Introduction to International Relations Richard W. Mansbach, Kirsten L. Taylor, 2007-09-12 Leading Australian scholars introduce a range of theories, actors, issues, institutions and processes that animate international relations today.

Imperialism and War V. I. Lenin, Nikolai Bukharin, 2017-10-19 Here, with critical notes and context, are V.I. Lenin's Imperialism: The Highest Stage of Capitalism and Nikolai Bukharin's Imperialism and World Economy. They are both essential for understanding the nature of imperialism and war historically—and today. V.I. Lenin (1870–1924) was a leader of the Russian Revolution and wrote extensively on the issues facing the working-class movement of his time. Nikolai Bukharin (1888–1938) was a Bolshevik leader and intellectual, and later a Soviet politician until his execution at the hands of Stalin's government. Phil Gasper is a professor of philosophy at Notre Dame de Namur University in California. He writes extensively on politics and the philosophy of science and is a frequent contributor to CounterPunch. He is the author of Haymarket Books' The Communist Manifesto: A Road Map to History's Most Important Political Document.

Inventing the Future Nick Srnicek, Alex Williams, 2015-11-17 A major new manifesto for the end of capitalism Neoliberalism isn't working. Austerity is forcing millions into poverty and many more into precarious work, while the left remains trapped in stagnant political practices that offer no respite. Inventing the Future is a bold new manifesto for life after capitalism. Against the confused understanding of our high-tech world by both the right and the left, this book claims that the emancipatory and future-oriented possibilities of our society can be reclaimed. Instead of running from a complex future, Nick Srnicek and Alex Williams demand a postcapitalist economy capable of advancing standards, liberating humanity from work and developing technologies that expand our freedoms. This new edition includes a new chapter where they respond to their various critics.

Black Power Salute Danielle Smith-Llera, 2017-01-01 Two American athletes made history at the 1968 Summer Olympics, but not on the track. They staged a silent protest against racial injustice. Tommie Smith and John Carlos, gold and bronze medalists in the 200-meter sprint, stood with heads bowed and black-gloved fists raised as the national anthem played during the medal ceremony. The Australian silver medalist wore a human rights badge in support. All three would pay a heavy price for their activism. A Life magazine photograph seen by millions would ensure that the silent protest was remembered, and eventually admired, as a symbol of the battle for equality and civil rights.

Beyond the Welfare State Sirvan Karimi, 2017-01-01 In Beyond the Welfare State, Sirvan Karimi utilizes a synthesis of Marxian class analysis and the power resources model to provide an analytical foundation for the divergent pattern of public pension systems in Canada and Australia.

The Anarchist Roots of Geography Simon Springer, 2016-08-01 The Anarchist Roots of Geography sets the stage for a radical politics of possibility and freedom through a discussion of the insurrectionary geographies that suffuse our daily experiences. By embracing anarchist geographies as kaleidoscopic spatialities that allow for nonhierarchical connections between autonomous entities, Simon Springer configures a new political imagination. Experimentation in and through space is the story of humanity's place on the planet, and the stasis and control that now supersede ongoing organizing experiments are an affront to our survival. Singular ontological modes that favor one particular way of doing things disavow geography by failing to understand the spatial as a mutable assemblage intimately bound to temporality. Even worse, such stagnant ideas often align to the parochial interests of an elite minority and thereby threaten to be our collective undoing. What is needed is the development of new relationships with our world and, crucially, with each other. By infusing our geographies with anarchism we unleash a spirit of rebellion that foregoes a politics of waiting for change to come at the behest of elected leaders and instead engages new possibilities of mutual aid through direct action now. We can no longer accept the decaying, archaic geographies of hierarchy that chain us to statism, capitalism, gender domination, racial oppression, and imperialism. We must reorient geographical thinking towards anarchist horizons of possibility. Geography must become beautiful, wherein the entirety of its embrace is aligned to emancipation.

The US Middle East Policy In Post 9/11 Era Mukhtar Ahmad Bhat, 2020-01-01 Middle East the mother of civilisations is one of the very few regions of global politics which have remained the hot spots and orbits around which the global power game revolved uninterruptedly. In beginning it was due to its geopolitical location as it is at the crossroads and a trade link between big Asian, African and European countries turned the region into a trade hub. Then the life changing discoveries of natural resources, particularly of oil and gas in the region as well as the industrial revolution in other parts of the world increased strategic importance of the region at the global level. The adoption of policy of securing control over the resources by global powers gave new shape to the political structure and configuration, like disintegration of Ottoman Empire and creation of new political entities in the region. In addition to that the break out of the First and Second World Wars, creation of Israel as well as the emergence of the Cold War are such events that transformed the region into a battle ground for the global super powers which ended at the collapse of the USSR in 1992 and emergence of the US as the dominant global power. No doubt after the emergence of uni-polar global order, the region saw a phase of peace and end of the war gaming on the part of the big powers but the US continued to dominate the regional political structure. During the same period the region also experienced one of the toughest periods of inter-state wars, first the decade long Iraq-Iran war and then the Iraqi invasion of Kuwait which added more fuel to the already increasing division and hatred among the regional countries.

