Exploring Zynq Mpsoc CROCKETT H. DAVID LOUISE (NORTHCOTE. CRAIG, RAMSAY.), Northcote David, Ramsay Craig, 2019-04-11 This book introduces the Zynq MPSoC (Multi-Processor System-on-Chip), an embedded device from Xilinx. The Zynq MPSoC combines a sophisticated processing system that includes ARM Cortex-A53 applications and ARM Cortex-R5 real-time processors, with FPGA programmable logic. As well as guiding the reader through the architecture of the device, design tools and methods are also covered in detail: both the conventional hardware/software co-design approach, and the newer software-defined methodology using Xilinx's SDx development environment. Featured aspects of Zynq MPSoC design include hardware and software development, multiprocessing, safety, security and platform management, and system booting. There are also special features on PYNQ, the Python-based framework for Zynq devices, and machine learning applications. This book should serve as a useful guide for those working with Zynq MPSoC, and equally as a reference for technical managers wishing to gain familiarity with the device and

its associated design methodologies.

Calm Within the Storm Robyne Hanley-Dafoe,2021-03-23 Robyne Hanley-Dafoe, *Calm Within the Storm* - Won Silver in the Psychology/Mental & Emotional Well-Being category. A tender, powerful, and achievable path to the everyday resiliency we all need to navigate the uncertainty in our lives. An inspiring new voice in resiliency, Dr. Robyne Hanley-Dafoe believes that our modern conception of resiliency as “fighting” or being “tougher” is misguided. Learning happens when we are able to trust and feel safe; fear and shame are barriers, not facilitators, for authentic growth, acceptance, and change. In *Calm Within the Storm*, Dr. Robyne maps out a kinder approach to taking on the challenges of life and developing authentic self-alignment and balance.By focusing on research-informed, sustainable, and achievable personal development practices, Dr. Robyne presents a new, attainable model for everyday resiliency—one that everyone can use to feel more grounded and capable. She identifies the obstacles that derail us and keep us stuck, and shows us how to enact our resiliency through stories, research, and practical strategies.

The Design Warrior's Guide to FPGAs Clive Maxfield, 2004-06-16 Field Programmable Gate Arrays (FPGAs) are devices that provide a fast, low-cost way for embedded system designers to customize products and deliver new versions with upgraded features, because they can handle very complicated functions, and be reconfigured an infinite number of times. In addition to introducing the various architectural features available in the latest generation of FPGAs, *The Design Warrior's Guide to FPGAs* also covers different design tools and flows. This book covers information ranging from schematic-driven entry, through traditional HDL/RTL-based simulation and logic synthesis, all the way up to the current state-of-the-art in pure C/C++ design capture and synthesis technology. Also discussed are specialist areas such as mixed hardware/software and DSP-based design flows, along with innovative new devices such as field programmable node arrays (FPNAs). Clive Maxfield is a bestselling author and engineer with a large following in the electronic design automation (EDA) and embedded systems industry. In this comprehensive book, he covers all the issues of interest to designers working with, or contemplating a move to, FPGAs in their product designs. While other books cover fragments of FPGA technology or applications this is the first to focus exclusively and comprehensively on FPGA use for embedded systems. First book to focus exclusively and comprehensively on FPGA use in embedded designs World-renowned best-selling author Will help engineers get familiar and succeed with this new technology by providing much-needed advice on choosing the right FPGA for any design project

Politics of Nature Bruno Latour, 2009-06-30 A major work by one of the more innovative thinkers of our time, *Politics of Nature* does nothing less than establish the conceptual context for political ecology--transplanting the terms of ecology into more fertile philosophical soil than its proponents have thus far envisioned. Bruno Latour announces his project dramatically: Political ecology has nothing whatsoever to do with nature, this jumble of Greek philosophy, French Cartesianism and American parks. Nature, he asserts, far from being an obvious domain of reality, is a way of assembling political order without due process. Thus, his book proposes an end to the old dichotomy between nature and society--and the constitution, in its place, of a collective, a community incorporating humans and nonhumans and building on the experiences of the sciences as they are actually practiced. In a critique of the distinction between fact and value, Latour suggests a redescription of the type of political philosophy implicated in such a commonsense division--which here reveals itself as distinctly uncommonsensical and in fact fatal to democracy and to a healthy development of the sciences. Moving beyond the modernist institutions of mononaturalism and multiculturalism, Latour develops the idea of multinaturalism, a complex collectivity determined not by outside experts claiming absolute reason but by diplomats who are flexible and open to experimentation. Table of Contents: Introduction: What Is to Be Done with Political Ecology? 1. Why Political Ecology Has to Let Go of Nature First, Get Out of the Cave Ecological Crisis or Crisis of Objectivity? The End of Nature The Pitfall of Social Representations of Nature The Fragile Aid of Comparative Anthropology What Successor for the Bicameral Collective? 2. How to Bring the Collective Together Difficulties in Convoicing the Collective First Division: Learning to Be Circumspect with Spokespersons Second Division: Associations of Humans and Nonhumans Third Division between Humans and Nonhumans: Reality and Recalcitrance A More or Less Articulated Collective The Return to Civil Peace 3. A New Separation of Powers Some Disadvantages of the Concepts of Fact and Value The Power to Take into Account and the Power to Put in Order The Collective's Two Powers of Representation Verifying That the Essential Guarantees Have Been Maintained A New Exteriority 4. Skills for the Collective The Third Nature and the Quarrel between the Two Eco Sciences Contribution of the Professions to the Procedures of the Houses The Work of the Houses The Common Dwelling, the Oikos 5. Exploring Common Worlds Time's Two Arrows The Learning Curve The Third Power and the Question of the State The Exercise of Diplomacy War and Peace for the Sciences Conclusion: What Is to Be Done? Political Ecology! Summary of the Argument (for Readers in a Hurry...) Glossary Notes Bibliography Index From the book: What is to be done with political ecology? Nothing. What is to be done? Political

ecology! All those who have hoped that the politics of nature would bring about a renewal of public life have asked the first question, while noting the stagnation of the so-called green movements. They would like very much to know why so promising an endeavor has so often come to naught. Appearances notwithstanding, everyone is bound to answer the second question the same way. We have no choice: politics does not fall neatly on one side of a divide and nature on the other. From the time the term politics was invented, every type of politics has been defined by its relation to nature, whose every feature, property, and function depends on the polemical will to limit, reform, establish, short-circuit, or enlighten public life. As a result, we cannot choose whether to engage in it surreptitiously, by distinguishing between questions of nature and questions of politics, or explicitly, by treating those two sets of questions as a single issue that arises for all collectives. While the ecology movements tell us that nature is rapidly invading politics, we shall have to imagine - most often aligning ourselves with these movements but sometimes against them - what a politics finally freed from the sword of Damocles we call nature might be like.
