Eye Tracking in Tourism Mattia Rainoldi, Mario Jooss, 2020-10-01 Despite the ever-increasing interest in eye tracking, there is still no comprehensive work on the potential and applications of table-mounted and mobile head-mounted eye tracking solutions in travel and tourism. This volume bridges that gap, effectively linking eye tracking with travel and tourism. It presents, on the one hand, novel academic contributions on the concept of eye tracking, and on the other, practice-oriented case studies that illustrate the use and strategic value of eye tracking in travel and tourism. It provides concrete and novel insights into tourist behavior and the tourist consumer experience and, for the academic community, offers a comprehensive, scientifically based overview of the empirical, methodological, theoretical, and practical contributions of eye tracking research. Accordingly, the book will be of value to a diverse audience. It will be a useful resource for existing and future tourism businesses, allowing them to adopt proactive approaches in the design of tourism products. It will also stimulate further research in the field and inspire scholars and practitioners to combine their ideas and expertise, to look beyond supposedly fixed horizons, and to identify emerging opportunities.

*Transforming our World Through Design, Diversity and Education* G. Craddock, C. Doran, L. McNutt, 2018-10-18 Good design is enabling, and each and every one of us is a designer. Universal Design is widely recognized an important concept that should be incorporated in all person-centred policies. The United Nations Convention on the Rights of Persons with Disabilities (UNCRPD) clearly stipulates that the most effective way of delivering on the promise of an inclusive society is through a Universal Design approach. Sitting at the intersection of the fields of Higher Education and Universal Design, this book presents papers delivered at the Universal Design and Higher Education in Transformation Congress (UDHEIT2018), held in Dublin, Ireland, from 30 October to 2 November 2018. This event brings together key experts from industry, education, and government and non-government organization sectors to share experiences and knowledge with all participants. The 86 papers included here are grouped under 17 headings, or themes, ranging from education and digital learning through healthcare to engagement with industry and urban design. Celebrating and integrating all that is good in design, diversity and education, this book will be a valuable resource for all those interested in the inspiring and empowering developments in both Universal Design and higher education.

**Mobile Applikationen im Tourismus: Marktanalyse und Zukunftsperspektiven mobiler Reiseführer** Saskia Conrad, 2013-04 Heutzutage ist es für den Menschen fast unmöglich geworden, sich dem Einfluss von Internet, Informationssystemen, Applikationen und der Internet Cloud zu entziehen. Aus diesem Grund lernten in den vergangenen zehn Jahren nach und nach auch viele Unternehmen, dass es mit der Nutzung der technologischen Fortschritte einfacher werden würde, die Bedürfnisse des wichtigsten Bestandteiles in der Marktwirtschaft zu erfahren und zu erfüllen: die des Kunden. Auch im Tourismus versuchen die Leistungsträger der touristischen Wertschöpfungskette das Internet, vor allem in Verbindung mit dem Handy der neuen Generation, Smartphone genannt, zu ihren Gunsten zu nutzen. Die westlich orientierte Informations- bzw. Wissensgesellschaft des 21. Jahrhunderts ist vor allem durch Mobilität gekennzeichnet. Sie entwickelt außerdem ein Bedürfnis nach zeit- und ortsunabhängigen Informationsdiensten. So sind mobile Dienste und Services in der Lage, den Touristen mit nötigen Informationen über ein Reisegebiet, auch vor Ort als sogenannter mobiler Reiseführer, zu versorgen. Doch inwieweit haben mobile Reiseführer einen Einfluss auf den Tourismus und eine Zukunft in dieser Branche? Diese Fragestellung soll im Rahmen der vorliegenden Studie untersucht.

Identity Francis Fukuyama, 2018-09-11 The New York Times bestselling author of *The Origins of Political Order* offers a provocative examination of modern identity politics: its origins, its effects, and what it means for domestic and international affairs of state. In 2014, Francis Fukuyama wrote that American institutions were in decay, as the state was progressively captured by powerful interest groups. Two years later, his predictions were borne out by the rise to power of a series of political outsiders whose economic nationalism and authoritarian tendencies threatened to destabilize the entire international order. These populist nationalists seek direct charismatic connection to "the people," who are usually defined in narrow identity terms that offer an irresistible call to an in-group and exclude large parts of the population as a whole. Demand for recognition of one's identity is a master concept that unifies much of what is going on in world politics today. The universal recognition on which liberal democracy is based has been increasingly challenged by narrower forms of recognition based on nation, religion, sect, race, ethnicity, or gender, which have resulted in anti-immigrant populism, the upsurge of politicized Islam, the fractious "identity liberalism" of college campuses, and the emergence of white nationalism. Populist nationalism, said to be rooted in economic motivation, actually springs from the demand for recognition and therefore cannot simply be satisfied by economic means. The demand for identity cannot be transcended; we must begin to shape identity in a way that supports rather than undermines democracy. *Identity* is an urgent and necessary book—a sharp warning that unless we forge a universal understanding of human dignity, we will doom ourselves to continuing conflict.

