Molecular Microbial Ecology Manual Antoon D. L. Akkermans,Jan Dirk Van Elsas,Frans J. De Bruijn,2014-01-13 For a long time microbial ecology has been developed as a distinct field within Ecology. In spite of the important role of microorganisms in the environment, this group of 'invisible' organisms remained unaccessible to other ecologists. Detection and identification of microorganisms remain largely dependent on isolation techniques and characterisation of pure cultures. We now realise that only a minor fraction of the microbial community can be cultivated. As a result of the introduction of molecular methods, microbes can now be detected and identified at the DNA/RNA level in their natural environment. This has opened a new field in ecology: Molecular Microbial Ecology. In the present manual we aim to introduce the microbial ecologist to a selected number of current molecular techniques that are relevant in microbial ecology. The first edition of the manual contains 33 chapters and an equal number of additional chapters will be added this year. Since the field of molecular ecology is in a continuous progress, we aim to update and extend the Manual regularly and will invite anyone to deposit their new protocols in full detail in the next edition of this Manual. We hope this book finds its place where it was born: at the lab bench! Antoon D.L. Literature of Java Theodore G. TH. Pigeaud,2013-06-29 The third, concluding volume of Literature of Java contains Addenda and a General Index, preceded by Illustrations, Facsimiles of Manuscripts, Maps and some Minor Notes, additions which may be of use to students of Javanese literature. The older catalogues of collections of Indonesian manuscripts (Javanese, Malay, Sundanese, Madurese, Balinese), which were written in Dutch, did not offer such additional aids to interested readers. One of the reasons was, that the authors (Vreede, Brandes, van Ronkel, Juynboll, Berg) presupposed a certain knowledge of the Indonesian peoples, their countries and their culture with Dutch students. As often as not the latter, or their families, had lived for many years in Java, and they were destined, when they had completed their studies in The Netherlands, to pass one or more decades of 'their active life in the tropics in the service of Government, the Christian Missions or the Bible Society. The Archipelago was their second home country. Some familiarity with things Indonesian was found in several circles of society in The Netherlands before the second world war, and information (though not always scholarly and exact) was supplied by quite a number of books and periodicals. For this reason it was thought superfluous to encumber specialistic books like catalogues of manuscripts with maps and general information which could be found easily elsewhere, for instance in the Dutch Encyclopaedie van Nederlandsch-Indie. As circumstances have changed it is.

Testing for Learning Ruth Mitchell,2010-05-11 Arguing that traditional, test-based evaluation has a negative effect on many students, this book describes new methods of assessing student performance.

Thoughts on Design Paul Rand,2014-08-19 One of the seminal texts of graphic design, Paul Rand's Thoughts on Design is now available for the first time since the 1970s. Writing at the height of his career, Rand articulated in his slender volume the pioneering vision that all design should seamlessly integrate form and function. This facsimile edition preserves Rand's original 1947 essay with the adjustments he made to its text and imagery for a revised printing in 1970, and adds only an informative and inspiring new foreword by design luminary Michael Bierut. As relevant today as it was when first published, this classic treatise is an indispensable addition to the library of every designer.
