*Who's Yelling in My Stethoscope?* Vladimir Tsesis,1998-10 *Who's Yelling in My Stethoscope?* is guaranteed to warm the hearts of readers who love the bright ideas, amusing vocabularies, earnest presumptions and innocent wisdom of youngsters. Recipient of a Parents' Choice Approved seal for projecting solid human values, this is a book of chuckles, small tragedies and hope. It contains unforgettable quotes, commentaries and sage advice from kids who have made Dr. Tsesis a hero in his own office and a prisoner of the bright, perceptive eyes of those who trust their well-being to his genius.

**Stethoscope** Anna Harris, Tom Rice, 2022-11-28 A surprising investigation of a scientific instrument long at the pulse of medicine. This book explores the colorful past, present, and future of an instrument that is, quite literally, close to our hearts. The stethoscope has become the symbol of medicine itself—how did this come to be? What makes the stethoscope such a familiar yet charismatic object? Drawing from a range of fields including history, anthropology, science, technology, and sound studies, the book illustrates the variety of roles the stethoscope has played over time. It shows that the stethoscope is not, and has never been, a single entity. It is used to a variety of ends, serves several purposes, and is open to many

interpretations. This variability is the key to the stethoscope's enduring presence in the medical and popular imagination.

**Medical Education and Sociology of Medical Habitus: "It's not about the Stethoscope!"** H. Luke, 2007-05-08 This is a new and outstanding contribution to understanding the working life of junior doctors. It opens out the field of research in sociology and inserts junior medical doctor culture right into medical sociology and professional medical education by its innovative use of Pierre Bourdieu's sociological framework and the concept of habitus. This volume challenges many of the myths of the medical cultural experiences and socializing forces that are an integral part of early medical training.

**Dude, Where's My Stethoscope?** Donovan Gray, 2013-09-24 Is a real ER anything like what we see on TV? Dr. Donovan Gray answers that question in Dude, Where's My Stethoscope? - a laugh-out-loud funny, heartbreaking, and sometimes poignant collection of true-to-life medical short stories. We follow Dr. Gray through medical school and two decades of unforgettable ER and family practice. Humorously written in an engaging mash-up of formal prose and informal medical slang with a nod to pop culture and ancient mythology, Dude is a powerful book that captures the essence of what it is to be an emergency room doctor.

**A Heart Afire** Patricia Meisol, 2023-12-12 A deeply compelling biography of the pioneering children's heart doctor Helen Taussig, who helped start heart surgery and became a global force against preventable suffering. In A Heart

Afire, Patricia Meisol renders a moving portrait of the indomitable pediatrician and global patient activist Helen Taussig (1898–1986), who famously gathered and publicized evidence linking thalidomide to birth defects, leading to US drug safety laws. Taussig also developed the Blalock-Taussig shunt (along with Alfred Blalock) for infants with congenital heart defects. Spanning Taussig's childhood in Boston, her struggle with dyslexia, her progressive hearing loss, her research contributions, and the founding of her own fledgling children's heart clinic, this book chronicles Taussig's ambition, tenacity, and formidable work ethic. As Meisol shows, Taussig not only saved lives, but also set a bold precedent for other women doctors in the twentieth century, who were largely excluded from medicine. Meticulously researched and intimately told, A Heart Afire is unique in its use of a fifty-year-long campaign by Taussig's followers for a worthy memorial portrait and shows how views of women doctors have evolved. Meisol reveals Taussig as an authentic American hero, one who embodies the Emersonian ethic of developing oneself, following the processes of nature, and serving the public. A fiercely independent thinker, Taussig infused herself and her ideas into the medical culture, paving the way not only for other professional women but also for patients then and now to advocate for themselves. Offering an indispensable look at health care as a universal human right, A Heart Afire is a beacon and a blueprint for creating a more just and compassionate world of medicine.