On the Question of Truth in the Era of Trump , 2020-04-28 Utilizes critical theory perspectives to examine the construction of truth and relativism with a focus on the role of the media in the wake of the 2016 election.

Extracting Profit Lee Wengraf, 2018-02-19 Extracting profit explains why Africa, in the first decade and a half of the twenty-first century, has undergone an economic boom. This period of "Africa rising" did not lead to the creation of jobs but has instead fueled the growth of the extraction of natural resources and an increasingly-wealthy African ruling class.

Why Occupy a Square? Jeroen Gunning, Ilan Zvi Baron, 2014-01-10 On 25 January 2011, tens of thousands of Egyptians came out on the streets to protest against emergency rule and police brutality. Eighteen days later, Mubarak, one of the longest sitting dictators in the region, had gone. How are we to make sense of these events? Was this a revolution, a revolutionary moment? How did the protests come about? How were they able to outmaneuver the police? Was this really a 'leaderless revolution,' as so many pundits claimed, or were the demonstrations an outgrowth of the protest networks that had developed over the past decade? Why did so many people with no history of activism participate? What role did economic and systemic crises play in creating the conditions for these protests to occur? Was this really a Facebook revolution? Why Occupy a Square? is a dynamic exploration of the shape and timing of these extraordinary events, the players behind them, and the tactics and protest frames they developed. Drawing on social movement theory, it traces the interaction between protest cycles, regime responses and broader structural changes over the past decade. Using theories of urban politics, space and power, it reflects on the exceptional state of non-sovereign politics that developed during the occupation of Tahrir Square.

Routledge Handbook of Sport and Politics Alan Bairner, John Kelly, Jung Woo Lee, 2016-10-04 Sport is frequently considered to be an aspect of popular culture that is, or should be, untainted by the political. However, there is a broad consensus among academics that sport is often at the heart of the political and the political is often central to sport. From the 1936 Olympic Games in Nazi Germany to the civil unrest that preceded the 2014 World Cup in Brazil, sport and politics have remained symbiotic bedfellows. The Routledge Handbook of Sport and Politics goes further than any other book in surveying the complex, embedded relationships between sport and politics. With sections addressing ideologies, nation and statehood, corporate politics, political activism, social justice, and the politics of sports events, it introduces the conceptual

foundations that underpin our understanding of the sport-politics nexus and examines emergent issues in this field of study. Including in-depth case studies from North America, South America, Europe, the Middle East, Africa and Asia, this is an essential reference for anybody with an interest in the social scientific study of sport.

The Politics and Culture of Modern Sports Sheldon Anderson,2015-12-15 This study examines the role of modern sports in constructing national identities and the way leaders have exploited sports to achieve domestic and foreign policy goals. It focuses on the development of national sporting cultures in Great Britain and the United States, how the rest of Europe and the world adopted or rejected their games, and the impact of sports on politics.

The Black Jacobins Nick Broten,2017-07-05 Today we take it for granted that history is much more than the story of great men and the elites from which they spring. Other forms of history – the histories of gender, class, rebellion and nonconformity – add much-needed context and color to our understanding of the past. But this has not always been so. In CLR James’s *The Black Jacobins*, we have one of the earliest, and most defining, examples of how ‘history from below’ ought to be written. James's approach is based on his need to resolve two central problems: to understand why the Haitian slave revolt was the only example of a successful slave rebellion in history, and also to grasp the ways in which its history was intertwined with the history of the French Revolution. The book's originality, and its value, rests on its author's ability to ask and answer productive questions of this sort, and in the creativity with which he proved able to generate new hypotheses as a result. As any enduring work of history must be, *The Black Jacobins* is rooted in sound archival research – but its true greatness lies in the originality of James's approach.

