CUDA Fortran for Scientists and Engineers Gregory Ruetsch, Massimiliano Fatica, 2013-09-11

CUDA Fortran for Scientists and Engineers shows how high-performance application developers can leverage the power of GPUs using Fortran, the familiar language of scientific computing and supercomputer performance benchmarking. The authors presume no prior parallel computing experience, and cover the basics along with best practices for efficient GPU computing using CUDA Fortran. To help you add CUDA Fortran to existing Fortran codes, the book explains how to understand the target GPU architecture, identify computationally intensive parts of the code, and modify the code to manage the data and parallelism and optimize performance. All of this is done in Fortran, without having to rewrite in another language. Each concept is illustrated with actual examples so you can immediately evaluate the performance of your code in comparison. Leverage the power of GPU computing with PGI's CUDA Fortran compiler Gain insights from members of the CUDA Fortran language development team Includes multi-GPU programming in CUDA Fortran, covering both peer-to-

peer and message passing interface (MPI) approaches Includes full source code for all the examples and several case studies Download source code and slides from the book's companion website

Programming Massively Parallel Processors David B. Kirk, Wen-mei W. Hwu, 2016-11-24

Programming Massively Parallel Processors: A Hands-on Approach, Third Edition shows both student and professional alike the basic concepts of parallel programming and GPU architecture, exploring, in detail, various techniques for constructing parallel programs. Case studies demonstrate the development process, detailing computational thinking and ending with effective and efficient parallel programs. Topics of performance, floating-point format, parallel patterns, and dynamic parallelism are covered in-depth. For this new edition, the authors have updated their coverage of CUDA, including coverage of newer libraries, such as CuDNN, moved content that has become less important to appendices, added two new chapters on parallel patterns, and updated case studies to reflect current

industry practices. Teaches computational thinking and problem-solving techniques that facilitate high-performance parallel computing Utilizes CUDA version 7.5, NVIDIA's software development tool created specifically for massively parallel environments Contains new and updated case studies Includes coverage of newer libraries, such as CuDNN for Deep Learning

Small Scale Sport Tourism Events and Local Sustainable Development Ricardo Melo, Claude Sobry, Derek Van Rheenen, 2021-04-10 This book outlines the impacts of small scale sport tourism events on local sustainable development in different countries. Using half marathons organized in small and medium sized cities as an example, the chapters are robust case studies, applying a unified methodology in order to provide a clear overview of the sport tourism system in each country. The book begins with a description of the methodologies used and an overview of the countries studied. The country chapters focus on several dimensions of sport tourism in each city, including but not limited to the history of past sport tourism events in the municipality, the characteristics of the city hosting the event, the demographic profile of participants in the event, and the quantifiable economic,

environmental, and sociocultural impacts of the event. Each chapter concludes with analysis and policy recommendations for holding future events that contribute to local sustainable development. The book concludes by summarizing and comparing the main results across different countries, and presenting main conclusions and overarching recommendations. Written by international experts in sports tourism, this book is geared towards academic researchers and students, interested in sport tourism, sports economics, management, and sustainable development, as well as policy makers and professionals tasked with bringing such events to their cities.

Extreme Events Mario Chavez, Michael Ghil, Jaime Urrutia-Fucugauchi, 2015-11-23 The monograph covers the fundamentals and the consequences of extreme geophysical phenomena like asteroid impacts, climatic change, earthquakes, tsunamis, hurricanes, landslides, volcanic eruptions, flooding, and space weather. This monograph also addresses their associated, local and worldwide socio-economic impacts. The understanding and modeling of these phenomena is critical to the development of timely worldwide strategies for the prediction of natural and anthropogenic extreme events, in order

to mitigate their adverse consequences. This monograph is unique in as much as it is dedicated to recent theoretical, numerical and empirical developments that aim to improve: (i) the understanding, modeling and prediction of extreme events in the geosciences, and, (ii) the quantitative evaluation of their economic consequences. The emphasis is on coupled, integrative assessment of the physical phenomena and their socio-economic impacts. With its overarching theme, Extreme Events: Observations, Modeling and Economics will be relevant to and become an important tool for researchers and practitioners in the fields of hazard and risk analysis in general, as well as to those with a special interest in climate change, atmospheric and oceanic sciences, seismo-tectonics, hydrology, and space weather.

Computational Science and Its Applications – ICCSA 2016 Osvaldo Gervasi, Beniamino Murgante, Sanjay Misra, Ana Maria A.C. Rocha, Carmelo M. Torre, David Taniar, Bernady O. Apduhan, Elena Stankova, Shangguang Wang, 2016-06-30 The five-volume set LNCS 9786-9790 constitutes the refereed proceedings of the 16th International Conference on Computational Science

and Its Applications, ICCSA 2016, held in Beijing, China, in July 2016. The 239 revised full papers and 14 short papers presented at 33 workshops were carefully reviewed and selected from 849 submissions. They are organized in five thematical tracks: computational methods, algorithms and scientific applications; high performance computing and networks; geometric modeling, graphics and visualization; advanced and emerging applications; and information systems and technologies.

