Warsaw Housing Cooperative Magdalena Matysek-Imielińska, 2019-07-25 This book discusses the unknown and remote urban experiment of modernist social practices and dreams of a better tomorrow. It describes the history of the Warsaw Housing Cooperative not as a historical relic or a single case study, but instead analyses this working-class social housing estate – in itself an extremely interesting emancipatory project – from the perspective of contemporary urban studies. It focuses on issues related to the power of architecture, architects and the estate residents themselves: the city's performative actions, problems related to the polycentric character of the city authorities, the opportunities of building urban institutions, and social identities and urban common goods. Inspired by the history of the Warsaw Housing Cooperative, the book investigates how the estate residents, assisted by social reformers (today called urban activists), organised the urban space of performative democracy, and how they developed anti-capitalist, urban-survival strategies and created new lifestyles. It also analyses how passive tenants turned into active citizens claiming their right to the city. The inspiring book is intended for researchers in the field of performative studies, urban sociologists, critical urban studies researchers, animators of social life and urban activists.

Architectural Research Addressing Societal Challenges Manuel Jorge Rodrigues Couceiro da Costa, Filipa Roseta, Joana Pestana Lages, Susana Couceiro da Costa, 2019-08-08 The escalating interdependency of nations drives global geopolitics to shift ever more quickly. Societies seem unable to control any change that affects their cities, whether positively or negatively. Challenges are global, but solutions need to be implemented locally.

How can architectural research contribute to the future of our changing society? How has it contributed in the past? The theme of the 10th EAAE/ARCC International Conference, “Architectural Research Addressing Societal Challenges”, was set to address these questions. This book, *Architectural Research Addressing Societal Challenges*, includes reviewed papers presented in June 2016, at the 10th EAAE/ARCC International Conference, which was held at the facilities of the Faculty of Architecture of the University of Lisbon. The papers have been further divided into the following five sub-themes: a Changing Society; In Transit – Global Migration; Renaturalization of the City; Emerging Fields of Architectural Practice; and Research on Architectural Education. The EAAE/ARCC International Conference, held under the aegis of the EAAE and of the ARCC, is a conference organized every other year, in collaboration with one of the member schools/ universities of those associations, alternatively in North America or in Europe.

On the Edges of Whiteness Jochen

Lingelbach, 2020-05-01 From 1942 to 1950, nearly twenty thousand Poles found refuge from the horrors of war-torn Europe in camps within Britain’s African colonies, including Uganda, Tanganyika, Kenya and Northern and Southern Rhodesia. *On the Edges of Whiteness* tells their improbable story, tracing the manifold, complex relationships that developed among refugees, their British administrators, and their African neighbors. While intervening in key historical debates across academic disciplines, this book also gives an accessible and memorable account of survival and dramatic cultural dislocation against the backdrop of global conflict.

Architectural Research Addressing Societal Challenges
Volume 1 Manuel Jorge Rodrigues Couceiro da Costa, Filipa Roseta, Susana Couceiro da Costa, Joana Pestana Lages, 2017-09-19 The EAAE/ARCC International Conference, held under the aegis of the EAAE (European Association for Architectural Education) and of the ARCC (Architectural Research Centers Consortium), is a conference organized every other year, in collaboration with one of the member schools / universities of those associations, alternatively in North America or in Europe. The EAAE/ARCC Conferences began at the North Carolina State University College of Design, Raleigh with a conference on Research in Design Education (1998); followed by conferences in Paris (2000), Montreal (2002), Dublin (2004), Philadelphia (2006), Copenhagen (2008), Washington (2010), Milan (2012) and Honolulu (2014). The conference discussions focus on research experiences in the field of architecture and architectural education, providing a critical forum for the dissemination and engagement of current ideas from around the world.

Cultural Mobility in the Interwar Avant-Garde Art Network Michał Wenderski,2018-07-27 This book explores the issue of cultural mobility within the interwar network of the European avant-garde, focusing on selected writers, artists, architects, magazines and groups from Poland, Belgium and Netherlands. Regardless of their apparent linguistic, cultural and geographical remoteness, their mutual exchange and relationships were both deep and

broad, and of great importance for the wider development of interwar avant-garde literature, art and architecture. This analysis is based on a vast research corpus encompassing original, often previously overlooked periodicals, publications and correspondence gathered from archives around the world.

Principles of Planology JM de Casseres, 2014-09-15
Between the World Wars the talent of Dutch town planner J.M. de Casseres (1902-1990) found expression in two visionary books and a clutch of influential articles. In an in-depth article published in February 1929 in the magazine *De Gids* under the title 'Grondslagen der planologie' (Principles of Planology) he invented a term for the new social-scientific discipline that would eventually enter the Dutch language. De Casseres made it his life's work to elevate the art and craft of town planning to academic status, classifying the international planning body of knowledge and making it accessible and applicable. The results of this internationally supported body of knowledge are reflected not only in de Casseres's publications but also in a string of urban design proposals for towns across the Netherlands. This republication of the *De Gids* article alongside five other influential de Casseres articles in translation and their original Dutch language form brings this key thinker into reach for a wider research audience.

Identity and History in Non-Anglophone Comics

Harriet E.H. Earle, Martin Lund, 2023-04-24 This book

explores the historical and cultural significance of comics in languages other than English, examining the geographic and linguistic spheres which these comics inhabit and their contributions to comic studies and academia. The volume brings together texts across a wide range of genres, styles, and geographic locations, including the Netherlands, Colombia, Greece, Mexico, Poland, Finland, Portugal, Ireland, and the Czech Republic, among others. These works have remained out of reach for speakers of languages other than the original and do not receive the scholarly attention they deserve due to their lack of English translations. This book highlights the richness and diversity these works add to the corpus of comic art and comic studies that Anglophone comics scholars can access to broaden the collective perspective of the field and forge links across regions, genres, and comic traditions. Part of the Global Perspectives in Comics Studies series, this volume spans continents and languages. It will be of interest to researchers and students of comics studies, literature, cultural studies, popular culture, art and design, illustration, history, film studies, and sociology.
