Doing Humanities in Nineteenth-Century Germany Efraim Podoksik, 2019-12-09  
Doing Humanities in Nineteenth-Century Germany, edited by Efraim Podoksik, examines the ways in which the humanities were practised by German thinkers and scholars in the long nineteenth century and the relevance of those practices for the humanities today.

God and the Dignity of Humans Bilateral Working Group of the German Bishops' Conference and the United Evangelical Lutheran Church of Germany, 2020-09-01 Is it possible for the churches to take a joint stand on human dignity, even though they hold different positions in certain ethical questions? This study paper by the (Roman Catholic) German Bishops' Conference and the United Evangelical Lutheran Church of Germany, which is available in English for the first time, explores new paths in the ecumenical handling of ethical questions. Using the methodology of differentiated consensus, the authors outline the theological similarities of the churches' teaching of anthropology, whilst still doing justice to their differences in the ethical assessment of individual issues of human conduct. In this way, Catholics and Lutherans adopt a common position and make a theologically responsible contribution to ethical judgement. [Gott und die Würde des Menschen] Ist trotz einzelner Differenzen in ethischen Fragen ein gemeinsames Eintreten der Kirchen für Menschenwürde möglich? Der Text der Deutschen Bischofskonferenz und der Vereinigten Evangelisch-Lutherischen Kirche Deutschlands, der erstmals auf Englisch vorliegt, erprobt neue Wege für den ökumenischen Umgang mit ethischen Fragestellungen: Mit der Methode des differenzierten Konsenses werden die theologischen Gemeinsamkeiten der Kirchen in der Lehre vom Menschen aufgezeigt, zugleich versucht die Methode, den Unterschieden in der ethischen Bewertung einzelner Fragen menschlicher Lebensführung gerecht zu werden. So beziehen Katholiken und Lutheraner gemeinsam Position und leisten einen theologisch verantworteten Beitrag zur ethischen Urteilsbildung.

**Art & Crime** Stefan Koldehoff, Tobias Timm, 2022-07-12 A thrilling, eye-popping look at true crime in the billion-dollar art world. The art world is one of the most secretive of global businesses, and the list of its crimes runs long and deep. Today, with prices in the hundreds of millions for individual artworks, and billionaires' collections among the most conspicuous and liquid of their assets, crime is more rampant than ever in this largely unregulated universe. Increased prices and globalization have introduced new levels of fraud and malfeasance into the art world--everything from artnapping, in which an artwork is held hostage and only returned for a ransom, to forgery and tax fraud. However, the extent of the economic and cultural damage that results from criminality in the global art scene rarely comes to light. The stories of high-stakes, brazen art crimes told by art experts Stefan Koldehoff and Tobias Timm are by turns thrilling, disturbing, and unbelievable (the imagination for using art to commit crimes seems boundless). The authors also provide a well-founded analysis of what needs to change in the art market and at museums. From the authors of False Pictures, Real Money (about the Beltracchi art forgery case), Art and Crime includes a chapter on art owned by Donald Trump. It is a thoroughly researched, explosive, and highly topical book that uncovers the extraordinary and multifarious thefts of art and cultural objects around the world.

*The Digital Scholar: Academic Communication in Multimedia Environment* Irena Vassileva, Mariya Chankova, Esther Breuer, Klaus P. Schneider, 2020-02-07 The forms and genres of academic communication have changed considerably over the past decades - from standardised ways of producing texts on/for paper to a (less?) standardised way of communication in Web 2.0. Published papers are now available to a greater number of readers, interaction among colleagues can take place in real time via written, audio or visual formats, and it has

become much more comfortable for students as well as for those outside the scientific community to access academic information and to contact its authors. It seems, however, that many aspects of academic communication have not yet changed, and its participants – either in the „old“ or in the „new“ generation – are ill-equipped to work within the multimedia context. This volume, therefore, takes a look at academic communication in the multimedia environment, in order to throw light on how these processes are linked to new multimedia affordances, while at the same time encapsulating old genre conventions and participant interaction with the medium.

