The Cambridge History of Africa J. D. Fage,Roland Anthony Oliver,Michael Crowder,1975 The eighth and final volume of The Cambridge History of Africa covers the period 1940-75. It begins with a discussion of the role of the Second World War in the political decolonisation of Africa. Its terminal date of 1975 coincides with the retreat of Portugal, the last European colonial power in Africa, from its possessions and their accession to independence. The fifteen chapters which make up this volume examine on both a continental and regional scale the extent to which formal transfer of political power by the European colonial rulers also involved economic, social and cultural decolonisation. A major theme of the volume is the way the African successors to the colonial rulers dealt with their inheritance and how far they benefited particular economic

groups and disadvantaged others. The contributors to this volume represent different disciplinary traditions and do not share a single theoretical perspective on the recent history of the continent, a subject that is still the occasion for passionate debate.

Creating a New Medina Venkat

Dhulipala, 2015-02-09 This book examines how the idea of Pakistan was articulated and debated in the public sphere and how popular enthusiasm was generated for its successful achievement, especially in the crucial province of UP (now Uttar Pradesh) in the last decade of British colonial rule in India. It argues that Pakistan was not a simply a vague idea that serendipitously emerged as a nation-state, but was popularly imagined as a sovereign Islamic State, a new Medina, as some called it. In this regard, it was envisaged as the harbinger of Islam's renewal and rise in the twentieth century, the new leader and protector of the global community of Muslims, and a worthy successor to the defunct Turkish Caliphate. The book also specifically foregrounds the critical role played by Deobandi ulama in articulating this imagined national community with an awareness of Pakistan's global historical significance.

Digital Transformation in Business and Society Babu George, Justin Paul, 2019-10-04 The digital traces that people leave behind as they conduct their daily lives provide a powerful resource for businesses to better understand the dynamics of an otherwise chaotic society. Digital technologies have become omnipresent in our lives and we still do not fully know how to make the best use of the data these technologies could harness. Businesses leveraging big data appropriately could definitely gain a sustainable competitive advantage. With a balanced mix of texts and cases, this book discusses a variety of digital technologies and how they transform people and organizations. It offers a debate on the societal consequences of the yet unfolding technological revolution and proposes alternatives for harnessing disruptive technologies for the greater benefit of all. This book will have wide appeal to academics in technology management, strategy, marketing, and human resource management.

The Global Smartphone Daniel Miller ,Laila Abed Rabho ,Patrick Awondo , Maya de Vries,Marília Duque,Pauline Garvey, Laura Haapio-Kirk,Charlotte Hawkins,Alfonso Otaegui ,Shireen Walton,Xinyuan Wang, 2021-05-06 The smartphone is often literally right in front of our nose, so you would think we would know what it is. But do we? To find out, 11 anthropologists each spent 16 months living in communities in Africa, Asia, Europe and South America, focusing on the take up of smartphones by

older people. Their research reveals that smartphones are technology for everyone, not just for the young. The Global Smartphone presents a series of original perspectives deriving from this global and comparative research project. Smartphones have become as much a place within which we live as a device we use to provide 'perpetual opportunism', as they are always with us. The authors show how the smartphone is more than an 'app device' and explore differences between what people say about smartphones and how they use them. The smartphone is unprecedented in the degree to which we can transform it. As a result, it quickly assimilates personal values. In order to comprehend it, we must take into consideration a range of national and cultural nuances, such as visual communication in China and Japan, mobile money in Cameroon and Uganda, and access to health information in Chile and Ireland – all alongside diverse trajectories of ageing in Al Quds, Brazil and Italy. Only then can we know what a smartphone is and understand its consequences for people's lives around the world.

The House of Islam Ed Husain, 2018-06-19 "Ed Husain has become one of the most vital Muslim voices in the world. The House of Islam could very well be his magnum opus." -Reza Aslan, #1 New York Times bestselling author of *Zealot* "This should be compulsory reading." -Peter Frankopan, author of the international bestseller *The Silk Roads Today*, Islam is to many in the West an alien force, with Muslims held in suspicion. Failure to grasp the inner workings of religion and geopolitics has haunted American foreign policy for decades and

has been decisive in the new administration's controversial orders. The intricacies and shadings must be understood by the West not only to build a stronger, more harmonious relationship between the two cultures, but also for greater accuracy in predictions as to how current crises, such as the growth of ISIS, will develop and from where the next might emerge. The House of Islam addresses key questions and points of disconnection. What are the roots of the conflict between Sunni and Shi'a Muslims that is engulfing Pakistan and the Middle East? Does the Koran encourage the killing of infidels? The book thoughtfully explores the events and issues that have come from and contributed to the broadening gulf between Islam and the West, from the United States' overthrow of Iran's first democratically elected leader to the emergence of ISIS, from the declaration of a fatwa on Salman Rushdie to the attack on the offices of Charlie Hebdo. Authoritative and engaging, Ed Husain leads us clearly and carefully through the nuances of Islam and its people, taking us back to basics to contend that the Muslim world need not be a stranger to the West, nor our enemy, but our peaceable allies.

A History of the Apocalypse Catalin

Negru, 2018-07-26 Every generation of people think that their problems are the most important ever. As history flows without interruption and doomsday scenarios fail, the following generations focus on their own contemporary events, ignoring or underestimating the past. In this way people always see signs in their times and the end of the world is constantly a fresh subject.

Menstruation Across Cultures Nithin

Sridhar, 2021-08-26 Menstruation across Cultures attempts to provide a detailed review of menstruation notions prevalent in India and in cultures from across the world. The world cultures covered in the book include Indic traditions like Hinduism, Buddhism, Jainism and Sikhism; ancient civilisations like Greece, Rome, Mesopotamia and Egypt; and Abrahamic religions of Judaism, Christianity, and Islam. Two themes of special focus in the book are: Impurity and Sacrality. While they are often understood as being opposed to each other, the book examines how they are treated as two sides of the same coin, when it comes to menstruation. This is especially true in Indic traditions and pre-Christian polytheistic traditions like Greco-Roman, Mesopotamian and Egyptian. Impurity and Sacrality complement each other to form a comprehensive worldview in these cultures. The book also examines how the

understanding of impurity in Abrahamic religions differs from those of polytheistic cultures. As part of the examination of the sacrality attached to menstruation, a special focus has also been given to the deities of menstruation in polytheistic cultures and to what Ayurveda and Yoga say about this essential function in a woman's physiology. Finally, a comparative study of menstrual notions prevalent in modernity is presented, along with a Do and Don't dossier.