The End of Imagination Arundhati Roy,2016-08-29 Five books of essays in one volume from the Booker Prize-winner and “one of the most ambitious and divisive political essayists of her generation” (The Washington Post). With a new introduction by Arundhati Roy, this new collection begins with her pathbreaking book *The Cost of Living*—published soon after she won the Booker Prize for her novel *The God of Small Things*—in which she forcefully condemned India’s nuclear tests and its construction of enormous dam projects that continue to displace countless people from their homes and communities. *The End of Imagination* also includes her nonfiction works *Power Politics*, *War Talk*, *Public Power in the Age of Empire*, and *An Ordinary Person’s Guide to Empire*, which include her widely circulated and inspiring writings on the US invasions of Afghanistan and Iraq, the need to confront corporate power, and the hollowing out of democratic institutions globally. Praise for Arundhati Roy “The fierceness with which Arundhati Roy loves humanity moves my heart.” —Alice Walker, Pulitzer Prize-winning author and recipient of the LennonOno Grant for Peace Award “Arundhati Roy combines her brilliant style as a novelist with her powerful commitment to social justice in producing these eloquent, penetrating essays.” —Howard Zinn, author of *Political Awakenings* and *Indispensable Zinn* “Arundhati Roy is incandescent in her brilliance and her fearlessness. And in these extraordinary essays—which are clarions for justice, for witness, for a true humanity—Roy is at her absolute best.” —Junot Díaz, author of the Pulitzer Prize-winning *The Brief Wondrous Life of Oscar Wao* “One of the most confident and original thinkers of our time.” —Naomi Klein, author of *No Is Not Enough* and *The Battle For Paradise* “Arundhati Roy calls for ‘factual precision’ alongside of the ‘real precision of poetry.’ Remarkably, she combines those achievements to a degree that few can hope to approach.” —Noam Chomsky, leading public intellectual and author of *Hopes and Prospects* “India’s most impassioned critic of globalization and American influence.” —The New York Times

Comparative Just War Theory Luis Cordeiro-Rodrigues,Danny Singh,2019-11-15 Widespread cross-cultural and cross-ideological agreement on the justifiable limits of war has become an increasingly complex yet vital element of global peace and conflict policies. Luís Cordeiro-Rodrigues and Danny Singh bring together a truly international cohort of philosophers, ethicists, political scientists, criminologists, sociologists, and other scholars to address the morality of war from a comparative perspective. While conceptions of when to enter war (*jus ad bellum*) and how to fight war (*jus in bello*) have been well researched in Western liberal contexts, non-Western philosophies have been largely excluded from debate. This volume seeks to correct that imbalance by addressing concrete examples alongside concepts of Confucian Yi/Rightness, Ahimsa, feminism, class struggles, Ubuntu, anarchism, pacifism, Buddhism, Islam, Jihad, among others. *Comparative Just War Theory* provides a global conceptual framework to deal with the morality of war in our modern world. With fresh insights into how the normative problems that arise from just war can be addressed, the book will be a valuable resource for a wide variety of students, scholars, and policymakers.

Buildings and Power Thomas A. Markus,2013-06-17 The material and cultural world in which we now live perhaps represents the end of a process created out of the Enlightenment and the Industrial Revolution. The battles fought over class, ideology and language are represented most clearly in the explosion of new building types during the Century of Revolutions. Lavishly illustrated with photographs, drawings, maps and plans, *Buildings and Power* analyses architectural form, function and space to explore the reproduction and the subversion of power in the modern city.

Anatomy of the Slasher Film Sotiris Petridis,2019-05-10 The term slasher film was common parlance by the mid-1980s but the horror subgenre it describes was at least a decade old by then--formerly referred to as stalker, psycho or slice-'em-up. Examining 74 movies--from *The Texas Chainsaw Massacre* (1974) to *Texas Chainsaw 3D* (2013)--the author identifies the characteristic elements of the subgenre while tracing changes in narrative patterns over the decades. The slasher canon is divided into three eras: the classical (1974-1993), the self-referential (1994-2000) and the neoslasher cycle (2000-2013).

Education and Technological Unemployment Michael A. Peters,Petar Jandrić,Alexander J. Means,2019-04-29 This book examines the challenge of accelerating automation, and argues that countering and adapting to this challenge requires new methodological, philosophical, scientific, sociological, economic, ethical, and political perspectives that fundamentally rethink the categories of work and education. What is required is political will and social vision to respond to the question: What is the role of education in a digital age characterized by potential mass technological unemployment? Today’s technologies are beginning to cost more jobs than they create – and this trend will continue. There have been many proposed solutions to this problem, and they invariably involve an educational vision. Yet, in a world that simply doesn’t offer enough work for everyone, education is clearly not a panacea for technological unemployment. This collection presents responses to this question from a wide spectrum of disciplines, including but not limited to education studies, philosophy, history, politics, sociology, psychology, and economics.
