Recent Advances in Geographic Information System for Earth Sciences Yosoon Choi, 2020-06-23 Geographic information systems (GISs) have played a vital role in Earth sciences by providing a powerful means of observing the world and various tools for solving complex problems. The scientific community has used GISs to reveal fascinating details about the Earth and other planets. This book on recent advances in GIS for Earth sciences includes 12 publications from esteemed research groups worldwide. The research and review papers in this book belong to the following broad categories: Earth science informatics (geoinformatics), mining, hydrology, natural hazards, and society.

Lessons Learned from World Bank Education

Management Information System Operations Husein Abdul-Hamid, Namrata Saraogi, Sarah Mintz, 2017-04-13 *Lessons Learned from World Bank Education Management Information System Operations* provides an overview of the World Bank's portfolio in the area of Education Management Information Systems (EMISs) over the course of 17 years, from 1998 to 2014. It seeks to identify overall trends and characteristics of World Bank support in this area, with the intent of informing future project preparation and analytical work. The portfolio review revealed that although several good practices were evident, operational performance of

EMIS activities fell short of expectations, with widespread deficiencies that ranged from unclear definitions and understanding of the EMIS to ineffective implementation and utilization. Examples of successful activities include the development of an EMIS to manage teachers and provide access to education (for example, Afghanistan); utilization of an EMIS as a management tool (for example, Bosnia and Herzegovina); creation of an online EMIS to improve access to education data (for example, Honduras); use of an EMIS to strengthen teaching and learning (for example, Guatemala and Lithuania); and use of an EMIS as a management tool for schools (for example, Malaysia). These success stories highlight how a well-implemented EMIS can improve the performance of an education system. The challenges that have been identified as contributing to the shortcomings are related to the following: • Misalignment of activities and unrealistic EMIS goals • Institutionalization of the EMIS • Sustainability challenges resulting from inconsistent leadership • Missed integration opportunities • Private players in education • EMIS at the local level Future projects could benefit from the SABER (Systems Approach for Better Education Results)-EMIS Assessment Framework. The SABER-EMIS Framework focuses on the need for a strong enabling environment, system soundness, quality data, and effective utilization as the key factors essential for the successful implementation of an EMIS. Initial needs assessment of a country's EMIS can play a critical role in benchmarking countries and provide a valuable foundation for the design of new projects.

DeMISTifying MIS Luc Lecuit, 1999-01-01 Managers are often far from the real action, so they need something that will tell them what is going on... Luckily, the rapid evolution of tools for collecting, analyzing and diffusing information has greatly improved our ability to manage from a distance. However the speed of technological change means that changes in management practices and tools are inescapable. Development of Management Information Systems (MIS) for social funds has become essential due to some of the characteristics unique to these types of projects or organizations. Among these unique characteristics are the need for transparency and efficiency because of the highly visible nature of the activities. These guidelines define MIS and underscore its importance. They also outline specific tools to assist in selection of an MIS and summarize its design and implementation. These guidelines are meant to be a practical tool to help those who are setting up or managing a social fund navigate in MIS waters. Technical jargon is kept to a minimum and a glossary of technical terms is provided to assist readers who do not have a technical background. However, special Technical Boxes have been included for the experts in this field.
