*Biology of Floral Scent* Natalia Dudareva,Eran Pichersky,2006-03-27 As with nearly all living creatures, humans have always been attracted and intrigued by floral scents. Yet, while we have been manufacturing perfumes for at least 5000 years to serve a myriad of religious, sexual, and medicinal purposes, until very recently, the limitation of our olfactory faculty has greatly hindered our capacity to clearly and ob

*Revelations in Air* Jude Stewart,2021-10-26 An extraordinary, strange, and startlingly beautiful exploration of smell, the least understood of our five senses The nose on your face is the Buckingham Palace Guard of your body, the maitre d' of all taste, as well as the seducer of your imagination, and memory—and Jude Stewart has charmed them all into a wicked, poetic and illuminating tour of their mysterious domains. —Jack Hitt, author of *Bunch of Amateurs* Overlapping with taste yet larger in scope, smell is the sense that comes closest to pure perception. Smell can collapse space and time, unlocking memories and transporting us to worlds both new and familiar. Yet as clearly as each of us can recognize different smells--the bright tang of citrus, freshly sharpened pencils, parched earth after rain--few of us understand how and why we smell. In *Revelations in Air*, Jude Stewart takes us on a fascinating journey into the weird and wonderful world of smell. Beginning with lessons on the incredible biology and history of how our noses work, Stewart teaches us how to use our noses like experts. Once we're properly equipped and ready to sniff, Stewart explores a range of smells—from lavender, cut grass and hot chocolate to cannabis and old books—using smell as a lens into art, history, science, and more. With an engaging colorful design and exercises for readers to refine their own skills, *Revelations in Air* goes beyond science or history or chemistry--it's a doorway into the surprising, pleasurable, and unfamiliar landscape of smell.

**The Book of Lost Fragrances** M. J. Rose,2012 A scintillating thriller of murder and secrets, lovers separated by time, and a mystical perfume that unlocks past lives ... Jac L'Etoile has always been haunted by the past, her memories infused with the exotic scents she grew up around as the heir to a storied French perfume company. Fleeing the pain of those remembrances - and the suicide of her mother - she's left the company in the hands of her brother Robbie. But when Robbie hints at an earth-shattering discovery in the family archives in Paris, and then suddenly goes missing - leaving a dead body in his wake - Jac is plunged into a world she thought she'd left behind. For the House of L'Etoile has been hiding a powerful secret since 1799: a scent that unlocks the mysteries of reincarnation. In the wrong hands, it's a perfume with a deadly power. However identifying the formula may be Jac's only chance to save her brother... THE BOOK OF LOST FRAGRANCES fuses history, passion and suspense in an intoxicating weave that moves from Cleopatra's Egypt and the terrors of revolutionary France to Tibet's battle with China and the glamour of modern-day Paris.

**Perspectives in Flavor and Fragrance Research** Philip Kraft,2005-05-30 It happened in Manchester, May 12-14, 2004. - For the fifth time since the early 1990's the Royal Society of Chemistry and the Society of the Chemical Industry jointly held their 'flavours & fragrances' conference, this time in the Manchester Conference Centre of the UMIST Manchester. The meeting saw over one hundred participants from one dozen countries, and was the largest of the series so far. In two and a half days divided into five sessions, twenty-five speakers from academia and industry alike presented their recent research results related to this exciting field, including Natural Products, Foods and Flavors, Perfumery and Olfaction, and last but not least Fragrance Chemistry. Research is more than ever central to the F&F industry with its constant demand for innovation and its frequently changing trends. Especially, in the classic and well-explored domains of musks and amber odorants fascinating new discoveries were made only very recently, which proves the endless possibilities in the search for new aroma chemicals. This was also reflected in the logo of the conference, which featured Ambrocenide? as a new powerful ambery odorant that emerged from classical cedrene chemistry - and it is as well reflected in four of the sixteen conference papers that are collected in this special issue of Chemistry & Biodiversity. With its focus on biorelevant chemicals, Chemistry & Biodiversity was predestined to publish the diverse highlight papers of the 'flavours & fragrances' conference. Fragrance and fragrance materials by definition elicit a biological response, serve as versatile signals, trigger the sense of smell and taste in various ways - and every odorant design is nothing more than 'chemistry probing nature'. But Fragrance Chemistry can also document and even preserve the biodiversity of scents, as was the topic of the lecture of Roman Kaiser, which had been published in advance as the first full paper of Chemistry & Biodiversity.

**The Scent of Desire** Rachel Herz,2007-10-09 Shakespeare wrote that a rose by any other name would smell as sweet. But if you cannot smell, does the rose lose its sweetness? The first and definitive book on the psychology of smell, The Scent of Desire traces the importance of smell in our lives, from nourishment to procreation to our relationships with the people closest to us and the world at large. Smell was the very first sense to evolve and is located in the same part of the brain that processes emotion, memory, and motivation. To our ancestors, the sense of smell wasn't just important, it was crucial to existence and it remains so today. Our emotional, physical, even sexual lives are profoundly shaped by both our reactions to and interpretations of different smells. Why do some people like a certain smell and others hate it? Is smell personal or cultural? How does smell affect our choices and our daily lives? Rachel Herz explores these questions and examines the role smell plays in our lives, and how this most essential of senses is imperative to our physical and emotional well-being. Herz investigates how our sense of smell functions, examines what purpose it serves, and shows how inextricably it is linked to our survival. She introduces us to people who have lost their ability to smell and shows how their experiences confirm this sense's importance by illuminating the traumatic effect its loss has on the quality of day-to-day living. Herz illustrates how profoundly scent and the sense of smell affect our daily lives with numerous examples and personal accounts based on her years of research. The wonders of our sense of smell are all explored in a compelling and engaging manner, from emotions and memory to aromatherapy and pheromones. For anyone who has ever wondered about human nature or been curious about the secrets of both the body and the mind, The Scent of Desire is a fascinating, down-to-earth tour of the psychology and biology of our most neglected sense, the sense of smell.
