## **How to Validate Your Startup Business Idea Ravi**

Kikan,2018-10-22 Many startups and entrepreneurs fail because they do not validate their startup business idea. I run some of the largest startup communities on LinkedIn. One of the largest communities that I moderate and engage on LinkedIn has around 300,000 global members including startups, venture capitalists, entrepreneurs, mentors and global experts. With my own experience of working with many startups, entrepreneurs, corporates and my regular interactions with successful business ventures I have understood the importance of validating your startup business idea before launching your product or services in the market. In this book not only have I collected my thoughts and experiences for validating a business idea but I have reached out to many experts globally to understand how to validate a business idea before going all out and launching your own business. Who Is This Book For ? It is extremely important that you validate your startup business idea in the market if you are a wannabe entrepreneur, a student, homemaker, professional, expert or anyone who is trying to launch a startup business. This is extremely important for you to understand this right from the ideation stage itself. Sometimes in the enlightenment of the business idea or in the haste of getting things done faster with shortcuts (Howsoever the idea might be great), we end up doing the following: 1. We forget the simple basics 2. We tend to overlook similar experiences 3. We do not take stable advises 4. We rush into getting things done faster 5. We often get misguided 6. We overlook readily available data 7. We sometimes ONLY look at money and not the business process 8. We don't validate things before going all out Why This Book? Time and again I have seen my friends, colleagues, students, awesome entrepreneurs, startups (including myself) getting into a new business without

validating their startup business idea. This often has led to extremely disastrous and sometimes fatal outcomes. Always validate things from a rational and practical perspective. This will give you depth, more understanding and a far clear picture of how, when,where and what to do while going ahead into a new ventureThis book is a step to overcome all those hassles and validate your awesome business idea. Hello, Startup is a practical, how-to guide that consists of three parts: Products, Technologies, and

*The Lean Startup* Eric Ries, 2011-09-13 Most startups fail. But many of those failures are preventable. The Lean Startup is a new approach being adopted across the globe, changing the way companies are built and new products are launched. Eric Ries defines a startup as an organization dedicated to creating something new under conditions of extreme uncertainty. This is just as true for one person in a garage or a group of seasoned professionals in a Fortune 500 boardroom. What they have in common is a mission to penetrate that fog of uncertainty to discover a successful path to a sustainable business. The Lean Startup approach fosters companies that are both more capital efficient and that leverage human creativity more effectively. Inspired by lessons from lean manufacturing, it relies on “validated learning,” rapid scientific experimentation, as well as a number of counter-intuitive practices that shorten product development cycles, measure actual progress without resorting to vanity metrics, and learn what customers really want. It enables a company to shift directions with agility, altering plans inch by inch, minute by minute. Rather than wasting time creating elaborate business plans, The Lean Startup offers entrepreneurs—in companies of all sizes—a way to test their vision continuously, to adapt and adjust before it's too late. Ries provides a scientific approach to creating and managing successful startups in a age when companies need to innovate more than ever.

*Lean Startup* Jack Lead, 2020-03-26 Are you looking for a proven method to start and scale a successful startup? Keep reading and you'll find out all the great benefits the Lean StartUp method can bring to your business! Eric Ries said that startups could be a success if they follow a certain process. This means that the process can always be learned and those who have experience can also teach it. Every entrepreneur will always wonder whether a startup will fail. If you wish to begin a lean startup, you must identify a small gap in the

market using time and money effectively. You will need to use different techniques to ensure that your product or service reaches the market in a faster way while also avoiding the production or manufacture of products that no consumer will want. Most amateur entrepreneurs feel that they are taking a shot in the dark when they are identifying a product or service they can offer to their potential consumers. But, it does not always have to be a trial and error proposition.

**Controlled Use and Deployment of Resources** One of the most important principles of a lean startup is that the startup must use everyone of its resources effectively and efficiently. Since most startups do not have enough investment they use the lean business model to encourage the effective deployment and continuous development of the resources that the company does have. A lean startup must continuously evaluate how the initial investment can be used to meet their targets and their customer requirements. The startup must also ensure that it does not spend more than what is necessary to test, evaluate and refine its products. If the costs are kept at a minimum, the startup can maximize its profits whenever there is a sale. Every lean startup is dependent on organic growth since it does not have huge capital investment. When the profits made at the early stages are reinvested in the company, the startup can scale its operations up in a controlled manner without sacrificing quality.

**Entrepreneurs are everywhere** Eric Ries believes that every individual in the world is an entrepreneur. There are some successful entrepreneurs who have built their organization in their garage. You can find entrepreneurs in Hollywood, in the IRS and even in well-established organizations. These people are always looking for a way to develop products that increase value to the customer.

**Entrepreneurship is management** It is important to remember that

every startup is not defined by its products but is an institution. Therefore, there must be a management team in place to understand and develop the startup. Validated Learning A startup does not exist only to build products for the customers or to make money. It exists only when the management learns how to build a sustainable business. The learning can be validated through statistic measures by running experiments that test the startups' vision. Do we have your attention now? In this book, you will learn: What Is Lean Start Up? **Disrupted** Dan Lyons, 2016-04-05 An instant New York Times bestseller, Dan Lyons' hysterical (Recode) memoir, hailed by the Los Angeles Times as the best book about Silicon Valley, takes readers inside the maddening world of fad-chasing venture capitalists, sales bros, social climbers, and sociopaths at today's tech startups. For twenty-five years Dan Lyons was a magazine writer at the top of his profession--until one Friday morning when he received a phone call: Poof. His job no longer existed. I think they just want to hire younger people, his boss at Newsweek told him. Fifty years old and with a wife and two young kids, Dan was, in a word, screwed. Then an idea hit. Dan had long reported on Silicon Valley and the tech explosion. Why not join it? HubSpot, a Boston start-up, was flush with \$100 million in venture capital. They offered Dan a pile of stock options for the vague role of marketing fellow. What could go wrong? HubSpotters were true believers: They were making the world a better place ... by selling email spam. The office vibe was frat house meets cult compound: The party began at four thirty on Friday and

lasted well into the night; shower pods became hook-up dens; a push-up club met at noon in the lobby, while nearby, in the content factory, Nerf gun fights raged. Groups went on walking meetings, and Dan's absentee boss sent cryptic emails about employees who had graduated (read: been fired). In the middle of all this was Dan, exactly twice the age of the average HubSpot employee, and literally old enough to be the father of most of his co-workers, sitting at his desk on his bouncy-ball chair.
