Handbook on the Delimitation of Maritime Boundaries

,2000 The Handbook covers legal, technical and practical information deemed essential in negotiating maritime boundary delimitation between coastal states. It also contains information about the peaceful settlement of disputes where negotiations are unsuccessful and the states wish to avail themselves of the dispute settlement mechanism set out in the 1982 Convention on the Law of the Sea

Sweet Persuasion Maya Banks,2009-06-02 FROM NEW YORK

TIMES BESTSELLING AUTHOR OF THE BREATHLESS TRILOGY MAYA BANKS The man of her dreams would give the orders. For him, she had two words that satisfied them both...Take me. For five years, Serena has run Fantasy Incorporated and has devoted her time to fulfilling her clients' fantasies. Never her own. Until now... Her most secret desire is to give ownership of her body to a man. Someone who will command her, pleasure her, and have complete authority over her. So she seeks out Damon Roche, owner of an exclusive sex club and a man strong enough to make her do anything he wants. Anything. Together they'll journey into a world she's only dreamed of. She's given the opportunity to immerse herself in a different life while her normal one waits for her to return whenever she wishes. Damon has no desire to let her go, however. Serena is the woman he's long searched for, and it's up to him to convince her to stay when the game is all over with. He wants their fantasy to become their reality and for Serena to remain his pampered, cherished submissive.

Canine and Feline Epilepsy Luisa de Risio,Simon

Platt,2014-09-23 Epilepsy is one of the most familiar chronic

neurological diseases and is a common yet challenging presentation in veterinary surgeries. This book covers seizure pathogenesis, classifications, diagnostic investigations, emergency treatments and longer term treatments, with a large section on pharmacological intervention. Filling a considerable gap in the veterinary literature, it includes tables and charts for quick reference during emergencies. Seizures can be very distressing to animals and owners, yet not all seizures are the result of epilepsy, a neurological condition. This book discusses how to distinguish between epileptic and non-neurological seizures, and provides case studies to illustrate different occurrences of epilepsy.

Maritime Delimitation Rainer Lagoni, Daniel Vignes, 2006 The delimitation of maritime zones is an important requirement for peaceful relations between neighbouring States. There are numerous examples of areas between States with opposite or adjacent coasts where sovereignty over an island or territory may not be contested but the delimitation of the continental shelf and exclusive economic zone is still pending. Under the Law of the Sea Convention, the delimitation of these zones shall be effected by agreement on the basis of international law. However, the Convention does not offer a definitive answer as to the methods that should be applied. This publication includes contributions by Judges of the International Tribunal for the Law of the Sea, eminent scholars and experienced practitioners. The papers deal with various aspects of maritime delimitation: the jurisprudence of international courts and tribunals and their relevance for delimitation, the impact of the Law of the Sea Convention, the role of legal practitioners and diplomatic negotiators, and delimitation under particular geological circumstances and in geographically complex regional situations. It is designed to provide insight and guidance to the complicated process of maritime delimitation.

2019 International Russian Automation Conference (RusAutoCon) IEEE Staff, 2019-09-08 The conference is organized in order to exchange experiences, to promote the discussion and

presentation of research papers, summarizing research in universities, industrial enterprises, scientific and industrial associations of the Russian Federation, as well as foreign authors, and research results obtained on the personal initiative of the authors. The aim of the conference is to promote informing the scientists and practitioners of the most promising areas of research and achievements in the field of automation in technological processes and control systems.

Practical Crime Scene Analysis and Reconstruction Ross M. Gardner, Tom Bevel, 2009-06-26 Crime scene reconstruction (CSR) is today's hot topic. The immense proliferation of television, print, and electronic media directed at this area has generated significant public interest, albeit occasionally encouraging inaccurate perceptions. *Practical Crime Scene Analysis and Reconstruction* bridges the gap between perception and reality, helping

Practical Crime Scene Processing and Investigation, Second Edition Ross M. Gardner, Donna Krouskup, 2016-04-19 All too often, the weakest link in the chain of criminal justice is the crime scene investigation. Improper collection of evidence blocks the finding of truth. Now in its second edition, *Practical Crime Scene Processing and Investigation* presents practical, proven methods to be used at any crime scene to ensure that evidence is admissible and persuasive. Accompanied by more than 300 color photographs, topics discussed include: Understanding the nature of physical evidence, including fingerprint, biological, trace, hair and fiber, and other forms of evidence Actions of the responding officer, from documenting and securing the initial information to providing emergency care Assessing the scene, including search considerations and dealing with chemical and bioterror hazards

Crime scene photography, sketching, mapping, and notes and reports
Light technology and preserving fingerprint and impression evidence
Shooting scene documentation and reconstruction
Bloodstain pattern analysis and the body as a crime scene
Special scene considerations, including fire, buried bodies, and entomological evidence
The role of crime scene analysis and reconstruction, with step-by-step procedures
Two appendices provide additional information on crime scene equipment and risk management, and each chapter is enhanced by a succinct summary, suggested readings, and a series of questions to test assimilation of the material. Using this book in your investigations will help you find out what happened and who is responsible.

