Governing States and Localities Kevin B. Smith,Alan Greenblatt,2013-12-19 In this Essentials Edition of Governing States and Localities, authors Kevin Smith and Alan Greenblatt retain the hallmarks of their bestselling introductory text by blending the latest scholarship with engaging journalistic writing, crisp storytelling, and class-tested pedagogy. Based on market feedback, the authors distilled core topics and cut out policy coverage some instructors do not have time to cover, but kept the ever-important finance chapter and a beautiful full-color interior design. This value-priced, ten-chapter text utilizes the comparative approach to ensure that students walk away from the course understanding how and why states and localities are both similar and different in institutional structure, culture, history, geography, economy, and demographics

The History of Mathematical Tables Martin Campbell-Kelly,Mary Croarken,Raymond Flood,Eleanor Robson,2003-10-02 The oldest known mathematical table was found in the ancient Sumerian city of Shuruppak in southern Iraq. Since then, tables have been an important feature of mathematical activity; table making and printed tabular matter are important precursors to modern computing and information processing. This book contains a series of articles summarising the technical, institutional and intellectual history of mathematical tables from earliest times until the late twentieth century. It covers mathematical tables (the most important computing aid for several hundred years until the 1960s), data tables (eg. Census tables), professional tables (eg. insurance tables), and spreadsheets - the most recent tabular innovation. The book is presented in a scholarly yet accessible way, making appropriate use of text boxes and illustrations. Each chapter has a frontispiece featuring a table along with a small illustration of the source where the table was first displayed. Most chapters have sidebars telling a short story or history relating to the chapter. The aim of this edited volume is to capture the history of tables through eleven chapters written by subject specialists. The contributors describe the various information processing techniques and artefacts whose unifying concept is the mathematical table.

(Circular E), **Employer's Tax Guide – Publication 15 (For Use in 2021)** Internal Revenue Service,2021-03-04 Employer's Tax Guide (Circular E) - The Families First Coronavirus Response Act (FFCRA), enacted on March 18, 2020, and amended by the COVID-related Tax Relief Act of 2020, provides certain employers with tax credits that reimburse them for the cost of providing paid sick and family leave wages to their employees for leave related to COVID-19. Qualified sick and family leave wages and the related credits for qualified sick and family leave wages are only reported on employment tax returns with respect to wages paid for leave taken in quarters beginning after March 31, 2020, and before April 1, 2021, unless extended by future legislation. If you paid qualified sick and family leave wages in 2021 for 2020 leave, you will claim the credit on your 2021 employment tax return. Under the FFCRA, certain employers with fewer than 500 employees provide paid sick and family leave to employees unable to work or telework. The FFCRA required such employers to provide leave to such employees after March 31, 2020, and before January 1, 2021. Publication 15 (For use in 2021)
