*Innovation performance accounting* Wilhelm Schmeisser, Hermann Mohnkopf, Matthias Hartmann, Gerhard Metze, 2010-06-16 For successful innovation in business the responsible managers need a consistent view of the individual processes as well as an assessment of key projects in all phases of the development. Generating new ideas, fast examination of its feasibility requires skilled methods for evaluation of these ideas, plans and especially costs and revenues. Business models, calculation methods and some assessments of certain options are presented by the authors. The ability to identify risks and appropriate responses to misperceptions are important milestones in the innovation process. From analysis of problems to the introduction of market-ready solutions, legal requirements, business demands and risk management systems are discussed. Concepts promoting uniform, binding rules for ratings in the innovation process are treated. The identification of target pricing, target costing and litigation, the evaluation of the solution to calculate risk aspects as tasks in financial management and innovation controlling are part of the content. The authors demonstrate that any innovation in different industries requires a strategic and financial project management. Monetary assessment of the individual processes, a detailed patent portfolio and accounts management for innovation processes are of enormous importance. The book is completed by applications of the Berlin Balanced Scorecard Concept with practical examples from the innovation projects in pharmaceutical and technical business.

**Epidemiological Surveillance in Animal Health** Barbara Dufour, Pascal Hendriks, Food and Agriculture Organization of the United Nations, 2009 This book is the result of collaboration among epidemiological surveillance specialists at all the operational echelons of an epidemiological surveillance network: organisation, training, data management and evaluation. The coordinators of various networks contributed their valuable experience to this practical guide. This practical guide is aimed at all those responsible for epidemiological surveillance network design, organisation and operation in both the northern and southern hemispheres

**Between Clay and Dust** Musharraf Ali Farooqi, 2015-09-08 A Finalist for the Man Asian Literary Prize, a moving and beautifully told story set in a the tumultuous days after the Partition of India and Pakistan, about a wrestling champion and a courtesan struggling to hold onto the world they knew amidst the eruptions of history. In a ruined city after the partition of India and the creation of Pakistan in 1947, Ustad Ramzi is still famed as a

wrestler of unparalleled strength and technique. But now Ramzi's power—if not his indomitable will—is on the wane, while his younger brother Tamami, unconcerned with traditions and hierarchy, hungers for immediate fame and glory at the risk of family honor. The courtesan Gohar Jan was once celebrated throughout the country for her beauty and the seductive power of her singing, her salon thronged by nobles, rich men, and infatuated admirers. But the aging Gohar Jan's world is changing, too. Ustad Ramzi and Gohar Jan are both beloved paragons of a world that no longer exists, in a bewildering new reality indifferent to their art. Shortlisted for The Man Asian Literary Prize, acclaimed Pakistani author Musharraf Ali Farooqi's novel is a bracing and elegant story of two extraordinary characters in the twilight of their lives who stand resolute as the society they've known crumbles around them. *Between Clay and Dust* is an arresting account of love, honor, betrayal, and the ways in which we wrestle with history.

**Avian Influenza and Newcastle Disease** Illaria Capua, Dennis J. Alexander, 2009-06-24 Avian Influenza (AI) and Newcastle Disease (ND) are two devastating diseases of poultry, which cause losses to the poultry industry and influence the liveability of rural communities worldwide. Following the H5N1 epidemic they appear to be endemic at least in Asia, Eastern Europe, The Middle East and Africa. Particularly in case of AI outbreaks it is essential that infection is diagnosed promptly and that isolates are made available to the international scientific community. Currently, several organisations including OIE, FAO and the EC have organised training courses in affected areas. However, often these courses do not cover all aspects of AI/ND diagnosis but only certain aspects. This results in fragmented areas of knowledge and in the application of different diagnostic protocols in different parts of the world. The objective of this book is to provide a comprehensive approach to AI diagnosis ranging from the clinical elements that should trigger a suspicion in the field, to the post mortem technique, collection of samples, processing/ shipment of specimens, virological, serological and molecular diagnosis and guidelines for notification.

*Bluetongue* Peter Mertens, Matthew Baylis, Philip Mellor, 2008-10-29 The third volume in the Institute of Animal Health (IAH) Biology of Animal Infections Series, *Bluetongue* discusses one of the most economically important diseases of domesticated livestock. Affecting primarily sheep particularly the improved mutton and wool breeds, it is now endemic in Africa, India, the Middle and Far East, Australia and the Americas, and over the last six years has caused a series of outbreaks throughout the Mediterranean region and central Europe. *Bluetongue* represent a paradigm not only for the other orbiviruses (such as African horse sickness virus, which shares the same vector species) but also for other insect transmitted diseases, including those of humans. The only single definitive work that provides both historical and up to date data on the disease Describes the latest developments in epidemiological modelling, molecular epidemiology and vaccine development, as well as explaining the current global epidemiology of the disease Outlines the importance and possible mechanisms of overwintering, and the impact of global warming on the vectors and virus distribution

