**Friends with Benefits** Darren Barefoot, Julie Szabo, 2010 The rules of marketing have changed. With viral YouTube videos racking up millions of views, popular bloggers reaching more readers than their traditional media counterparts, and Facebook mavens influencing thousands of their friends, marketing professionals simply cannot ignore the web's new communication channels. But this new brand of marketing can be intimidating to those unfamiliar with the new tools, the evolving culture, and the unwritten rules surrounding them. *Friends with Benefits* is a tactical guide, filled with tricks, tips, and real-world case studies that show marketers how to reach out to the new online influencers to increase their companies' online visibility and bring more visitors to their websites. Readers learn how to create viral campaigns, craft a compelling social media pitch, and market effectively inside intimidating social media channels, where honesty and connections are far more important than the size of their marketing budget. The power of social media is huge: 65 million Americans read blogs every day; Facebook has over 150 million users; and the most popular YouTube videos receive over 10 million views, often in less than a week. Nearly 80 percent of consumers trust recommendations from family, friends, and influential persons over any kind of advertising or marketing. Businesses need to reach these influencers.

**Best iPad Apps** Peter Meyers, 2010-12-08 What really wows iPad fans is when their touchscreen does what's impossible on other gadgets: the finger-painting app that turns a cross-country flight into a moving art class, the mini music studio (two-dozen instruments strong, each with motion-induced warble effects), and the portable fireworks display that you sculpt by swiping. Problem is, with tens of thousands of apps available for your iPad, who knows what to download? You can try to sort through a gazillion customer reviews with a mix of 5- and 1-star

ratings, but that's a head-hurting time-waster. The stakes are getting higher, too: instead of freebies and 99-cent trinkets, the price of iPad apps is steadily creeping up and beyond their iPhone predecessors. Best iPad Apps guides you to the hidden treasures in the App Store's crowded aisles. Author Peter Meyers stress-tested thousands of options to put together this irresistible, page-turner of a catalog. Inside these pages, you'll find apps as magical as the iPad itself. Flip through the book for app suggestions, or head directly to one of several categories we've loaded up with best of selections to help you: Get work done Manipulate photos Make movies Create comics Browse the Web better Take notes Outline ideas Track your health Explore the world No matter how you use your iPad, Best iPad Apps will help you find the real gems among the rubble -- so you make the most of your glossy gadget.

The Productive Online and Offline Professor  
Bonni Stachowiak, 2023-07-03 What does it mean to be a productive professor in higher education? What would it feel like to have more peace and productivity? To have nothing fall through the cracks? The Productive Online and Offline Professor is written for today's busy higher education professional. Through an exploration of what it means to make work meaningful, this book offers practical strategies and tips to support higher education professionals in efficiently managing and effectively using a wide range of technologies and productivity tools. Higher education instructors will find this guide helps them to fulfill their teaching roles with excellence and to build engaging relationships with students while also successfully managing other priorities in their professional and personal lives. The Productive Online and Offline Professor assists those who teach online and

blended courses with managing their personal productivity. Faculty are often expected to provide support and feedback to learners outside of normal work hours in non traditional classes. Programs that are designed with more asynchronous content may cause faculty to perceive that it is difficult to ever press the "off button" on their teaching. The author offers guidance and suggests software tools for streamlining communication and productivity that enable faculty to better balance their lives while giving rich feedback to students. Part 1 addresses the challenges in defining productivity and presents a working definition for the text. Part 2 describes the ability to communicate using both synchronous and asynchronous methods, along with ways of enriching such communication. Part 3 describes methods for finding, curating, and sharing relevant knowledge both within one's courses and to a broader personal learning network (PLN). Part 4 examines specific tools for navigating the unique challenges of productivity while teaching online. It includes ways to grade more productively while still providing rich feedback to students. Part 5 shares techniques for keeping one's course materials current and relevant in the most efficient ways possible. The Productive Online and Offline Professor is a practical guide for how to provide high quality online classes to diverse students. This book shares specific technology and other tools that may be used in charting a course toward greater productivity. It is intended to be a professional resource for fulfilling our roles with excellence and joy, while managing other priorities in our personal and professional lives.

Something's Gotta Give Beth R. Bernhardt, Leah H. Hinds, Katina P. Strauch, 2012-10-15 The theme of the 2011 Charleston Conference, the annual event that explores issues in book and serial acquisition, was Something's Gotta Give. The

conference, held November 2-5, 2011, in Charleston, SC, included 9 pre-meetings, more than 10 plenaries, and over 120 concurrent sessions. The theme reflected the increasing sense of strain felt by both libraries and publishers as troubling economic trends and rapid technological change challenge the information supply chain. What part of the system will buckle under this pressure? Who will be the winners and who will be the losers in this stressful environment? The Charleston Conference continues to be a major event for information exchange among librarians, vendors, and publishers. As it begins its fourth decade, the Conference is one of the most popular international meetings for information professionals, with almost 1,500 delegates. Conference attendees continue to remark on the informative and thought-provoking sessions. The Conference provides a collegial atmosphere where librarians, vendors, and publishers talk freely and directly about issues facing libraries and information providers. In this volume, the organizers of the meeting are pleased to share some of the learning experiences that they-and other attendees-had at the conference.