**Modern Geotechnical Design Codes of Practice** Patrick Arnold, Gordon A. Fenton, Michael A. Hicks, Timo Schweckendiek, Brian Simpson, 2013 The ground is one of the most highly variable of engineering materials. It is therefore not surprising that geotechnical designs depend on local site conditions and local engineering experience. Engineering practices, relating to investigation and design methods site understanding and to safety

levels acceptable to society, will therefore vary between different regions. The challenge in geotechnical engineering is to make use of worldwide geotechnical experience, established over many years, to aid in the development and harmonization of geotechnical design codes. Given the significant uncertainties involved, empiricism and engineering

**Tourism, Smart Specialization and Sustainable Development** João Romão, 2021-02-26 This Special Issue addresses relations between tourism activities, smart specialization strategies, and sustainable development at different territorial levels, including the local, regional, national, and international. Framed by appropriate conceptual frameworks to define the contemporary dynamics of innovation in tourism, case studies supported by advanced quantitative methods and developed in rural and urban areas of Asia, Europe, and Africa are presented and discussed. The concept of smart specialization inspires the formulation of regional innovation policies and strategies, emphasizing the importance of endogenous resources and existing territorial capabilities. By exploring the diversity and variety of each economy to develop inter-sectoral relations, this approach aims at promoting the creation of spillover effects of innovation processes supported by adequate key enabling technologies, potentially leading to the sustainable development of places, regions, and countries. As an activity that mobilizes contributions from different economic sectors, tourism may play a central role in such strategies. As described and discussed in this Special Issue, aspects related to the creative sectors of economies, information and communication technologies, traditional products and lifestyles, food production, or diverse cultural values can be mobilized to generate innovative and sustainable solutions for tourism development.

**Judgment Calls** Thomas H. Davenport, Brook Manville, 2012-04-03 Your guide to making better decisions Despite the dizzying amount of data at our disposal today—and an increasing reliance on analytics to make the majority of our decisions—many of our most critical choices still come down to human judgment. This fact is fundamental to organizations whose leaders must often make crucial decisions: to do this they need the best available insights. In *Judgment Calls*, authors Tom Davenport and Brook Manville share twelve stories of organizations that have successfully tapped their data assets, diverse perspectives, and deep knowledge to build an organizational decision-making capability—a competence they say can make the difference between success and failure. This book introduces a model that taps the collective judgment of an organization so that the right decisions are made, and the entire organization profits. Through the stories in *Judgment Calls*, the authors—both of them seasoned management thinkers and advisers—make the case for the wisdom of organizations and suggest ways to use it to best advantage. Each chapter tells a unique story of one dilemma and its ultimate resolution, bringing into high relief one key to the power of collective judgment. Individually, these stories inspire and instruct; together, they form a model for building an organizational capacity for broadly based, knowledge-intensive decision making. You've read *The Wisdom of Crowds* and *Competing on Analytics*. Now read *Judgment Calls*. You, and your organization, will make better decisions.

**Natural Running** Abshire Danny, Brian Metzler, 2010-12-01 Natural Running is the middle ground runners have been looking for. By learning to run the barefoot way, while wearing shoes, runners will become more efficient, stronger, and healthier runners. Backed by studies at MIT and Harvard, running form and injury expert Danny Abshire presents the natural running technique, form drills, and an 8-week transition plan that will put runners on the path to faster, more efficient, and healthier running. In *Natural Running*, Abshire explains how modern running shoes distort the efficient running technique that humans evolved over thousands of years. He reviews the history of running shoes and injuries, making the case for barefoot running but also warning about its dangers. By learning the natural running technique, runners can enjoy both worlds: comfortable feet, knees, and legs and an efficient running form that reduces impact and injuries. *Natural Running* teaches runners to think about injuries as symptoms of poor running form. Abshire specifies the overuse injuries that are most commonly associated with particular body alignment problems, foot types, and form flaws. Runners will learn how to analyze and identify their own characteristics so they can start down the path to natural running. Abshire explains the natural running technique, describing the posture, arm carriage, cadence, and land-lever-lift foot positioning that mimic the barefoot running style. Using Abshire's 8-week transition plan and a tool kit of strength and form drills, runners will move from heel striking to a midfoot or forefoot strike. *Natural Running* is the newest way to run and also the oldest. By discovering how they were meant to run, runners will become more efficient, stronger, and healthier runners.
