### *Emerging Trends in Mobile Robotics* Hideo

Fujimoto, Mohammad O Tokhi, Hiromi Mochiyama, Gurvinder S

Virk, 2010-08-23 This book provides state-of-the-art scientific and engineering research findings and developments in the area of mobile robotics and associated support technologies. The book contains peer reviewed articles presented at the CLAWAR 2010 conference. Robots are no longer confined to industrial manufacturing environments. A great deal of interest is invested in the use of robots outside the factory environment. The CLAWAR conference series, established as a high profile international event, acts as a platform for dissemination of research and development findings and supports such a trend to address the current interest in mobile robotics to meet the needs of mankind in various sectors of the society. These include personal care, public health, and services in the domestic, public and industrial environments. The editors of the book have extensive research experience and publications in the area of robotics in general and in mobile robotics specifically, and their experience is reflected in editing the contents of the book.

Contents: Plenary Presentations Autonomous Robots Biologically-Inspired Systems and Solutions Co-Operative Robot System, Manipulation and Gripping Flexible Mechanisms and Manoeuvring Systems Innovative Design of CLAWAR Locomotion Modelling and Simulation of CLAWAR Parallel Kinematic Machines: Applications and Future Challenges Perception, Sensing and Actuation Personal Assistance Robots Planetary Exploration, Navigation, Positioning and Localization Planning, Control, Intelligence and Learning for CLAWAR Rehabilitation and Function Restoration Service Robots  
Readership: Systems and control engineers, electrical engineers, mechanical engineers in academic, research and industrial settings; engineers and practitioners in the public services sectors in the health care, manufacturing, supply and delivery services. **Mobile Cloud Visual Media Computing** Gang Hua,Xian-Sheng Hua,2015-11-23 This book explores the internet and mobile ecosystems which are powered by cloud computing - an essential, if not indispensable, part of our everyday lives. Billions of users world-wide use this technology for information sharing, communication and social networking and a high proportion of activity is driven by massive media content such as images, videos and other emerging 3D visual media. However, managing, searching and visualizing this gigantic amount of data to facilitate communication is difficult which has led to an influx of innovation and research in these areas. The research is from academics from all around the world, focusing on the intersection of mobile, cloud, visual and multimedia computing and is split into five clear parts. Topics covered in the book include mobile augmented reality, computational photography, mobile visual recognition and search, and human-computer interaction (HCI). The findings discussed is meant to spur on further creative development in both academia and industry within this area. Mobile Cloud Visual

Media Computing would of great interest to researchers and academics wishing to see how the state-of-the-art in media computing research is applied to innovative applications, whilst engineers and software designers from industry will gain an insight into the key set of technologies which support mobile and cloud media computing.

*International Conference on Mobile Computing and Sustainable Informatics* Jennifer S. Raj, 2020-11-30 Sustainability and mobile computing embraces a wide range of Information and Communication Technologies [ICT] in recent times. This book focuses more on the recent research and development works in almost all the facets of sustainable, ubiquitous computing and communication paradigm. The recent research efforts on this evolving paradigm help to advance the technologies for next-generation, where socio-economic growth and sustainability poses significant challenges to the computing and communication infrastructures. The main purpose of this book is to promote the technical advances and impacts of sustainability and mobile computing to the informatics research. The key strands of this book include green computing, predictive models, mobility, data analytics, mobile computing, optimization, Quality of Service [QoS], new communicating and computing frameworks, human computer interaction, Artificial Intelligence [AI], communication networks, risk management, Ubiquitous computing, robotics, smart city and applications. The book has also addressed myriad of sustainability challenges in various computing and information processing infrastructures.

Emotional Feedback for Mobile Devices Julia Seebode, 2015-03-30 This book investigates the functional

adequacy as well as the affective impression made by feedback messages on mobile devices. It presents an easily adoptable experimental setup to examine context effects on various feedback messages and applies it to auditory, tactile and auditory-tactile feedback messages. This approach provides insights into the relationship between the affective impression and functional applicability of these messages as well as an understanding of the influence of unimodal components on the perception of multimodal feedback messages. The developed paradigm can also be extended to investigate other aspects of context and used to investigate feedback messages in modalities other than those presented. The book uses questionnaires implemented on a Smartphone, which can easily be adopted for field studies to broaden the scope even wider. Finally, the book offers guidelines for the design of system feedback.

*Mobile Information Retrieval* Fabio Crestani, Stefano Mizzaro, Ivan Scagnetto, 2017-07-19 This book offers a helpful starting point in the scattered, rich, and complex body of literature on Mobile Information Retrieval (Mobile IR), reviewing more than 200 papers in nine chapters. Highlighting the most interesting and influential contributions that have appeared in recent years, it particularly focuses on both user interaction and techniques for the perception and use of context, which, taken together, shape much of today's research on Mobile IR. The book starts by addressing the differences between IR and Mobile IR, while also reviewing the foundations of Mobile IR research. It then examines the different kinds of documents, users, and information needs that can be found in Mobile IR, and which set it apart from standard IR. Next, it discusses the two important issues of user interfaces and context-awareness. In closing, it covers issues related to the evaluation of Mobile IR applications. Overall, the book offers a valuable tool, helping new and veteran researchers alike to navigate this exciting and highly dynamic area of research.

*Harmony Search and Nature Inspired Optimization Algorithms* Neha Yadav, Anupam Yadav, Jagdish Chand Bansal, Kusum Deep, Joong Hoon Kim, 2018-08-23 The book covers different aspects of real-world applications of optimization algorithms. It provides insights from the Fourth International Conference on Harmony Search, Soft Computing and Applications held at BML Munjal University, Gurgaon, India on February 7-9, 2018. It consists of research articles on novel and newly proposed optimization algorithms; the theoretical study of nature-inspired optimization algorithms; numerically established results of nature-inspired optimization algorithms; and real-world applications of optimization algorithms and synthetic benchmarking of optimization algorithms.

Technology and Adolescent Mental Health Megan A. Moreno, Ana Radovic, 2018-03-01 This comprehensive book

provides a framework for healthcare providers working with the dual challenges and opportunities presented by the intersection of mental health and technology. Technology and Adolescent Mental Health provides recent, evidence-based approaches that are applicable to clinical practice and adolescent care, with each chapter including a patient case illustrating key components of the chapter contents. Early chapters address the epidemiology of mental health, while the second section of the book deals with how both offline and online worlds affect mental health, presenting both positive and negative outcomes, and focusing on special populations of at-risk adolescents. The third section of the book focuses on technology uses for observation, diagnosis or screening for mental health conditions. The final section highlights promising future approaches to technology, and tools for improving intervention and treatment for mental health concerns and illnesses. This book will be a key resource for pediatricians, family physicians, internal medicine providers, adolescent medicine and psychiatry specialists, psychologists, social workers, as well as any other healthcare providers working with adolescents and mental health care.

*Mobile Web and Intelligent Information Systems* Muhammad Younas,Irfan Awan,Natalia Kryvinska,Christine Strauss,Do van Thanh,2016-08-10 This book constitutes the refereed proceedings of the 13th International Conference on Mobile Web and Intelligent Information Systems, MobiWIS 2016, held in Vienna, Austria, in August 2016. The 36 papers presented in this volume were carefully reviewed and selected from 98 submissions. They were organization in topical sections named: mobile Web - practice and experience; advanced Web and mobile systems; security of mobile applications; mobile and wireless networking; mobile applications and wearable devices; mobile Web and applications; personalization and social networks.
