Making It Big Andrea Ciani,Marie Caitriona Hyland,Nona

Karalashvili,Jennifer L. Keller,Trang Thu Tran,2020-10-08 Economic and social progress requires a diverse ecosystem of firms that play complementary roles. Making It Big: Why Developing Countries Need More Large Firms constitutes one of the most up-to-date assessments of how large firms are created in low- and middle-income countries and their role in development. It argues that large firms advance a range of development objectives in ways that other firms do not: large firms are more likely to innovate, export, and offer training and are more likely to adopt international standards of quality, among other contributions. Their particularities are closely associated with productivity advantages and translate into improved outcomes not only for their owners but also for their workers and for smaller enterprises in their value chains. The challenge for economic development, however, is that production does not reach economic scale in low- and middle-income countries. Why are large firms scarcer in developing countries? Drawing on a rare set of data from public and private sources, as well as proprietary data from the International Finance Corporation and case studies, this book shows that large firms are often born large-or with the attributes of largeness. In other words, what is distinct about them is often in place from day one of their operations. To fill the “missing top†? of the firm-size distribution with additional large firms, governments should support the creation of such firms by opening markets to greater competition. In low-income countries, this objective can be achieved through simple policy reorientation, such as breaking oligopolies, removing unnecessary restrictions to international trade and

investment, and establishing strong rules to prevent the abuse of market power. Governments should also strive to ensure that private actors have the skills, technology, intelligence, infrastructure, and finance they need to create large ventures. Additionally, they should actively work to spread the benefits from production at scale across the largest possible number of market participants. This book seeks to bring frontier thinking and evidence on the role and origins of large firms to a wide range of readers, including academics, development practitioners and policy makers.

*The Future of Affirmative Action* Richard D. Kahlenberg, 2014 As the United States experiences dramatic demographic change--and as our society's income inequality continues to rise--promoting racial, ethnic, and economic inclusion at selective colleges has become more important than ever. At the same time, however, many Americans--including several members of the U.S. Supreme Court--are uneasy with explicitly using race as a factor in college admissions. The Court's decision in *Fisher v. University of Texas* emphasized that universities can use race in admissions only when necessary, and that universities bear the ultimate burden of demonstrating, before turning to racial classifications, that available, workable race-neutral alternatives do not suffice. With race-based admission programs increasingly curtailed, *The Future of Affirmative Action* explores race-neutral approaches as a method of promoting college diversity after *Fisher* decision. The volume suggests that *Fisher* might on the one hand be a further challenge to the use of racial criteria in admissions, but on the other presents a new opportunity to tackle, at long last, the burgeoning economic divisions in our system of higher education, and in society as a whole. *Naturalizing Inequality* Michela Marcatelli, 2021-10-05 More than twenty-five years after the end of apartheid, water access remains a striking reminder of racial inequality in South Africa. This book compellingly argues that in the post-apartheid period inequality has not only been continuously reproduced but also legitimized. Michela Marcatelli unravels this inequality paradox through an ethnography of water in a rural region of the country. The Waterberg Plateau is a space where agriculture, conservation, and extraction coexist and intersect. Marcatelli examines the connections between neoliberalism, race, and the environment by showing that racialized property relations around water and land are still recognized and protected by the post-apartheid state to sustain green growth. She argues that the government depicts growth as the best, if not only, solution to inequality. While white landowners maintain access to water, however, black ex-farmworkers are dispossessed once again of this essential-to-life resource. If the promise of

growth serves to normalize inequality, the call to save nature has the effect of naturalizing it even further.

**Against Global Apartheid** Patrick Bond,2003 In 'Against Global Apartheid', Patrick Bond reveals the extent of the economic and human damage caused by policies implemented by World Bank and the IMF in developing countries, particularly South Africa, and argues that there is another way to more socially just economic development.

South Africa Pushed to the Limit Hein Marais,2013-07-04 Since 1994, the democratic government in South Africa has worked hard at improving the lives of the black majority, yet close to half the population lives in poverty, jobs are scarce, and the country is more unequal than ever. For millions, the colour of people's skin still decides their destiny. In his wide-ranging, incisive and provocative analysis, Hein Marais shows that although the legacies of apartheid and colonialism weigh heavy, many of the strategic choices made since the early 1990s have compounded those handicaps. Marais explains why those choices were made, where they went awry, and why South Africa's vaunted formations of the left -- old and new -- have failed to prevent or alter them. From the real reasons behind President Jacob Zuma's rise and the purging of his predecessor, Thabo Mbeki, to a devastating critique of the country's continuing AIDS crisis, its economic path and its approach to the rights and entitlements of citizens, South Africa Pushed to the Limit presents a riveting benchmark analysis of the incomplete journey beyond apartheid.

**Integrated Water Resources Management in Practice** Roberto Lenton, Mike Muller, 2012-08-21 Better water management will be crucial if we are to meet many of the key challenges of this century – feeding the world's growing population and reducing poverty, meeting water and sanitation needs, protecting vital ecosystems, all while adapting to climate change. The approach known as Integrated Water Resources Management (IWRM) is widely recognized as the best way forward, but is poorly understood, even within the water sector. Since a core IWRM principle is that good water management must involve the water users, the understanding and involvement of other sectors is critical for success. There is thus an urgent need for practical guidance, for both water and development professionals, based on real world examples, rather than theoretical constructs. That is what this book provides. Using case studies, the book illustrates how better water management, guided by the IWRM approach, has helped to meet a wide range of sustainable development goals. It does this by considering practical examples, looking at how IWRM has contributed, at different scales, from very local, village-level experiences to reforms at national level and beyond to cases involving trans-boundary river basins. Using these on-the-ground experiences, from both developed and developing countries in five continents, the book provides candid and practical lessons for policy-makers, donors, and water and development practitioners worldwide, looking at how IWRM principles were applied, what worked, and, equally important, what didn't work, and why. The Elite Transition Patrick Bond, 2000-02-20 In *Elite Transition*, Patrick Bond examines the economic and social compromises that have been, and are

being, made between the past and present powers in South Africa. A former adviser to the ANC, Bond investigates how groups such as the ANC went from being a force of liberation for all people to a vehicle now perceived as serving the economic interests of an elite few. Bond covers a range of socioeconomic factors under both the old and new South Africa, highlighting the reasons for the transition's 'development' failure and drawing on case studies on key issues: social contracts, black economic empowerment, housing and corporate power. He explores the idea that progressive policymaking is being compromised by the new petit bourgeoisie and ruling elite, and assesses the view that, as change slows down, official policy is increasingly one of lower expectations.