The Semantic Web – ISWC 2020 Jeff Z. Pan,Valentina Tamma,Claudia d’Amato,Krzysztof Janowicz,Bo Fu,Axel Polleres,Oshani Seneviratne,Lalana Kagal,2020-10-31 The two volume set LNCS 12506 and 12507 constitutes the proceedings of the 19th International Semantic Web Conference, ISWC 2020, which was planned to take place in Athens, Greece, during November 2-6, 2020. The conference changed to a virtual format due to the COVID-19 pandemic. The papers included in this volume deal with the latest advances in fundamental research, innovative technology, and applications of the Semantic Web, linked data, knowledge graphs, and knowledge processing on the Web. They were carefully reviewed and selected for inclusion in the proceedings as follows: Part I: Features 38

papers from the research track which were accepted from 170 submissions; Part II: Includes 22 papers from the resources track which were accepted from 71 submissions; and 21 papers in the in-use track, which had a total of 46 submissions. Chapter “Transparent Integration and Sharing of Life Cycle Sustainability Data with Provenance ” is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Sport Tourism and Its Territorial Development and Opportunities Barbara Mazza, Claude Sobry, 2022-09-21 The book explores the theme of active sports tourism, which includes extreme sports, those in contact with nature, and the so-called ‘slow adventure’. It shows that it is a rapidly developing sector because it is less expensive than other tourism segments, produces more economic impact for the host territory and is more attentive to respect for the environment. The book provides a complete picture of the phenomenon at an international level, investigating its territorial development, the profile of sports tourists, the role of communication and host branding, the contamination between sports tourism and other forms of tourism, and the prospects for future development of this sector.

Lawyers in 21st-Century Societies Richard L Abel,Ole Hammerslev,Hilary Sommerlad,Ulrike

Schultz,2020-04-02 The world's legal professions have undergone dramatic changes in the 30 years since publication of the landmark three-volume *Lawyers in Society*, which launched comparative sociological studies of lawyers. This is the first of two volumes in which scholars from a wide range of disciplines, countries and cultures document and analyse those changes. The present volume presents reports on 46 countries, with broad coverage of North America, Western Europe, Latin America, Asia, Australia, North Africa and the Middle East, sub-Saharan Africa, and former communist countries. These national reports address: the impact of globalisation and neoliberalism on national legal professions (the relationship of lawyers and their professional associations to the state and tensions between state and citizenship); changes in lawyer demography (rapidly growing numbers and the profession's efforts to retain control, the entry of women and obstacles to full gender equality, ethnic diversity); legal education (the proliferation of institutions and pedagogic innovation); the regulation of lawyers; structures of production (especially the growth of large firms and the impact of technology and

paraprofessionals); the distribution of lawyers across roles; and access to justice (state-funded legal aid and pro-bono services). The juxtaposition of the reports reveals the dramatic transformations of professional rationales, labour markets, and working practices and the multiple contingencies of the role of lawyers in societies experiencing increasing juridification within a new geopolitical order.

Marginalisation and Events Trudie Walters, Allan Stewart Jepson, 2019-01-08 This book is the first to take an in-depth examination of marginalisation and events. Marginalisation has been the subject of academic research for some time now. For example, marginalisation and exclusion have been identified as problematic in fields as diverse as geography, public health, education and media studies. However, little research has been carried out within the field of event studies. Using of a range of different theoretical and methodological approaches from a variety of disciplines, the volume applies a critical approach to events as they relate to marginalisation that seeks to address the ‘how’ and ‘why’, and to provide a holistic picture of their place and influence in the lives of marginalised individuals and communities. International through authorship and examples, it encompasses case studies from

around the world, including South Africa, the United Kingdom, Italy, Afghanistan, the United States, Brazil, Portugal, Australia and New Zealand. This is essential reading for students and researchers in the fields of critical event studies, anthropology, cultural studies, tourism, sociology and management.

Exploring Community Festivals and Events Allan Jepson, Alan Clarke, 2014-10-17 The development of the festival and event industry has seen large scale growth and extensive government support as a result of objectives to enhance and project the image of place and leverage positive sponsorship and

regeneration opportunities. As we move deeper into austerity measures prompted by economic recession, community festivals and events as a sacred or profane time of celebration can be considered even more important than ever before. This book for the first time explores the role and importance of ‘community’, ‘culture’ and its impact through festivals and events. Split into two distinct sections, the first introduces key themes and concepts, contextualises local traditions and culture, and investigates how festivals and events can act as a catalyst for tourism and create a sense of community. It then questions the social and political nature of festivals and community events through examining their ownership. The second section focuses on communities themselves, seeking to examine and discuss key emerging themes in community event studies such as; the role of diaspora, imagined communities, pride and identity, history, producing and consuming space and place, authenticity, and multi-ethnic communities. Examples are drawn from Portugal, the Dominican Republic, the USA, Malaysia, Malta, Finland and Australia making this book truly international. This significant volume will be valuable reading for students and academics across the fields of Event,

Tourism and Hospitality studies as well as other social science disciplines.

