Grown and Flown Lisa Heffernan, Mary Dell Harrington, 2019-09-03 PARENTING NEVER ENDS. From the founders of the #1 site for parents of teens and young adults comes an essential guide for building strong relationships with your teens and preparing them to successfully launch into adulthood The high school and college years: an extended roller coaster of academics, friends, first loves, first break-ups, driver's ed, jobs, and everything in between. Kids are constantly changing and how we parent them must change, too. But how do we stay close as a family as our lives move apart? Enter the co-founders of Grown and Flown, Lisa Heffernan and Mary Dell Harrington. In the midst of guiding their own kids through this transition, they launched what has become the largest website and online community for parents of fifteen to twenty-five year olds. Now they've compiled new takeaways and fresh insights from all that they've learned into this handy, must-have guide. Grown and Flown is a one-stop resource for parenting teenagers, leading up to—and through—high school and those first years of independence. It covers everything from the monumental (how to let your kids go) to the mundane (how to shop for a dorm room). Organized by topic—such as academics, anxiety and mental health, college life—it features a combination of stories, advice from professionals, and practical sidebars. Consider this your parenting lifeline: an easy-to-use manual that offers support and perspective. Grown and Flown is required reading for anyone looking to raise an adult with whom you have an enduring, profound connection.

Australia's Worst Disasters Malcolm Brown, 2010-11-01 Graphic accounts of Australia's worst disasters ? historical as well as events of recent years. From the Ash Wednesday bushfires of 1983 to the implosion of the Royal Canberra Hospital in 1997, and from the shocking Granville railway crash in 1977 to the Sea King helicopter crash of 2005, Australia's history has been punctuated by incidents of disaster and tragedy that have shocked us all. Sometimes warning signs were not read (or were ignored); sometimes human error was to blame. These graphic and compelling accounts by veteran Sydney Morning Herald journalist Malcolm Brown and other award-winning journalists tell us far more than simply what happened - they provide unique insights into the impact of these events on the lives of innocent people. And, interspersed with stories of death and destruction, are heart-warming accounts of courage, grace and just plain good luck.

SAS Tracking Handbook Barry Davies, 2014-08-05 Tracking originated with man's need for food; he needed to understand what he was following and what the rewards would be if he was successful. Little has changed over time about the terms of tracking. We still track game for sport and food, but we have also found other uses for tracking. Border police patrol to stop illegal immigrants from entering their country; the military tracks down wanted terrorists or enemy forces. Tracking has become a military skill. In the SAS Tracking Handbook, former SAS soldier and British Empire Medal (BEM) award-winner Barry Davies teaches not only how to survive in the outdoors with the skills of tracking, but how to use these skills from a military standpoint. Included in this book are many helpful tips on topics including: The types of dogs used for tracking. Traps for catching wild animals. Modern military tracking. Using your surroundings to your advantage. And much more. The success or failure of the modern tracker is dependent on the personal skills of the individual tracker. Training is vital in learning tracking skills, and continuous exercise the best way to interpret signs. These skills are rarely found, but they remain hidden deep within all of us. So whether you're already a skilled tracker or a novice in the field, the SAS Tracking Handbook will be your guide to mastering this old and respected art.

Unabomber Chris Waits, Dave Shors, 2014-05-27 When the Unabomber suspect was arrested at a cabin outside Lincoln, Montana, in 1996 no one was more surprised than his neighbor of 25 years, Chris Waits. Now Waits, whom ABC News described as the "man who knew him best," has stepped forward with his significant portrait of Kaczynski. He teamed with veteran Montana newsman Dave Shors to write a riveting story about the secret years in Lincoln. Waits was the only person who could tell this story, which includes a compelling mix of personal observations. Waits shares copies of Kaczynski documents and personal journals obtained from the FBI, most of which have never been published before.

Coding Properties in Invertebrate Sensory Systems Sylvia Anton, Anders Garm, Berthold G. Hedwig, 2017-03-07 Animals rely on sensory input from their environment for survival and reproduction. Depending on the importance of a signal for a given species, accuracy of sensory coding might vary from pure detection up to precise coding of intensity, quality and temporal features of the signal. Highly sophisticated sense organs and related central nervous sensory pathways can be of utmost importance for animals in a complex environment and when using advanced communication systems. In sensory systems different anatomical and physiological features have evolved to optimally encode behaviourally relevant signals at the level of sense organs and central processing. The wide range of organizational complexity, in combination with their relatively simple and accessible nervous systems, makes invertebrates excellent models to study general sensory coding principles. The contributions to this e-book illustrate on one hand particular features of specific sensory systems, and on the other hand indicate not only common features of sensory coding across invertebrate phyla, but also similar processing principles of complex stimuli between different sensory modalities. The chapters show that the extraction of behaviourally relevant signals from all environmental stimuli, as well as the detection of low intensity signals and the analysis of temporal features can be similar across sensory modalities, including olfaction, vision, mechanoreception, and heat perception.

Macintosh Programming Secrets Scott Knaster, 1988 Apple insider Knaster explains the art of Macintosh programming with heart and humor. Part one discusses the history and philosophy behind the Macintosh, the theories and ideas that have made it what it is, including requiring programmers to think about things they may not have ever considered as part of programming--like user interface designs. Part two examines the interesting and clever techniques that can make programs slicker and easier to use, while maintaining compatibility with Apple's user interface guidelines.

The Book Your Dog Wishes You Would Read Louise Glazebrook,2021-11-18 'Britain's top dog whisperer... a canine-human Esther Perel' The Observer Wouldn't you love to know what your dog was thinking? The truth is that your dog is communicating with you all the time but, unless you know the signs, you aren't picking up on what your dog wants you to know. Louise Glazebrook is a dog behaviourist, trainer and television presenter who specialises in teaching people how to understand and connect with their dogs. In *The Book Your Dog Wishes You Would Read*, Louise tackles everything from bringing the right dog home, understanding body language and breed behaviour, responding to common behavioural issues, to the toys and games that you and your dog will both love. Most dog trainers focus on the dog, but Louise focuses on you, the owner, giving you the skills and confidence to interpret your dog's needs and behaviour and build a better, happier relationship for life.
