Italy International Monetary Fund. Monetary and Capital Markets Department,2013-12-06 This paper discusses the findings of Detailed Assessment of International Association of Insurance Supervisors (IAIS) insurance core principles on Italy. Regulation and supervision of the insurance industry in Italy is the responsibility of the newly established Institution for the Supervision of Insurance (IVASS). IVASS has reached international best practice in several areas of supervision. IVASS actively exercises group supervision and by 2000, IVASS established the first college of supervisors. Intragroup transactions and related party participations limits are strictly monitored and enforced. IVASS handling of the licensing of undertakings is complete and comprehensive and ensures appropriate considerations pursuant to regulations. Enhanced supervision in some areas is required.

Entrepreneurs in Family Business Dynasties Laura Hougaz,2015-02-23 This book is a longitudinal story of seven Italian-Australian family business dynasties, spanning over a hundred years across three generations, and starting with the founding generation who migrated to Australia in the first half of the 20th century. With hard work and sacrifices, they set the foundations of a long-lasting family culture, and the values that form the glue of a multigenerational family business. The book focuses on the personal, family, and business values that keep family members, across generations, continuing to engage together and successfully, as a family and a business. The book elaborates on the complexity of 'what is a family business', what it represents for the generational members that are part of it, how these family businesses have emerged, consolidated and expanded, and finally, how they continue to survive into the third generation, enabling the dynasty to flourish.

Real Estate in Italy Guido Abate, Giuditta Losa, 2016-11-25 This in-depth case study evaluates the recent evolution of the Italian real estate market, which has lately been subject to two interlocking phenomena: a serious devaluation of physical assets and, at the same time, a deep legislative innovation of the vehicles investing in this asset class. The novelty of the legal framework of some of the Italian real estate investment vehicles and the recent developments in the market make this detailed analysis a fascinating addition to the literature. The book starts with an analysis of the Italian real estate sector, covering the evolution and performance in light of the economic crisis and the most recent legislative innovations. Italian real estate investment vehicles are then compared with a broader European perspective. Each Italian investment vehicle (real estate investment funds, real estate fixed capital investment companies and real estate investment trusts) is then analysed in both legal and financial details, providing insights into management structure, the rights and powers of investors, the typical investment process and the related costs. The different management models are then compared in order to assess their advantages and disadvantages, especially for institutional investors. The performance measurement of Italian closed-end alternative investment funds and the phenomenon of discount to net asset value for listed real estate investment funds are then subject to a theoretical and empirical examination.