**Digital Image Forensics** Aniket Roy, Rahul Dixit, Ruchira Naskar, Rajat Subhra Chakraborty, 2019-05-13 This book discusses blind investigation and recovery of digital evidence left behind on digital devices, primarily for the purpose of tracing cybercrime sources and criminals. It presents an overview of the challenges of digital image forensics, with a specific focus on two of the most common forensic problems. The first part of the book addresses image source investigation, which involves mapping an image back to its camera source to facilitate investigating and tracing the source of a crime. The second part of the book focuses on image-forgery detection, primarily focusing on “copy-move forgery” in digital images, and presenting effective solutions to copy-move forgery detection with an emphasis on additional related challenges such as blur-invariance, similar genuine object identification, etc. The book concludes with future research directions, including counter forensics. With the necessary mathematical information in every chapter, the book serves as a useful reference resource for researchers and professionals alike. In addition, it can also be used as a supplementary text for upper-undergraduate and graduate-level courses on “Digital Image Processing”, “Information Security”, “Machine Learning”, “Computer Vision” and “Multimedia Security and Forensics”.

**Anxiety Happens** John P. Forsyth, Georg H. Eifert, 2018-04-01 Break free from anxiety—once and for all! From the authors of The Mindfulness and Acceptance Workbook for Anxiety, this powerful yet portable guide offers fifty-two in-the-moment mindfulness strategies you can use anytime, anywhere to cultivate calm and radically transform your life. We live in an age of anxiety, and studies show that it’s only getting worse. Anxiety forces itself into our awareness and can deplete our energy, resources, and resolve. It screams “pay attention to me—or else.” We may confront it the moment we wake up in the morning, and it can even keep us from getting to sleep at night. In short, it can run our lives. But it doesn’t have to be this way. Building on the success of The Mindfulness and Acceptance Workbook for Anxiety, this quick reference guide offers fifty-two simple tools and strategies—one for each week of the year—based in proven-effective acceptance and commitment therapy (ACT) to help you break free from worry, fear, and panic. In addition to “in-the-moment” tools for staying calm, you’ll learn about the underlying causes of your anxiety, why avoidance just doesn’t work, how to move past your negative inner voice, and how focusing on your values can help you move past anxiety and live a rich, meaningful life. If—like many people—you’re fed up with anxiety getting in the way of living your life, the powerful little exercises in this guide will show you how to break the cycle of anxiety for good. This book has been selected as an Association for Behavioral and Cognitive Therapies Self-Help Book Recommendation—an honor bestowed on outstanding self-help books that are consistent with cognitive behavioral therapy (CBT) principles and that incorporate scientifically tested strategies for overcoming mental health difficulties. Used alone or in conjunction with therapy, our books offer powerful tools readers can use to jump-start changes in their lives.

**Models of Authority and Debate in the Gospel of Mary** Bokyoung Kim, 2020 This book takes a narrative-critical approach to the meaning and function of debate in the Gospel of Mary. The debate scene in the Gospel of Mary has been interpreted with the assumed framework of the Gnostic-orthodox conflict and feminist biblical studies' particular interest in the gender issue. When approached narrative-critically, the portrayal of the debate is fundamentally concerned with the narrative's rhetoric of persuasion. The function of the debate scene is meant to make truth-authority claims by appealing to the authority of divine revelation and the authority of the shared knowledge about Mary, the Savior's favorite, according to the two models of authority, which were widely used in antiquity (i.e., revelatory authority and literary authority). Scholars and students who are interested in early Christian texts and methods of interpretation could use this book to gain a new look into the meaning of the texts, especially the roles of the interactions among the characters.

*Acting Together* Nicolas Lindner, 2020

*Pluralisation of Theologies at European Universities* Wolfram Weiße, Julia Ipgrave, Oddbjørn Leirvik, Muna Tatari, 2020 This publication assumes that the modern context of plurality requires universities and higher education to support studying plural religious traditions in depth, giving due consideration to plural religious and secular perspectives, and providing opportunities for interaction between them. There are various ways to realise these aims. Success may be supported (or hindered) by various structures and concepts prevalent in universities or by different schools of thought on the nature of religions, on their relation to each other, and on their place in society. Religions and theologies can be studied in parallel, in cooperation, in dialogue, or through integrative approaches. The differing theoretical positions and contextual conditions (institutional, social, political) within which (inter)religious learning takes place are an important focus of this publication, both for the possibilities they open up and the limitations they pose. This publication builds on the presentations and discussions of scholars participating at a conference at the University of Hamburg in December 2018, with some additional contributions from others in the field who were unable to attend in person.