World Through a Stethoscope (Volume 2) Dr Tejas Shelar, 2023-11-08 World through a Stethoscope is an idea, which originated amidst the gone pandemic of COVID. With a simple motto of giving voice to healthcare professionals, unfolding stories, one at a time. With 74 established authors - who are healthcare professionals, have enlivened the text within these pages. They have unveiled the triumphs and challenges, the moments of vulnerability and resilience, that have shaped them as they navigate the maze of healthcare. In the vast realm of medicine, where every heartbeat holds a story, we find ourselves at the crossroads of science and humanity. Welcome to this anthology, a tapestry woven by the hands, minds, and hearts of medical professionals. The narratives in this book are frozen in time, representing the authors as they were around December 2020. As we fast forward to 2023, their subsequent achievements and personal growth have taken them to new heights, making their stories even more inspiring and emblematic of their remarkable journeys. We hope this book encourages future doctors, makes people talk about how to make things better, and reminds everyone that being a doctor is not just about facts and figures, it's also about being caring and kind. Let's celebrate the special people who spend their lives helping others, and let these stories inspire you to do good things too. Wherever we originate, whoever we are, and wherever we may be headed, our lives are woven from stories, and it's stories that will endure as our lasting legacy.

*The Politics of Expertise* Matthew Hilton, James McKay, Nicholas Crowson, Jean-François Mouhot, 2013-04-25 *The Politics of Expertise* offers a challenging new interpretation of politics in contemporary Britain, through an examination of non-governmental organisations. Using specific case studies of the homelessness, environment, and international aid and development sectors, it demonstrates how politics and political activism has changed over the last half century. NGOs have contributed enormously to a professionalization and a privatization of politics, emerging as a new form of expert knowledge and political participation. They have been led by a new breed of non-party politician, working in collaboration and in competition with government. Skilful navigators of the modern technocratic state, they have brought expertise to expertise and, in so doing, have changed the nature of grassroots activism. As affluent citizens have felt marginalised by the increasingly complex nature of many policy solutions, they have made the rational calculation to support NGOs, the professionalism and resources of which make them better able to tackle complex problems. Yet in doing so, support rather than participation becomes the more appropriate way to describe the relationship of the public to NGOs. As voter turnout has declined, membership and trust in NGOs has increased. But NGOs are very

different types of organisations from the classic democratic institutions of political parties and the labour movement. They maintain different and varied relationships with the publics they seek to represent. Attracting mass support has provided them with the resources and the legitimacy to speak to power on a bewildering range of issues, yet perhaps the ultimate victors in this new form of politics are the NGOs themselves.

**Reconceptualising Professional Learning** Tara Fenwick, Monika Nerland, 2014-03-14 This book presents leading-edge perspectives and methodologies to address emerging issues of concern for professional learning in contemporary society. The conditions for professional practice and learning are changing dramatically in the wake of globalization, new modes of knowledge production, new regulatory regimes, and increased economic-political pressures. In the wake of this, a number of challenges for learning emerge: more practitioners become involved in interprofessional collaboration developments in new technologies and virtual workworlds emergence of transnational knowledge cultures and interrelated circuits of knowledge. The space and time relations in which professional practice and learning are embedded are becoming more complex, as are the epistemic underpinnings of professional work. Together these shifts bring about intersections of professional knowledge and responsibilities that call for new conceptions of professional knowing. Exploring what the authors call sociomaterial perspectives on professional learning they argue that theories that trace not

just the social but also the material aspects of practice – such as tools, technologies, texts but also bodies and actions - are useful for coming to terms with the challenges described above. Reconceptualising Professional Learning develops these issues through specific contemporary cases focused on one of the book's three main themes: (1) professionals' knowing in practice, (2) professionals' work arrangements and technologies, or (3) professional responsibility. Each chapter draws upon innovative theory to highlight the sociomaterial webs through which professional learning may be reconceptualised. Authors are based in Australia, Canada, Italy, Norway, Sweden, and the USA as well as the UK and their cases are based in a range of professional settings including medicine, teaching, nursing, engineering, social services, the creative industries, and more. By presenting detailed accounts of these themes from a sociomaterial perspective, the book opens new questions and methodological approaches. These can help make more visible what is often invisible in today's messy dynamics of professional learning, and point to new ways of configuring educational support and policy for professionals.

Projects described include a

workshop where doctors and shamans shared their experiences, and views on the pathology and treatment of common illnesses, finding unexpected common ground. With some 30 bandw photographs. Annotation copyright by Book News, Inc., Portland, OR