Semiperipheral States in the World-Economy William Martin, 1990-11-26

William G. Martin's *Semiperipheral States in the World-Economy* diverges sharply from past international labor division interpretations of semiperipheral development. Martin emphasizes the importance of each country's individual conditions. Linking each example, however, is the theory that there is a relatively rare set of conditions that make economic, political, and social advancement of the semiperipheral states successful or even possible. Martin and the contributing writers present the thesis that mobility of semiperipheral states to the core world-economy is a very rare phenomenon. Indeed, they even go so far as to suggest that it is the very set of social and institutional ruptures that were necessary to achieve semiperipheral status which often create the social and political forces that prevent any further advance. Economic pressure from core nations and intense competition within the semiperiphery are cited as being foremost among these

factors. Such general topics occupy the first few chapters of the book, while the later chapters examine specific semiperipheral countries in depth. The final interpretation provides a better understanding of this segment of the world-economy and of the transformational possibilities of the capitalist world itself. Students of both world-economy and the social and political conditions of the semiperiphery will find this an invaluable study.

**Women's Property Rights HIV and AIDS & Domestic Violence** Human Sciences Research Council, International Center for Research on Women, 2008 Revealing how women in many developing countries do not have the right to own or inherit property, this monograph clarifies the role of tenure security in protecting against and mitigating the effects of HIV amongst women and domestic violence. Exploring these linkages in Amajuba, South Africa, and Iganga, Uganda, this qualitative work based on peer-reviewed scientific studies and personal interviews with native women argues that property ownership, while not easily linked to women's ability to prevent HIV infection, can nonetheless mitigate the impact of AIDS and enhance a woman's ability to leave a violent situation. An invaluable resource for policymakers, western donors, nongovernmental organization workers, and academics, this analysis details the current land reform efforts as well as HIV/AIDS and domestic-violence policies in both countries, in Africa as a whole, and beyond.

**Season of Hope** Alan Hirsch, Sally Hines, 2005 Offers an insight into the circumstances under which the policies were developed, implemented and reviewed, as well as a study of the outcomes. This book addresses questions such as: How could an organisation with no previous experience of governing accomplish a peaceful transition to democracy? How did they do it and where

are they going?

**Debates of the House of Assembly** South Africa. Parliament. House of Assembly,

From Memory to Marble Elizabeth Rankin, Rolf Michael Schneider, 2020-02-10  
For the first time, the 92-metre frieze of the Voortrekker Monument in Pretoria, one of the largest historical narratives in marble, has been made the subject of a book. The pictorial narrative of the Boer pioneers who conquered South Africa's interior during the 'Great Trek' (1835-52) represents a crucial period of South Africa's past. Conceptualising the frieze both reflected on and contributed to the country's socio-political debates in the 1930s and 1940s when it was made. The book considers the active role the Monument played in the rise of Afrikaner nationalism and the development of apartheid, as well as its place in post-apartheid heritage. The frieze is unique in that it provides rare evidence of the complex processes followed in creating a major monument. Based on unpublished documents, drawings and models, these processes are unfolded step by step, from the earliest discussions of the purpose and content of the frieze, through all the stages of its design, to its shipping to post-war Italy to be copied into marble from Monte Altissimo, up to its final installation in the Monument. The book examines how visual representation transforms historical memory in what it chooses to recount, and the forms in which it is depicted. The second volume expands on the first, by investigating each of the twenty-seven scenes of the frieze in depth, providing new insights into not only the frieze, but also South Africa's history. François van Schalkwyk of African Minds, co-publisher with De Gruyter writes: *From Memory to Marble* is an open access monograph in the true sense of the word. Both volumes of the digital

version of the book are available in full and free of charge from the date of publication. This approach to publishing democratises access to the latest scholarly publications across the globe. At the same time, a book such as *From Memory to Marble*, with its unique and exquisite photographs of the frieze as well as its wealth of reproduced archival materials, demands reception of a more traditional kind, that is, on the printed page. For this reason, the book is likewise available in print as two separate volumes. The printed and digital books should not be seen as separate incarnations; each brings its own advantages, working together to extend the reach and utility of *From Memory to Marble* to a range of interested readers. For more material you can browse at Stanford's database Voortrekker Monumentality: a digital archive.

**Enforcing Competition Rules in South Africa** David Lewis, 2013-01-01 This fascinating book describes and analyses the development of competition law in South Africa, promoting a deeper understanding of the development of this foundational economic law within its specific national, social and economic context. *Enforcing Competition Rules in South Africa* is a clear and insightful account of the establishment and first decade of one of the most successful competition law institutions to have mushroomed over the past 15 years. David Lewis believes that, while there is much to learn from international scholarship and jurisprudence and from participation in the various multinational initiatives in this field, competition law and its institutions have to be understood within their national economic and social contexts. Drawing strongly on case law and enforcement experiences, this book will appeal to academics, researchers and practitioners of competition law and economics.
