Mindset Mathematics: Visualizing and Investigating Big Ideas, Grade 3 Jo Boaler,Jen Munson,Cathy Williams,2018-07-12 Engage students in mathematics using growth mindset techniques The most challenging parts of teaching mathematics are engaging students and helping them understand the connections between mathematics concepts. In this volume, you'll find a collection of low floor, high ceiling tasks that will help you do just that, by looking at the big ideas at the third-grade level through visualization, play, and investigation. During their work with tens of thousands of teachers, authors Jo Boaler, Jen Munson, and Cathy Williams heard the same message—that they want to incorporate more brain science into their math instruction, but they need guidance in the techniques that work best to get across the concepts they needed to teach. So the authors designed Mindset Mathematics around the principle of active student engagement, with tasks that reflect the latest brain science on learning. Open, creative, and visual math tasks have been shown to improve student test scores, and more importantly change their relationship with mathematics and start believing in their own potential. The tasks in Mindset Mathematics reflect the lessons from brain science that: There is no such thing as a math person - anyone can learn mathematics to high levels. Mistakes, struggle and challenge are the most important times for brain growth. Speed is unimportant in mathematics. Mathematics is a visual and beautiful subject, and our brains want to think visually about mathematics. With engaging questions, open-ended tasks, and four-color visuals that will help kids get excited about mathematics, Mindset Mathematics is organized around nine big ideas which emphasize the connections within the Common Core State Standards (CCSS) and can be used with any current curriculum.

I-SPY Amit Bagaria,2019-03-07 The name is Bond – JAMES BOND. I am sure you’ve seen at least one, if not more of the 26 films made on fictional British spy 007. You may’ve also seen TV shows like The Americans, Blindspot, Chuck, Covert Affairs, Homeland, Nikita, Quantico, The Blacklist, and/or The Night Manager. I wrote this book after I realised that the average person may not know even one-sixth of what I know about spies and spying. Almost each of the Top 50 nations (by GDP, population or military power) has a spy agency/service. Many countries have more than one ‘secret service’ or ‘intelligence agency’. USA has 16. Some countries’ spy agencies are more powerful than entire smaller nations, with annual budgets larger than their GDPs. This books attempts to tell the story of 20 of the world’s largest and most powerful spy agencies, details their important missions, reveals their darkest secrets, and gives you an inside perspective of the often quite gory but thrilling ‘world of spies’. It gives you a 360° view of those spy agencies you only read about or see in a movie or TV show. With one chapter per agency, you can read only chapters you may be interested in. The life of most spies is not as glamorous as it is made out to be. You may think it is all about high-tech and guns and car chases and ‘hot’ women, but that’s not the case. In the real spy world, the techniques boil down to the interpretation of basic human psychology. Even though a spy learns several action techniques on how to get out of a dangerous situation, including how to withstand torture, if he/she is resorting to car chases, it means they’re doing something wrong. Spies don’t get paid very well. Gambling at a casino or flying on a private jet may be part of the job, but a spy doesn’t get to spend this kind of money on personal expenses. Spies cannot disclose the nature of their work to their family and friends, to maintain secrecy. Many have to live away from home for weeks, months, even years. Married life is a mess, as the spouse starts

suspecting the spy of having an affair. Who can become a spy? Do you need a law enforcement (police) or military background? Not really. Spies have degrees as diverse as law, political science, finance, economics – even professional athletes have become successful spies.
