Ultrashort Pulse Laser Technology Stefan Nolte,Frank Schrempel,Friedrich Dausinger,2015-10-19 Ultrashort laser pulses with durations in the femtosecond range up to a few picoseconds provide a unique method for precise materials processing or medical applications. Paired with the recent developments in ultrashort pulse lasers, this technology is finding its way into various application fields. The book gives a comprehensive overview of the principles and applications of ultrashort pulse lasers, especially applied to medicine and production technology. Recent advances in laser technology are discussed in detail. This covers the development of reliable and cheap low power laser sources as well as high average power ultrashort pulse lasers for large scale manufacturing. The fundamentals of laser-matter-interaction as well as processing strategies and the required system technology are discussed for these laser sources with respect to precise materials processing. Finally, different applications within medicine, measurement technology or materials processing are highlighted.

The New Industrial Revolution Peter Marsh,2012-07-17 Explores more than 250 years of manufacturing history, arguing that the rise of China and India is not necessarily the death knell of the U.S., U.K., German and Japanese economies, if only those nations can adapt.
