Architecture and Ugliness Wouter Van Acker,Thomas Mical,2020-01-09 Whatever 'ugliness' is, it remains a problematic category in architectural aesthetics – alternately vilified and appropriated, used either to shock or to invert conventions of architecture. This book presents sixteen new scholarly essays which rethink ugliness in recent architecture – from Brutalism to eclectic postmodern architectural productions – and together offer a diverse reappraisal of the history and theory of postmodern architecture and design. The essays address both broad theoretical questions on ugliness and postmodern aesthetics, as well as more specific analyses of significant architectural examples dating from the last decades of the twentieth century. The book attends to the diverse relations between the aesthetic register of ugliness and closely connected aesthetic concepts such as the monstrous, the ordinary, disgust, the excessive, the grotesque, the interesting, the impure and the sublime. This volume does not simply document the history of a postmodern anti-aesthetic through case studies. Instead, it aims to shed light on aesthetic problems that have been largely overlooked in the agenda of architectural theory. This book answers in detail the questions: How did postmodern architects appropriate troublesome contradictions bound to the raw ugliness of the real? How have the ugly and the antiaesthetic been a productive force in postmodern architecture? How can ugliness be of value to architecture? And how can architecture make good use of ugliness?

Made in Italy Grace Lees-Maffei,Kjetil Fallan,2013-11-21 Goods made or designed in Italy enjoy a profile which far outstrips the country's modest manufacturing output. Italy's glorious design heritage and reputation for style and innovation has 'added value' to products made in Italy. Since 1945, Italian design has commanded an increasing amount of attention from design journalists, critics and consumers. But is Italian design a victim of its own celebrity? Made in Italy brings together leading design historians to explore this question, discussing both the history and significance of design from Italy and its international influence. Addressing a wide range of Italian design fields, including car design, graphic design, industrial and interior design and ceramics, well-known designers such as Alberto Rosselli and Ettore Sottsass, Jr. and iconic brands such as Olivetti, Vespa and Alessi, the book explores the historical, cultural and social influences that shaped Italian design, and how these iconic designs have contributed to the modern canon of Italian-inspired goods.

Your Brain on Art Susan Magsamen,Ivy Ross,2023-03-21 NEW YORK TIMES BESTSELLER • A life-altering journey through the science of neuroaesthetics, which offers proof for how our brains and bodies transform when we participate in the arts—and how this knowledge can improve our health, enable us to flourish, and build stronger communities. “This book blew my mind!”—Angela Duckworth, #1 New York Times bestselling author of Grit Many of us think of the arts as entertainment—a luxury of some kind. In Your Brain on Art, authors Susan Magsamen and Ivy Ross show how activities from painting and dancing to expressive writing, architecture, and more are essential to our lives. We’re on the verge of a cultural shift in which the arts can deliver potent, accessible, and proven solutions for the well-being of everyone. Magsamen and Ross offer compelling research that shows how engaging in an art project for as little as forty-five minutes reduces the stress hormone cortisol, no matter your skill level, and just one art experience per month can extend your life by ten years. They expand our understanding of how playing music builds cognitive skills and enhances learning; the vibrations of a tuning fork create sound waves to counteract stress; virtual reality can provide cutting-edge therapeutic benefit; and interactive exhibits dissolve the boundaries between art and viewers, engaging all of our senses and strengthening memory. Doctors have even been prescribing museum visits to address loneliness, dementia, and many other physical and mental health concerns. Your Brain on Art is a portal into this new understanding about how the arts and aesthetics can help us transform traditional medicine, build healthier communities, and mend an aching planet. Featuring conversations with artists such as David Byrne, Renée Fleming, and evolutionary biologist E. O. Wilson, Your Brain On Art is an authoritative guide to neuroaesthetics. The book weaves a tapestry of breakthrough research, insights from multidisciplinary pioneers, and compelling stories from people who are using the arts to enhance their lives.

Trade Shows in the Globalizing Knowledge Economy Harald Bathelt,Francesca Golfetto,Diego Rinallo,2014-07-17 This book presents a radically innovative view on trade shows as knowledge-rich places, where firms learn through observation and interaction with other economic actors, and as enablers, rather than mere consequences, of globalization. Traditionally seen as marketing tools, trade shows are conceptualised as temporary clusters that facilitate the creation and diffusion of knowledge across geographical distances, even in the age of social media. The book is organized in four parts. Part I lays out the conceptual foundations of the knowledge-based perspective, from the early development of trade fairs to modern-day events. Part II analyses specific global developments, focussing on the trade show ecologies of Europe, North America, and the Asia-Pacific region. Part III investigates differences in the nature of knowledge generation practices across international hub shows, exports shows, and import shows in different industries, and investigates competition between such events. Part IV discusses the implications of a knowledge-based conceptualisation of trade shows. The book will be of interest to scholars and students in economic geography, management, marketing, organization studies, political science, and sociology. It also has practical implications for trade show organisers on how to make their events more competitive through knowledge-based strategies; for industry associations and cities, on how to use these events for collective/place marketing purposes; and for policy makers, on how to use trade shows for export promotion and innovation policies.

Moving Objects Damon Taylor,2020-09-17 Moving Objects deals with emotive design: designed objects that demand to be engaged with rather than simply used. If postmodernism depended upon ironic distance, and Critical Design is all about questions, then emotive design runs hotter than this, confronting how designers are using feelings in what they make. Damon Taylor's original study considers these emotionally laden, highly authored works, often produced in limited editions and sold like art – objects such as a chair made from cuddly toys, a leather sofa that resembles a cow, and a jewellery box fashioned from human hair. Tracing the phenomenon back to the 'Dutch inflection' that began with Droog designers like Jurgen Bey and Hella Jongerius, Taylor conducts an analysis of the development of Design Art and looks for its origins in the uncanny explorations of surrealism. Offering a critique of Speculative Design, and an examination of the work of designers such as Mathias Bengtsson, whose work involves 'growing' furniture inside computers, Taylor asks what happens when the tangible melts into the datascape and design becomes a question of mobilities. In this way, Moving Objects examines contemporary issues of how we live with artefacts and what design can do.
