Shaping the Future of African American Film Monica White Ndounou, 2014-04-29 In Hollywood, we hear, it's all about the money. It's a ready explanation for why so few black films get made—no crossover appeal, no promise of a big payoff. But what if the money itself is color-coded? What if the economics that governs film production is so skewed that no film by, about, or for people of color will ever look like a worthy investment unless it follows specific racial or gender patterns? This, Monica Ndounou shows us, is precisely the case. In a work as revealing about the culture of filmmaking as it is about the distorted economics of African American film, Ndounou clearly traces the insidious connections between history, content, and cash in black films. How does history come into it? Hollywood's reliance on past performance as a measure of potential success virtually guarantees that historically underrepresented, underfunded, and undersold African American films devalue the future prospects of black films. So the cycle continues as it has for nearly a century. Behind the scenes, the numbers are far from neutral. Analyzing the onscreen narratives and off-screen circumstances behind nearly two thousand films featuring African Americans in leading and supporting roles, including such recent productions as *Bamboozled*, *Beloved*, and Tyler Perry's *Diary of a Mad Black Woman*, Ndounou exposes the cultural and racial constraints that limit not just the production but also the expression and creative freedom of black films. Her wide-ranging analysis reaches into questions of literature, language, speech and dialect, film images and narrative, acting, theater and film business practices, production history and financing, and organizational history. By uncovering the ideology behind profit-driven industry practices that reshape narratives by, about, and for people of color, this provocative work brings to light existing limitations—and possibilities for reworking stories and business practices in

theater, literature, and film.

State Capitalism's Uncertain Future Scott B.

MacDonald,Jonathan Lemco,2015-07-20 A provocative and timely look at the current state of global economics, particularly how the state-owned companies of Russia, China, Latin America, and other emerging markets are influencing how people work, how they consume, and how they prosper. The global economy is changing: experts are noting slow growth in the advanced economies, greater volatility in international markets, and the emergence of state-owned companies in the competitive marketplace. This forward-looking reference explores the role that state capitalism plays within the political structures of countries throughout the world. The text begins with an introduction to state capitalism, moves into an in-depth examination of several countries and regions, and concludes with a discussion on the future of state capitalism in the next decade. Coauthors Scott B. MacDonald and Jonathan Lemco examine the challenges that state-owned companies face in the global economy, including a weak legal and commercial infrastructure, a conflict of interest between politics and business, and massive corruption in local and regional governments. A close review of the perils of state capitalism based on meritocracy devolving into crony capitalism invites debate on the longevity of this economic system versus a free market economy.

The Millenarian World of Early Mormonism Grant

Underwood,1999-01-15 The most detailed study yet of early Mormon thought about the end times, *The Millenarian World of Early Mormonism* shows how Mormon views of Christ's imminent second coming exerted a profound influence on Mormonism between 1830 and 1846. By exploring how early LDS interpretation of the Bible and the Book of Mormon affected, and was affected by, Mormon millennial doctrines, Grant Underwood provides the first comprehensive linkage of the history of early Mormonism and millennial thought. He also probes LDS perceptions of the institutions and values prevalent before the Civil War, reassessing Mormonism's relationship to the dominant culture and placing Mormon millennial thought in the broader context of Judeo-Christian ideas about the end of the world.

In Defense of Food Michael Pollan,2008-01-01 #1 New York Times Bestseller from the author of *This is Your Mind on Plants*,

How to Change Your Mind, The Omnivore's Dilemma, and Food Rules Food. There's plenty of it around, and we all love to eat it. So why should anyone need to defend it? Because in the so-called Western diet, food has been replaced by nutrients, and common sense by confusion--most of what we're consuming today is longer the product of nature but of food science. The result is what Michael Pollan calls the American Paradox: The more we worry about nutrition, the less healthy we see to become. With In Defense of Food, Pollan proposes a new (and very old) answer to the question of what we should eat that comes down to seven simple but liberating words: Eat food. Not too much. Mostly plants. Pollan's bracing and eloquent manifesto shows us how we can start making thoughtful food choices that will enrich our lives, enlarge our sense of what it means to be healthy, and bring pleasure back to eating.

**Sweet Land of Security: America's Responses to Terror-
-From the Revolution Through Today's "War on Terror"**

Michael T. Geary,2007-08 Are the post-9/11 measures initiated by the government and law enforcement agencies the products of a totalitarian impulse, or panic?-or are they simply a prudent response to a seriously perilous world? Are our liberties likely to be narrowed down forever?-or will we restore them when the crisis is over? (How will we know when it's over?) One way to begin thinking carefully about that is to consider how Americans have responded in the past. Our struggle to reconcile the conflicting claims of liberty and security is not an easy one-but it turns out to have a history. It is, in fact, one of the threads the historical fabric of our nation is woven from. Here a lawyer and professor does what a lawyer does: he examines the precedents, from the Alien

and Sedition Acts of 1799 through the Civil War, the forced relocation of Japanese Americans in World War II, the Red Scares of the 20th Century to our present war on terror. This work shows the balance of liberty and security from the Alien and Sedition Acts in the Adams administration through the creation of military commissions in the Mexican War, Lincoln's suspension of habeas corpus in the Civil War, the internment of Japanese Americans in World War II, the Red Scares of the twentieth century, to the War on Terror. About the author: Michael Geary is the Coordinator of the Criminal Justice Program at Albertus Magnus College, in New Haven, Connecticut. He joined the College's faculty in 2003 after retiring as a sergeant from the New York City Police Department. Professor Geary received his B.S. in Criminal Justice in 1983, his M.S. 1995, and his J.D. from Pace University School of Law in 1996.
