2D Nanoscale Heterostructured Materials Satyabrata Jit,Santanu Das,2020-05-09 2D Nanoscale Heterostructured Materials: Synthesis, Properties, and Applications assesses the current status and future prospects for 2D materials other than graphene (e.g., BN nanosheets, MoS2, NbSe2, WS2, etc.) that have already been contemplated for both low-end and high-end technological applications. The book offers an overview of the different synthesis techniques for 2D materials and their heterostructures, with a detailed explanation of the many potential future applications. It provides an informed overview and fundamentals properties related to the 2D Transition metal dichalcogenide materials and their heterostructures. The book helps researchers to understand the progress of this field and points the way to future research in this area. Explores synthesis techniques of newly evolved 2D materials and their heterostructures with controlled properties Offers detailed analysis of the fundamental properties (via various experimental process and simulations techniques) of 2D heterostructures materials Discusses the applications of 2D heterostructured materials in various high-performance devices

*Hidden Treasures* Gene Levine,Gary W. Priester,2008 A stereogram is a two-dimensional image that, when viewed properly, creates a stunning, almost magical impression of depth. Objects seem to float or to pop out of patterns. And these complex and sophisticated designs, produced by two of the most famous stereogram creators in the world, are state of the art.

**Eye Tricks** Gary W. Priester,2006 Seeing isn't always believing! This incredible collection of visual illusions and stereogram images proves it. In Eye Tricks, there are shapes to beguile and confuse, colours in which to lose yourself and patterns to marvel at - while they scramble your mind. A great visual experience for anyone with a good visual sense and/or a love for clever visual illusions.

**Light Vision Color** Arne Valberg,2007-02-03 Light Vision Color takes a well-balanced, interdisciplinary approach to our most important sensory system. The book successfully combines basics in vision sciences with recent developments from different areas such as neuroscience, biophysics, sensory psychology and philosophy. Originally published in 1998 this edition has been extensively revised and updated to include new chapters on clinical problems and eye diseases, low vision rehabilitation and the basic molecular biology and genetics of colour vision. Takes a broad interdisciplinary approach combining basics in vision sciences with the most recent developments in the area Includes an extensive list of technical terms and explanations to encourage student understanding Successfully brings together the most important areas of the subject in to one volume

Optics of the Human Eye David A. Atchison,George Smith,2000 This text describes the optical structures and optical properties of the human eye. It is divided into five sections, covering topics such as basic optical structure of the human eye and image formation and refraction of the eye.

**Geology of Hungary** Laszlo Trunkó,1996 Trunkó's work presents a complete, up-to-date overview of the geology, stratigraphy and structure of Hungary. It not only considers the literature up to and including 1995 but also Hungarian publications which were only partly accessible in the West. More than 800 literature references provide a convenient entry point to the specialized literature on the regional geology of Hungary and make this new volume a valuable reference.
