When Small Countries Crash Scott B. MacDonald,Andrew Novo,2017-07-28 The public is fascinated with financial crashes. Historians portray the roar of an angry mob toppling presidents or prime ministers and destroying the property of those who are regarded as malefactors. And certainly, financial crisis is often a factor in political change. It is often overlooked, but nonetheless significant that one of the major causes for the French Revolution was the poor state of finances, with the nation coming to bankruptcy. Large systemic financial crises create history. Various actors, big and small, become caught in the drama, contributing to it in their own special way. When Small Countries Crash seeks to capture some of the drama of financial collapses and their impact on small countries, which the authors define as populations under 10 million, generally 5-6 million. MacDonald and Novo have selected countries that have had a financial crisis in the national economy; that included key actors; and where access to reliable data is available. As the authors demonstrate, the story of small countries suffering the costs of financial missteps is long and painful. They argue that smaller economies tend to be more vulnerable to economic shocks, many of which are externally generated. Small economies confront particular challenges in terms of economies of scale, diversification, and depth of expertise and workforce. The chapters in this absorbing book focus on Iceland, Latvia, Ireland, the Caribbean, Scotland, Finland, and Albania. This in-depth study is unique in its close look at financial disasters in countries that have, until now, been overlooked.

Reframing health and health policy in Ireland Claire Edwards,Eluska Fernandez,2017-05-22 This edited collection is the first to apply the theoretical lens of post-Foucauldian governmentality to an analysis of health problems, practices, and policy in Ireland. Drawing on empirical examples related to childhood, obesity, mental health, smoking, ageing and others, the collection explores how specific health issues have been constructed as problematic and in need of intervention in the Irish State, and considers the strategies, discourses and technologies involved in the art of governing health in advanced liberal democracies. Bringing together academics from social policy, sociology, political science and public health, the text seeks to develop a dialogue about both the nature of health and health policy in the Ireland, but also how governmentality, as a theoretical approach, can contribute to the development of critical health policy analysis.

From Underdogs to Tigers Ashish Arora,Alfonso Gambardella,2005-03-03 In 1980 the Indian software industry was practically non-existent. By the 1990s the industry was one of the largest employers in manufacturing. Similar patterns of growth can be found in other emerging economies. So given that the software industry is commonly viewed as a high-tech industry, how is it that such spectacular growth has occurred in countries where high-tech industries would not seem likely to develop? This book examines the reasons behind this phenomenon, and asks whether it suggests a new model of economic development. The contributors explore the implications of the rise of these newcomers to the software market for the global industry, and whether there are things to be learnt about the role of human capital in economic growth, firm formation and capabilities, business and managerial models, and industry structure. Chapters include country studies on Brazil, China, India, Ireland, and Israel, and are complemented by cross-cutting chapters on some of the key issues highlighted by the growth patterns of software in these nations, most notably the role of the multinational companies, the globalization of the skilled worker flows, and the formation of firm capabilities. The novelty of the growth patterns in the regions that studied makes this book useful for understanding analytical and empirical issues underlying new microfoundations of economic growth in some emerging regions of the world.

Mediating Policy Kate Nicholls,2015-03-24 Amongst the most serious consequences of the 2008 global financial collapse and sovereign debt crisis were a series of unprecedented international bailouts for Greece, Ireland, and Portugal between 2010 and 2011. This book analyses the development policies of Greece, Ireland, and Portugal between 1990 and 2008, before the Eurozone crisis. It identifies national-level differences between the policy strategies and outcomes that have characterized recent developments in the Greek, Irish, and Portuguese political economies. In addition, it provides an explanation for these differences that takes into account variations in political institutions and state-society relations. In doing so, it locates an explanation for policy divergence in the presence or absence of the policy-making institutions and processes that make up a 'zone of mediation'. Overall, it argues there is significant variation in the extent to which Ireland, Portugal and Greece have adapted their developmental goals and strategies in order to address the labour market challenges posed by the post-industrial era. This book will be of key interest to students and scholars of European politics and studies, comparative political economy, public policy/policy studies, and democracy studies.

Consumer and SME Credit Law Nora Beausang,2021-12-16 With 2000+ pages of guidance, this important new textbook provides an extensive and in-depth guide to the current labyrinthine regulatory regime relating to consumer and SME credit (by way of cash loans) and protection generally, including the Consumer Protection Code, the Consumer Credit Act (housing loans and non-housing loans), the EU Consumer Credit Regulations, the EU Mortgage Credit Regulations and the Central Bank Housing Loan Regulations. Other lending-related conduct of business requirements are also covered in detail, including the Code of Conduct on Mortgage Arrears, the Lending to SME Regulations, the Code on Related Parties Lending and the Credit Reporting Act, together with applicable EBA/ECB Guidelines dealing with loan origination, product oversight and governance, non-performing exposures/loans and arrears. The regulated activities triggering authorisation as a retail credit firm or credit servicing firm are also addressed in detail. The book additionally extends beyond lending to have application to the wider business of regulated firms in the financial services arena, dealing in detail with issues including the general principles and requirements of the Consumer Protection Code,the fitness and probity regime including the area of minimum competency, distance marketing requirements and other background to the regulatory regime in Ireland including the increased regulatory focus on

the culture of regulated firms and product oversight and governance. The available redress/recourse mechanisms are also covered, including the Financial Services and Pensions Ombudsman, the Credit Review Office, the regulatory and other consequences of breach of applicable requirements and the significant risk management area for regulated firms of their customers' statutory right to redress on breach of financial services legislation. In addition, the book has relevance to professionals dealing with consumers in any contractual context including extensive treatment of how the concept of 'consumer' has developed under common law, the unfair commercial practices regime and the increasingly topical area of unfair contract terms legislation. Relevant case law of the Irish courts and other common law jurisdictions, together with an expanding corpus of decisions from the CJEU, are addressed in detail. This book's practical style is designed to assist bankers, other regulated firms, lawyers, compliance professionals and regulators in the application of a complex area. Rather than simply setting out the separate requirements, the book seeks to navigate the at times contradictory legislative and regulatory strands to give (in so far as is possible) a coherent sense of how they integrate. Much of the content is unique and cannot be found in any other publication. An essential addition to the library of every lender, practitioner and compliance and regulatory risk professional, particularly in the areas of consumer and SME credit.
