Galactic Astronomy James Binney,Michael Merrifield,2021-07-13 This is the definitive treatment of the phenomenology of galaxies--a clear and comprehensive volume that takes full account of the extraordinary recent advances in the field. The book supersedes the classic text *Galactic Astronomy* that James Binney wrote with Dimitri Mihalas, and complements *Galactic Dynamics* by Binney and Scott Tremaine. It will be invaluable to researchers and is accessible to any student who has a background in undergraduate physics. The book draws on observations both of our own galaxy, the Milky Way, and of external galaxies. The two sources are complementary, since the former tends to be highly detailed but difficult to interpret, while the latter is typically poorer in quality but conceptually simpler to understand. Binney and Merrifield introduce all astronomical concepts necessary to understand the properties of galaxies, including coordinate systems, magnitudes and

colors, the phenomenology of stars, the theory of stellar and chemical evolution, and the measurement of astronomical distances. The book's core covers the phenomenology of external galaxies, star clusters in the Milky Way, the interstellar media of external galaxies, gas in the Milky Way, the structure and kinematics of the stellar components of the Milky Way, and the kinematics of external galaxies. Throughout, the book emphasizes the observational basis for current understanding of galactic astronomy, with references to the original literature. Offering both new information and a comprehensive view of its subject, it will be an indispensable source for professionals, as well as for graduate students and advanced undergraduates.

Cobra II Michael R. Gordon, Bernard E. Trainor, 2006-03-14 Written by the chief military correspondent of the New York Times and a prominent retired Marine general, this is the definitive account of the invasion of Iraq. A stunning work of investigative journalism, *Cobra II* describes in riveting detail how the American rush to Baghdad provided the opportunity for the virulent insurgency that followed. As Gordon and Trainor show, the brutal aftermath was not inevitable and was a surprise to the generals on both sides. Based on access to unseen documents and exclusive interviews with the men and women at the heart of the war, *Cobra II* provides firsthand accounts of the fighting on the ground and the high-level planning behind the scenes. Now with a new afterword that addresses what transpired after the fateful events of the summer of 2003, this is a peerless re-creation and analysis of the central event of our times.

Zakelijk communiceren Courtland L. Bovée, 2004 Deze grondige inleiding in zakelijk

communiceren is opgezet rondom het exclusieve schrijfproces in drie stappen van Bovée en Thill: 1. plannen, 2. schrijven en 3. afwerken. Deze praktische strategie biedt een stevige basis voor het oplossen van schriftelijke en mondelinge communicatieproblemen in een zakelijke omgeving. Aan de hand van het driestappen proces leert de lezer snel en efficiënt boodschappen op te stellen. Het schrijfproces in drie stappen komt in het gehele boek aan de orde. Het wordt geïntroduceerd en tot in detail beschreven in deel 2. Vervolgens wordt het proces toegepast op korte boodschappen (brieven, memo's en e-mail), op verslagen en mondelinge presentaties en ten slotte op sollicitaties. 'Zakelijk communiceren' bevat talloze voorbeelden van brieven en andere zakelijke teksten die zijn voorzien van uitgebreid commentaar. Bij veel voorbeelden wordt beschreven hoe het driestappen proces is toegepast en wordt getoond hoe de theorie in de praktijk is gebracht. Elk hoofdstuk begint met een communicatieprobleem uit de praktijk, dat aan het eind van het hoofdstuk met de geleerde theorie kan worden opgelost. Daarnaast is er ruime aandacht voor communicatie via het web en e-mail.
