Dr. H. Haedar Nashir, M.Si.

World-maps for Finding the Direction and Distance to Mecca David King, 2021-09-06 Two remarkable Iranian world-maps were discovered in 1989 and 1995. Both are made of brass and date from 17th-century Iran. Mecca is at the centre and a highly sophisticated longitude and latitude grid enables the user to determine the direction and distance to Mecca for anywhere in the world between Andalusia and China. Prior to the discovery of these maps it was thought that such cartographic grids were conceived in Europe ca. 1910. This richly-illustrated book presents an overview of the ways in which Muslims over the centuries have determined the sacred direction towards Mecca (qibla) and then describes the two world-maps in detail. The author shows that the geographical data derives from a 15th-century Central Asian source and that the mathematics underlying the grid was developed in 9th-century Baghdad.

Early Islamic Qiblas Dan Gibson, 2017 For the first time in history Dan Gibson has undertaken a comprehensive survey of Islamic mosques from the first two centuries of Islam. Using this data, Gibson demonstrates that Muhammad and the first four caliphs never knew of Mecca in Saudi Arabia. This book shatters old perspective about Islamic history and is unlocking the truth about Islam.

A Geography of Jihad Stephanie Zehnle, 2020-01-20 This book addresses the Jihad movement that created the largest African state of the 19th century: the Sokoto Caliphate, existing for 99 years from 1804 until its military defeat by European colonial troops in 1903. The author carves out the entanglements of jihadist ideology and warfare with geographical concepts at Africa's periphery of the Islamic world: geographical knowledge about the boundary between the "Land of Islam" and the "Land of War"; the pre-colonial construction of "the Muslim" and "the unbeliever"; and the transfer of ideas between political elites and mobile actors (traders, pilgrims, slaves, soldiers), whose reports helped shape new definitions of the African frontier of Islam. Research for this book is based on the study of a very wide range of Arabic and West African (Hausa, Fulfulde) manuscripts. Their policies reveal the persistent reciprocity of jihadist warfare and territorial

statehood, of Africa and the Middle East. Stephanie Zehnle is Assistant Professor (JProf) of Extra-European History at Kiel University (Christian-Albrechts-Universität). Her work on African and trans-continental history includes research on the history of Islam, human-animal relations, and comics in Africa.

Islamic Astronomy and Geography David A. King, 2022-02-13 This volume of 12 studies, mainly published during the past 15 years, begins with an overview of the Islamic astronomy covering not only sophisticated mathematical astronomy and instrumentation but also simple folk astronomy, and the ways in which astronomy was used in the service of religion. It continues with discussions of the importance of Islamic instruments and scientific manuscript illustrations. Three studies deal with the regional schools that developed in Islamic astronomy, in this case, Egypt and the Maghrib. Another focuses on a curious astrological table for calculating the length of life of any individual. The notion of the world centred on the sacred Kaaba in Mecca inspired both astronomers and proponents of folk astronomy to propose methods for finding the qibla, or sacred direction towards the Kaaba; their activities are surveyed here. The interaction between the mathematical and folk traditions in astronomy is then illustrated by an 11th-century text on the qibla in Transoxania. The last three studies deal with an account of the geodetic measurements sponsored by the Caliph al-Ma'mûn in the 9th century; a world-map in the tradition of the 11th-century polymath al-Bîrûnî, alas

corrupted by careless copying; and a table of geographical coordinates from 15th-century Egypt.

KaE ba Orientations O'Meara Simon O'Meara,2020-07-06 The most sacred site of Islam, the KaE ba (the granite cuboid structure at the centre of the Great Mosque of Mecca) is here investigated by examining six of its predominantly spatial effects: as the qibla (the direction faced in prayer); as the axis and matrix mundi of the Islamic world; as an architectural principle in the bedrock of this world; as a circumambulated goal of pilgrimage and site of spiritual union for mystics and Sufis; and as a dwelling that is imagined to shelter temporarily an animating force; but which otherwise, as a house, holds a void.

The Oxford History of Islam John L. Esposito,2000-04-06 Lavishly

illustrated with over 300 pictures, including more than 200 in full color, The Oxford History of Islam offers the most wide-ranging and authoritative account available of the second largest--and fastest growing--religion in the world. John L. Esposito, Editor-in-Chief of the four-volume Oxford Encyclopedia of the Modern Islamic World, has gathered together sixteen leading scholars, both Muslim and non-Muslim, to examine the origins and historical development of Islam--its faith, community, institutions, sciences, and arts. Beginning in the pre-Islamic Arab world, the chapters range from the story of Muhammad and his Companions, to the development of Islamic religion and culture and the empires that grew from it, to the influence that Islam has on today's world. The book covers a wide array of subjects, casting light on topics such as the historical encounter of Islam and Christianity, the role of Islam in the Mughal and Ottoman empires, the growth of Islam in Southeast Asia, China, and Africa, the political, economic, and religious challenges of European imperialism in the nineteenth and twentieth centuries, and Islamic communities in the modern Western world. In addition, the book offers excellent articles on Islamic religion, art and architecture, and sciences as well as bibliographies. Events in the contemporary world have led to an explosion of interest and scholarly work on Islam. Written for the general reader but also appealing to specialists, The Oxford History of Islam offers the best of that recent scholarship, presented in a readable style and complemented by a rich variety of illustrations.

Muhammadiyah a Reform Movement Dr. H. Haedar Nashir, M.Si., 2015 Basically, Muhammadiyah is a reform movement. The movement of Tadjid fil-Islam. The most profound essence of the Islamic movement established by Kyai Haji Ahmad Dahlan is the flame of reform/renewal. This characteristic is more prominent than other characteristics. Theology, ideology, and action model of Muhammadiyah are renewal leading to Islamic modernism or reformism. Those reform endeavors are actualized to break the stagnation of ummah by fostering a progressive Islamic teachings. In addition, Muhammadiyah has pioneered the system of modern Islamic education, health, and social services, community empowerment through Al-Ma'un movement, women's movement in the public through 'Aisyiyah, and reform works which revive the advancement of Islamic world and modernization of civil life. This reform is departed from the theme of al-ruju ila al-Qur'an wa al-Sunnah, namely a return to the Qur'an and the Prophet's Sunnah. The endeavours of purification of Islam to pursue the authentic teachings, as well as to establish a progressive Islam. Despite it

frequently assumed to be ad-hoc, the span of twentieth century Muhammadiyah reform is a breakthrough. In the advance, directly and indirectly, it has been a state of mind for the majority of Muslim in Indonesia, including the previous oppositions.

Finding Mecca in America Mucahit Bilici,2012-12-18 The events of 9/11 had a profound impact on American society, but they had an even more lasting effect on Muslims living in the United States. Once practically invisible, they suddenly found themselves overexposed. By describing how Islam in America began as a strange cultural object and is gradually sinking into familiarity, *Finding Mecca in America* illuminates the growing relationship between Islam and American culture as Muslims find a homeland in America. Rich in ethnographic detail, the book is an up-close account of how Islam takes its American shape. In this book, Mucahit Bilici traces American Muslims' progress from outsiders to natives and from immigrants to citizens. Drawing on the philosophies of Simmel and Heidegger, Bilici develops a novel sociological approach and offers insights into the civil rights activities of Muslim Americans, their increasing efforts at interfaith dialogue, and the recent phenomenon of Muslim ethnic comedy. Theoretically sophisticated, *Finding Mecca in America* is both a portrait of American Islam and a groundbreaking study of what it means to feel at home.