Managing and Developing Communities, Festivals and Events Alan Clarke, 2016-04-29 The different stages of a festival's evolution provide a plethora of opportunities for us to better understand our culture, the relationships we build, what we value in our culture and our communities, and how we socialize and interact with one another. *Managing and Developing Community Festivals and Events* brings together community festival and event research from nine different countries. It critically explores how festivals and their communities develop and impact upon one another. The chapters focus on a wide range of festivals such as food and culinary festivals, art events, religious pilgrimage and feast festivals, as well as a variety of diverse themes such as joy, civil unrest, preservation of cultures and authenticity.

Events and Infrastructures Barbara Grabher, Ian R. Lamond, 2024-05-13 Innovative and the first of its kind, this informative and multidisciplinary book explores the socio-cultural significance inherent in event infrastructures. While mainstream event management literature addresses event infrastructures

mainly through its operational relevance, this carefully compiled edited volume takes infrastructures as an analytical point in respect to its social, political, economic and cultural potential of the study of events. Borrowing from the ongoing social scientific debates on the geography, sociology and anthropology of infrastructures, critical questions are posed in relation to the event contexts. With references to events in Argentina, Malawi, Spain and the UK, among others, the volume combines an international perspective with a highly relevant subject for contemporary event management education. By bringing together theoretical as well as empirical readings on the question of event infrastructures from a critical point of view, the debates are relevant to practitioners and researchers as well as undergraduate and postgraduate students in the field of events, leisure, tourism, anthropology, sociology, geography and urban planning – among others.

Economics and Engineering of Unpredictable Events Caterina De Lucia,Dino Borri,Atif

Kubursi,Abdul Khakee,2022-03-07 In recent decades, the intensification of unpredictable events including the Covid-19 outbreak, Brexit, trade warfare, religion-inspired terrorism and civil wars, and

climate change has resulted in serious loss of human lives and property, a decrease in biodiversity and natural hazards (with long-term negative impacts on environment), and impeded social and economic development. *Economics and Engineering of Unpredictable Events: Modelling, Planning and Policies* provides an integrated view of the management of unpredictable events incorporating three major perspectives: economic management, environmental planning and engineering models. Contributors from economics, planning, regional science, and engineering address key questions including; How resilient are human societies and their habitats? What should societies do to shift from being vulnerable to being more resilient? And what role should planning and policies play to protect communities and the natural environment? The chapters cover academic debates, conceptual reflections, case studies, methods, and strategy development with particular reference to mitigation and adaptation in face of unpredictable events. This book is of particular interest to readers of economic policy, urban and regional planning and engineering.

Food and Wine Events in Europe Alessio Cavicchi, Cristina Santini, 2014-03-26 Food and wine

events have gained popularity internationally. Their importance in local economic development has grown, especially in Europe, as they are seen as a source of income for local economic systems, a way for creating new job positions and effective tools for promoting and increasing typical product awareness and demand. This book for the first time illustrates the positive and negative impacts of food and wine events from a stakeholder perspective by highlighting several critical aspects such as: (1) advantages and disadvantages of food and wine events; (2) best practice adoption for maximising benefits flowing from event creation; (3) community involvement and knowledge diffusion; (4) effectiveness in promoting local products and creating consumer awareness about products; (5) factors that promote or inhibit the success or achievements of wine and food events. Although the volume primarily focuses on events in Europe, comparisons are made to other regions in the world. Case studies are integrated throughout to illustrate the system of economic and social impacts linked to food and wine events, as well as best practices to achieve effective event management and maximize expected results. Written by leading academics, this timely and important volume will be valuable

reading for all students, researchers and academics interested in Events, Tourism, Hospitality, Gastronomy and Development Studies.

New Diagnostic, Therapeutic and Organizational Strategies for Acute Coronary Syndromes Patients
Niccolò Grieco, Maurizio Marzegalli, Anna Maria Paganoni, 2013-07-12 This book collects several contributions, written both by statisticians and medical doctors, which focus on the identification of new diagnostic, therapeutic and organizational strategies in order to improve the occurrence of clinical outcomes for Acute Coronary Syndromes (ACS) patients. The work is structured in two different parts: the first one is focused on cooperative project mainly on statistical analysis of large clinical and administrative databases; the second one faces the development of innovative diagnostic techniques, with specific reference to genetic and proteomic, and the evolution of new imaging techniques for the early identification of patients at major risk of thrombotic, arrhythmic complications and at risk of poor

revascularization.