**A Subtler Magick** S. T. Joshi, 1996-12-01 He was the premier writer of horror fiction in the first half of the 20th Century, perhaps the major American practitioner of the art between the time of Edgar Allan Poe and Stephen King. Born into an upper middle class family in Providence, Rhode Island, Howard Phillips Lovecraft (1890-1937) had a lonely childhood, but read voraciously from his earliest years. He soon became interested in science and astronomy and began penning stories, poetry, and essays in great profusion, publishing them himself when no other market was available. The advent of *Weird Tales* in 1923 gave him a small outlet for his work, and he attracted a large number of followers, with whom he exchanged literally tens of thousands of letters, many of them quite lengthy. A number of these young correspondents eventually became professional

writers and editors themselves. Lovecraft's fame began spreading beyond fandom with the publication of his first significant collection, *The Outsider and Others*, in 1939, two years after his untimely death. Book jacket.

**Bluetongue in Northern Europe** Claude Saegerman, Francisco Reviriego-Gordejo, Paul-Pierre Pastoret, 2008 Bluetongue (BT) is an infectious, viral and vector-borne disease of improved breeds of sheep and some species of deer that is of major international importance. The infection is usually unapparent in cattle, which acts as reservoir for the virus. However, some serotypes such as serotype 8 (BTV-8), which recently caused a severe epizootic of BT in northern Europe, exhibit a more important virulence in cattle. Consequently, the redaction of a scientific booklet describing Bluetongue is of great utility for veterinarians and animal health professionals in the framework of an early detection of Bluetongue and other emerging diseases.

**Food Safety = Behavior** Frank Yiannas, 2015-03-28 This book helps in Achieving food safety success which requires going beyond traditional training, testing, and inspectional approaches to managing risks. It requires a better understanding of the human dimensions of food safety. In the field of food safety today, much is documented about specific microbes, time/temperature processes, post-process contamination, and HACCP-things often called the hard sciences. There is not much published or discussed related to human behavior—often referred to as the “soft stuff.” However, looking at foodborne disease trends over the past few decades and published regulatory out-of-compliance rates of food safety risk factors, it’s clear that the soft stuff is still the hard stuff. Despite the fact that thousands of employees have been trained in food safety around the world, millions have been spent globally on food safety research, and countless inspections and tests have been performed at home and abroad, food safety remains a significant public health challenge. Why is that? Because to improve food safety, we must realize that it’s more than just food science; it’s the behavioral sciences, too. In fact, simply put, food safety equals behavior. This is the fundamental principle of this book. If you are trying to improve the food safety performance of a retail or food service establishment, an organization with thousands of employees, or a local community, what you are really trying to do is change people’s behavior. The ability to influence human behavior is well documented in the behavioral and social sciences. However, significant contributions to the scientific literature in the field of food safety are noticeably absent. This book will help advance the science by being the first significant collection of 50 proven behavioral science techniques, and be the first to show how these techniques can be applied to enhance employee compliance with desired food safety behaviors and make food safety the social norm in any organization.

**Pastoral Politics** Vasant K. Saberwal, 1999 This Book Contends That There Is An Alarmist Rhetoric On Grazing-Induced Degradation In The Western Himalaya. The Book Highlights The Potential For Institutional And Political Pressures To Influence The Nature Of Conservation Rhetoric As Well As The Direction Of Policies Advocated By Conservation Agencies. This Book Is Indispensable For An Understanding Of Environmental Rhetoric And Government Functioning And Policy. Academics, Environmentalists, Ngos And Policy Makers Will Find It Useful.

**Internet Commerce** Elaine Lawrence, 2000 Internet Commerce, 2nd Edition, has been completely revised to reflect the latest developments in

this rapidly changing area. All chapters feature Australian and international examples of policy reform and innovation. The theory is supported by examples drawn from industry developments, regulatory policies and government initiatives.

*Camel Karma* Ilse Köhler-Rollefson,2014 According to myth, the camel was created by Lord Shiva at the behest of his consort Parvati. Parvati shaped a strange five-legged animal from clay and asked Shiva to blow life into it. At first Shiva refused, saying that the misshapen animal will not fare well in the world, but later gave in. He folded the animal's fifth leg over its back giving it a hump, and commanded it to get up, uth. That is how the animal got its name. The camel then needed someone to look after it, so Shiva rolled off a bit of skin and dust from his arm and made out of this the first Raika. Historically, the Raika of Rajasthan have had a unique and enduring relationship with camels. Their entire existence revolves around looking after the needs of these animals which, in turn, provide them with sustenance, wealth and companionship. When German veterinarian, Ilse Kohler-Rollefson, arrives in Rajasthan in 1991, she is Immediately enthralled by the Raikas' intimate relationship with their animals but also confronted with their existential problems. This is the story of the quest that follows to save a globally unique and humane animal culture and find a place for the camel in rapidly changing India. It is a journey that is often exasperating, sometimes funny, but keeps revealing unexpected layers of rural Rajasthani mores. A travelogue of a sort, this book takes us deeply into the diverse cultures that make Rajasthan such a fascinating place.
