Sharing Professional Knowledge on Web 2.0 and beyond Giuliana Garzone (ed.),2020-05-27T00:00:00+02:00 In recent years, the use of Web-mediated digital technologies has constantly grown in importance, reshaping the communication landscape in all professional activities. Web 2.0 applications and platforms have evolved dramatically, exceeding all expectations, and have had an impact on all areas of activity, from personal and social to political and economic. A crucial role in this radical transformation has been played by social media, i.e. online resources enabling users to connect, interact, and share contents. They have changed social relations profoundly on an individual level, but also in their professional dimensions, transforming the dynamics of how professionals work, share knowledge and relate to each other and to their clients. This book explores online professional blogging and networking platforms, discussing methodological issues involved in analysing webmediated professional communication in a genre- and discourse- analytical perspective, with a focus on the structural and textual properties of genres on the Internet. The discursive objects investigated include professional weblogs, and in particular law blogs, professional groups on Facebook and LinkedIn, and LinkedIn job ads. Among the aspects examined are continuity with pre-existing traditional genres, generic integrity, and the debated status of social networking sites as platform users' communities of practice.

The Infinite Game Simon Sinek,2019-10-15 From the New York Times bestselling author of Start With Why and Leaders Eat Last, a bold framework for leadership in today's ever-changing world. How do we win a game that has no end? Finite games, like football or chess, have known players, fixed rules and a clear endpoint. The winners and losers are easily identified. Infinite games, games with no finish line, like business or politics, or life itself, have players who come and go. The rules of an infinite game are changeable while infinite games have no defined endpoint. There are no winners or losers—only ahead and behind. The question is, how do we play to succeed in the game we're in? In this revelatory new book, Simon Sinek offers a framework for leading with an infinite mindset. On one hand, none of us can resist the fleeting thrills of a promotion earned or a tournament won, yet these rewards fade quickly. In pursuit of a Just Cause, we will commit to a vision of a future world so appealing that we will build it week after week, month after month, year after year. Although we do not know the exact form this world will take, working toward it gives our work and our life meaning. Leaders who embrace an infinite mindset build stronger, more innovative, more inspiring organizations. Ultimately, they are the ones who lead us into

the future.

The Billable Hour Annie Dike, 2015

Survey of American Lawyers at Major Law Firms Primary Research Group Staff, 2014 This report looks closely at how lawyers at major law firms track their billable hours and other hours worked. The study helps its readers to answer questions such as: how often do lawyers record their billable and other hours? What are the penalties for tardy or non-submission of timesheets? How do lawyers record time while on the road and how does this differ from their practices while in the office? What percentage of lawyers use paper, or laptops, desktops, tablets or smartphones to record time? How often do they underestimate billable hours for fear of over-billing clients when they lose track of hours worked? What is the economic cost of such actions? What are the most popular billing apps and software programs? What do lawyers recommend to their peers, in terms of apps, software and firm-wide time tracking and billing policies?

Reinventing Professional Services Ari Kaplan, 2011-05-18 How engaging technology and relationships can help you stand out, attract business and achieve a more dynamic professional life The technological landscape has reshaped the way white collar workers cultivate and promote their

businesses. *The Transformation of Professional Services* is an engaging look at how licensed experts are adapting to today's dynamic economic environment. From Ari Kaplan—a recognized advisor on business and career development— *Reinventing Professional Services: Building Your Business in the Digital Marketplace* offers insights on taking advantage of enterprising techniques to stand out and position one's self as an insightful chameleon rather than as an isolated purveyor of facts and figures. Details the importance of offering resources instead of simply selling Reveals strategies for increasing one's searchability and distinguishing one's self in an economic downturn or recovery Offers advice readers can immediately use to strengthen client relationships Written in a straightforward and accessible style, this book provides engaging guidance for anyone in the professional services field—from business consultants, financial advisers, and lawyers to accountants, real estate brokers, and appraisers.

Automating Legal Services Hugh Logue, 2019 The world's fourth industrial revolution—automation through the growth of robotics, artificial intelligence, blockchain, and virtual ecommerce—will disrupt the legal industry. By being open to this change, lawyers can eliminate repetitive, inefficient processes so they can increase the speed, quality, and scale of their legal services. In addition to bolstering the business of law for both big and small firms, this automation will increase access to justice for those who need it most. This book sets out different models and details what firms, lawyers and society, can gain from automated legal services--
