**Antenna Fundamentals for Legacy Mobile Applications and Beyond** Issa Elfergani,Abubakar Sadiq Hussaini,Jonathan Rodriguez,Raed Abd-Alhameed,2017-10-03 This book highlights technology trends and challenges that trace the evolution of antenna design, starting from 3rd generation phones and moving towards the latest release of LTE-A. The authors explore how the simple monopole and whip antenna from the GSM years have evolved towards what we have today, an antenna design that is compact, multi-band in nature and caters to multiple elements on the same patch to provide high throughput connectivity. The scope of the book targets a broad range of subjects, including the microstrip antenna, PIFA antenna, and the monopole antenna to be used for different applications over three different mobile generations. Beyond that, the authors take a step into the future and look at antenna requirements for 5G communications, which already has the 5G drive in place with prominent scenarios and use-cases emerging. They examine these, and put in place the challenges that lie ahead for antenna design, particularly in mm-Wave design. The book provides a reference for practicing engineers and under/post graduate students working in this field.

**New Trends on Human-Computer Interaction** José A. Macías,Antoni Granollers Saltiveri,Pedro Miguel Latorre Andrés,2009-04-21 This book comprises a variety of breakthroughs and recent advances on Human- Computer Interaction (HCI) intended for both researchers and practitioners. Topics addressed here can be of interest for those people searching for last trends involving such a growing discipline. Important issues concerning this book includes cutting-edge topics such as Semantic Web Interfaces, Natural Language Processing and Mobile Interaction, as well as new methodological trends such as Interface-Engineering techniques, User-Centred Design, Usability, Accessibility, Development Methodologies and Emotional User Interfaces. The idea behind this book is to bring together relevant and novel research on diverse interaction paradigms. New trends are gu-

anted according to the demanding claims of both HCI researchers and practitioners, which encourage the explicit arrangement of new industrial and technological topics such as the previously cited Interfaces for the Semantic Web, and Mobile Interfaces, but also Multimodal Interaction, Collaborative Interfaces, End-User Development, Usability and User Interface Engineering. Chapters included in this book comprise a selection of top high-quality papers from Interaccion '2007, which is the most important HCI conference sponsored by AIPO (the Spanish HCI Association). Papers were selected from a ranking - tained through double-blind peer review and later meta-review processes, considering the best evaluated paper from both the review and presentation session. Such a paper selection constitutes only 33% of the papers published in the conference proceedings. We would like to thank the reviewers for their effort in revising the chapters included in this publication, namely Silvia T. Acuna, ~Sandra Baldasarri, Crescencio Bravo, Cesar A.

Children's Lifeworlds in a Global City: Melbourne Clare Bartholomaeus, Nicola Yelland, 2023-05-05 This book examines the connections between policy, school experiences, and everyday activities of children growing up in the global city of Melbourne, Australia. It provides an in-depth consideration of Melbourne primary school children's lifeworlds, exploring everyday stories and practices inside and outside of school. This includes consideration of the diverse ways that educational "success" may be understood in the context of Melbourne, productively moving beyond a narrow focus only on academic achievement. Situated alongside policy and curriculum analysis, the book draws on research in Melbourne Year 4 primary school classrooms in the form of student-completed surveys, classroom ethnographies, and student responses to a learning dialogues activity, as well as video re-enactments of out-of-school life. Through this it explores key aspects of children's lifeworlds with a focus on school timetabling and pedagogical encounters, school engagement and belonging, and activities and everyday routines outside of school. This book offers a comprehensive and holistic exploration of children's lifeworlds in Melbourne, drawing connections between children's lives inside and outside of school, and the broader policy contexts.
