Sir James William Redhouse

A Lexicon, English and Turkish Sir James William Redhouse, 1861

E-Lexicography Pedro A. Fuertes-Olivera, Henning Bergenholtz, 2011-10-20 This book looks at current research and future directions in e-lexicography. Online dictionaries and reference tools are increasingly prevalent in a digitized and internet-led era in language study that has embraced computational linguistics. This book responds with theoretical and practical analysis of key topics, from a global range of contributors. Since COBUILD in the 1980s, lexicographers have found it essential to engage with and utilize electronic computational tools. Internet dictionaries, online reference tools and even search engine optimization demand a knowledge of electronic lexicography and force a reassessment of the field. This volume looks at, amongst other topics:

- Polyfunctional versus monofunctional dictionary tools
- Developing theories of lexicography for electronic mediums
- Distinguishing between the database and the dictionary
- Online dictionaries not as data repositories but as sophisticated search engines

This volume will appeal to scholars in lexicography and to practicing lexicographers.

Music of the Ottoman Court Walter Feldman, 2023-12-18 Between 1600 and 1750 Ottoman Turkish music differentiated itself from an older Persianate art music and developed the genres antecedent to modern Turkish art music. Based on a translation of Demetrius Cantemir's seminal "Book of the Science of Music" from the early eighteenth century, this work is the first to bring together contemporaneous notations, musical treatises, literary sources, travellers' accounts and iconography. These present a synthetic picture of the emergence of Ottoman composed and improvised instrumental music. A detailed comparison of items in the notated Collections of Cantemir and of Bobowski—from fifty years earlier—together with relevant treatises, reveal key aspects of modality, melodic progression and rhythmic structures.
