both scholars and interested lay readers are therefore likely to find this publication a valuable reference.

Foreign Economic Policy, 1973-1976 United States. Department of State, 2009 NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT-- OVERSTOCK SALE -- Significantly reduced list price while supplies last Overview This volume is part of a subseries of volumes of the Foreign Relations series that documents the most important issues in the foreign policy of the administrations of Richard M. Nixon and Gerald R. Ford. This volume documents U.S. foreign economic policy from 1973 to 1976, focusing on international monetary policy, economic summitry, trade policy, commodity policy, and North-South relations. This volume has a tightly defined understanding of foreign economic policy, one that focuses on three significant areas: international monetary relations, international trade, and efforts to redress global economic inequalities. The section on international monetary policy and economic summitry focuses on the aftermath of the collapse of the fixed exchange rate regime envisioned at the 1944 Bretton Woods conference. It includes documents on the monetary crisis of February and March 1973; efforts to reform the international monetary system,

with particular emphasis on the issues of exchange rate flexibility and the future of gold; and the creation of the G-7 summit. The section on trade policy, more than any other section in this volume, demonstrates the influence of domestic politics on foreign economic policy; this is particularly clear in the documents on the 1973 decision to impose export controls and the White House's efforts to secure passage of a major piece of trade reform legislation, the Trade Act of 1974. This section also includes documents on the beginnings of a new round of negotiations under the General Agreement on Tariffs and Trade, with particular emphasis on the role of agriculture in those negotiations, as well as foreign fears of U.S. protectionism. The final section, on commodity policy and North-South issues, documents the approach of the Nixon and Ford administrations to the persistent economic disparities between the industrialized nations of the North and the less developed countries of the South; it also explores U.S. attempts to grapple with the global trade in primary commodities in a post-1973 oil embargo world.
