Main entries are in Romanized Japanese with Chinese characters, if any. In the second line, parts of speech label ([n.] for nouns and [v.] for verbs) and the entry's Chinese equivalents in Pinyin (Romanized standard Chinese pronunciation) followed by Chinese characters (both simplified and traditional if applicable). Then, in the third line, entry's English equivalents with standard American pronunciation with focus on stressed syllable\*in bold print.. A syllable is part of a word that contains one vowel sound. In every word of two or more syllables, one syllable is stressed. It's called 'stressed syllable'. The vowel sound in that syllable is louder, higher in pitch, and longer than the other vowel sounds in the same word. The contrast between stressed and unstressed syllables is very important because it helps to create the rhythm of English. The native English speakers rely more on stressed syllable to understand what you say than on the individual sounds of the word. This book is ideal for learners of Japanese, Chinese, and English as a second language who want to communicate more effectively. **Second Language Literacy Practices and Language Learning Outside the Classroom** Miho Inaba, 2018-11-21 This book presents a comprehensive and detailed study of literacy practices and language use outside of the classroom by university students of Japanese. It investigates both tasks related to classes (e.g. homework and preparation for classes) and voluntary activities in the target language (e.g. watching TV and writing emails) and discusses how values, motivations and types of activities differ between the two contexts. It employs sociocultural perspectives to observe reading and writing activities within and under the influence of individual and social contexts, such as learner motives, peer networks and the language classroom, and contributes to the related research areas in the field of second language acquisition, such as motivation, autonomous language learning and language learning strategies. Crucially, the book not only documents out-of-class literacy activities, but also examines which teaching practices facilitate and promote such out-of-class language learning and use. It considers which literacy activities in the target language students undertake out-of-class, which factors encourage or discourage such out-of-class activity and how and with which tools they undertake these activities. As such the book provides guidance for classroom teaching and suggests that slight changes to teaching practices in the classroom may enhance autonomous learning outside the classroom.

ABC Dictionary of Sino-Japanese Readings Victor H. Mair, 2016-07-31 The significance of Japanese-language scholarship on China cannot be overstated. Yet much of it is largely untapped by China scholars in both the West and China, in part because they are unfamiliar with the Japanese pronunciation of Chinese characters. Even those who know Japanese are frequently frustrated when seeking an obscure reading of a personal or place name. The purpose of this volume is to enable Sinologists and others involved in Chinese studies to access entries in Japanese reference works dealing with China without going through the time-consuming process of looking up characters by radical and stroke. For users of this dictionary, it is a simple matter to find a character by looking it up by its alphabetical pinyin pronunciation. Having located it, the user can go directly to the item in Japanese reference works. The Dictionary includes more than 13,072 entries not only in Chinese characters and their Sino-Japanese (ondoku/onyomi) readings, but also the Japanese (kundoku/kunyomi) readings. The romanized Japanese readings will assist in correctly transcribing Japanese names, such as the names of Japanese publishers and authors, and the technical terms employed by Japanese in their writings on China. These features will also give those familiar with pinyin greater access to material on Japanese history and culture. The ABC Dictionary of Sino-Japanese Readings will be a boon to Sinologists and others interested in the study of China.