*101 Ways to Promote Your Real Estate Web Site*  
Susan Sweeney, 2008 An increasing number of real estate buyers and sellers are making the Web their first destination, so getting more of them to stop at an agency's or individual agent's site can mean thousands of dollars in commissions. The proven e-mail, linking, and online advertising techniques provided will increase initial visitor traffic to any real estate website and keep buyers and sellers returning again and again. In addition, real estate agents and office managers can use the templates, checklists, and forms included to make their website an important and effective selling tool.

*Futureproof* Kevin Roose, 2022-02-08 A practical,

deeply reported survival guide for the age of AI, written by the New York Times tech columnist who has introduced millions to the promise and pitfalls of artificial intelligence—now featuring a new afterword. “Artificial intelligence can be terrifying, but Kevin Roose provides a clear, compelling strategy for surviving the next wave of technology with our jobs—and souls—intact.”—Charles Duhigg, author of *The Power of Habit* It’s time to get real about AI. After decades of hype and sci-fi fantasies, AI—artificial intelligence—is leaping out of research labs and into the center of our lives. Millions of people now use tools like ChatGPT and DALL-E 2 to write essays, create art and finish coding projects. AI programs are already beating humans in fields like law, medicine and entertainment, and they’re getting better every day. But AI doesn’t just threaten our jobs. It shapes our entire human experience, steering our behavior and influencing our choices about which TV shows to watch, which clothes to buy, and which politicians to vote for. And while many experts argue about whether a robot apocalypse is near, one critical question has gone unanswered: In a world where AI is ascendant, how can humans survive and thrive? In *Futureproof: 9 Rules for Surviving in the Age of AI*, New York Times technology columnist Kevin Roose shares the secrets of people and organizations that have successfully navigated waves of technological change, and explains what skills are necessary to stay ahead of the curve today, with lessons like • Be surprising, social, and scarce • Resist machine drift • Leave handprints • Demote your devices • Treat AI like a chimp army Roose rejects the conventional wisdom that in order to compete with AI, we have to become more like robots ourselves—hyper-efficient, data-driven workhorses. Instead, he says, we should focus on being more

human, and doing the kinds of creative, inspiring, and meaningful things even the most advanced algorithms can't do.

Palm webOS Mitch Allen, 2009-07-28 A Note from the Author and from O'Reilly Media about what this book does--and doesn't--do: Palm webOS is a brand new platform and represents a very different type of operating system where the web runtime is used as the basis for the UI and Application model. Palm and O'Reilly felt that it was important to have a book available to help developers get a basic understanding of the new Palm platform at the time that the SDK was released; this timing played a major role in the content and structure of the book. Ideally this book would have been a complete reference of the new platform but that wasn't possible since the content was written at the same time as the software SDK was being developed by the Palm engineering team. The book does provide a complete overview of Palm webOS, a thorough description of the application model and gives details on many key design concepts. There are descriptions and examples of UI widgets, services, storage, notifications, dashboards and background applications, serving as a great introduction but not as a definitive source. The book uses a simple News reader application to illustrate the technical descriptions but the examples are not intended to serve as a cookbook tutorial. Experienced developers should be able to use the examples to build up a working application chapter by chapter but others may not find the loose descriptions adequate for recreating the application unaided. Overtime, these different needs will be filled by other books, but in the meantime we hope that this book will serve a valuable role introducing developers to webOS and giving them a way of getting started with webOS application development. A second printing of the book will update any original coverage

obsoleted by subsequent Mojo SDK builds. For owners of the original printing of the book, all of these updates are posted on the View/Submit Errata link (please see left-hand column of this web page). Thanks for understanding that book publishing and coverage of rapidly moving technologies can sometimes be an inexact science; we knew there'd be a need for a book such as *Palm webOS: The Insider's Guide to Developing Applications in JavaScript using the Palm MojoT Framework*, and there's certainly no better person to write that book than Mitch Allen; that said, we understand that because it is such a new operating system and SDK, there would (and will continue to be) changes that at best can't be documented and explored until new printings of the books are released. In the meantime we will be diligent in posting updates to this book's O'Reilly Media catalog page.

**Description** This is the official guide to building native JavaScript applications for Palm's new mobile operating system, Palm® webOS™. Written by Palm's software chief technology officer along with the Palm webOS development team, *Palm webOS* provides a complete tutorial on the design principles, architecture, UI, tools, and services necessary to develop webOS applications—including the Mojo JavaScript framework and Palm's SDK. Palm webOS is designed to support a fast and superb user experience using established web standards, so if you're familiar with HTML, CSS, and JavaScript, you're ready to build applications for any webOS-based device, including the Palm Pre. You'll gain expertise, chapter by chapter, as you build a working mobile application through the course of the book. You'll also learn how to extend existing web apps to work with the new generation of mobile phones. Get a thorough overview of the webOS platform and architecture. Understand the critical concepts for application design: what separates webOS from other web and

mobile platforms Learn the details of Mojo's development tools and SDK for building and testing mobile applications Examine best practices, important considerations, and guiding principles for developing with webOS and the Mojo framework

**Creating and Promoting Lifelong Learning in Public Libraries** Donna L. Gilton,2016-06-21

Creating and Promoting Lifelong Learning in Public Libraries describes specific ways that public librarians and other professionals can promote lifelong learning by planning and implementing Information Literacy Instruction (ILI). This book includes chapters on planning for instruction, using teaching methods, teaching with and about technology, and combining elements of ILI with more traditional public library programs, services, and activities. It is the sequel to Lifelong Learning in Public Libraries: Principles, Programs, and People.