Criminalistics Richard Saferstein, 2015 This best-selling text, written for the non-scientist, is appropriate for a wide variety of students, including criminal justice, law enforcement, law, and more! *Criminalistics: An Introduction to Forensic Science*, 11e, strives to make the technology of the modern crime laboratory clear and comprehensible to the non-scientist. The nature of physical evidence is defined, and the limitations that technology and current knowledge impose on its individualization and characterization are examined. By combining case stories with applicable technology, *Criminalistics* endeavors to capture the pulse and fervor of forensic science investigations. A major portion of the text centers on discussions of the common items of physical evidence encountered at crime scenes. These chapters include descriptions of forensic analysis, as well as updated techniques for the proper collection and preservation of evidence at crime scenes. Particular attention is paid to the meaning and role of probability in interpreting the evidential significance of scientifically evaluated evidence. *Teaching and Learning* Written by a well-known authority in forensic science, this text introduces the non-scientific student to the field of forensic science. It provides: Clear and comprehensible writing for the non-scientific

student: Makes text appropriate for a wide variety of students, including criminal justice, law enforcement, and more
Comprehensive, up-to-date coverage of forensics and its role in criminal investigation: Captures the pulse and intensity of forensic science investigations and the attention of the busiest student
Outstanding pedagogical features: Supports both teaching and learning

Talking about Life Chris Impey, 2010-08-19 With over 500 planets now known to exist beyond the Solar System, spacecraft heading for Mars, and the ongoing search for extraterrestrial intelligence, this timely book explores current ideas about the search for life in the Universe. It contains candid interviews with dozens of astronomers, geologists, biologists, and writers about the origin and range of terrestrial life and likely sites for life beyond Earth. The interviewees discuss what we've learnt from the missions to Mars and Titan, talk about the search for Earth clones, describe the surprising diversity of life on Earth, speculate about post-biological evolution, and explore what contact with intelligent aliens will mean to us. Covering topics from astronomy and planetary science to geology and biology, this book will fascinate anyone who has ever wondered 'Are we alone?'

Phonons, Theory and Experiments Peter Brüesch, 1982

Retroactive Justice István Rév, 2005 The book offers a vast panorama of Communism from the perspective of its collapse, and inspects the world beyond the fall in the distorting mirror of its imagined prehistory—providing in the process a perceptive analysis of a number of the fundamental issues of history writing.

Media Research Marshall McLuhan, 2014-01-02 Herbert Marshall McLuhan (1911-1980) received his PhD in English literature from Cambridge University and taught in the United States and Canada. He is best known, however, as the founding father of media studies. McLuhan was Director of the Center for Culture and Technology at the University of Toronto. Among his ground-breaking works on the psychic and social dimensions of communication technology are *The Gutenberg Galaxy* (1962); *Understanding Media: the Extensions of Man* (1964); and *The Medium Is the Massage: An Inventory of Effects* (1967). Michel Moos' premise is that Marshall McLuhan's importance derives from his achievements in rethinking the entire process of education and training itself, not with his popular fame as media guru, and he analyzes McLuhan's work from the feedback effect his vision continues to provide, rather than from the perspective of interpreting McLuhan's pronouncements on the electronic media. Moos contrasts McLuhan's thoughts with those of such thinkers as Roland Barthes, Fredric Jameson, Friedrich Kittler, Donna Haraway, and Deleuze and Guattari, and renders an updated account of the effect of the mass media on our society and ourselves. The concept the medium is the message is the hub around which Marshall McLuhan's explorations revolved. McLuhan's interests ranged from sixteenth-century literature to twentieth-century

business practices. With wit and literary flair, he reported the media's influence on society and on the individual. He concluded that we could not escape being transformed by the forces that are hidden deeply within the electronic telecommunications revolution of the sixties. For McLuhan, the new mediums of film, television, and the emerging realm of the digital were the modern equivalent of Gutenberg's printing press. Essays by M. McLuhan. Edited and with a Commentary by M.A. Moos.

A History of Christianity Owen Chadwick,1998-04-15 Presents a history of the Christian faith, from its beginning as a Jewish sect to the impact of twentieth-century issues such as birth control, Muslim fundamentalism, and Nazi racism.
