Managing eBook Metadata in Academic Libraries Donna E Frederick, 2016-01-07 Managing eBook Metadata in Academic Libraries: Taming the Tiger tackles the topic of ebooks in academic libraries, a trend that has been welcomed by students, faculty, researchers, and library staff. However, at the same time, the reality of acquiring ebooks, making them discoverable, and managing them presents library staff with many new challenges. Traditional methods of cataloging and managing library resources are no longer relevant where the purchasing of ebooks in packages and demand driven acquisitions are the predominant models for acquiring new content. Most academic libraries have a complex metadata environment wherein multiple systems draw upon the same metadata for different purposes. This complexity makes the need for standards-based interoperable metadata more important than ever. In addition to complexity, the nature of the metadata environment itself typically varies slightly from library to library making it difficult to recommend a single set of practices and procedures which would be relevant to, and effective in, all academic libraries. Considering all of these factors together, it is not surprising when academic libraries find it difficult to create and manage the metadata for their ebook collections. This book is written as a guide for metadata librarians, other technical services librarians, and ancillary library staff who manage ebook collections to help them understand the requirements for ebook metadata in their specific library context, to create a vision for ebook metadata management, and to develop a plan which addresses the relevant issues in metadata management at all stages of the lifecycle of ebooks in academic libraries from selection, to deselection or preservation. Explores the reasons behind creating records for our resources and challenges libraries to think about what that means for their context Discusses the complex nature of academic libraries and the electronic resources they require Encourages librarians to find their own way to manage metadata

Dying in Full Detail Jennifer Malkowski, 2017-02-03 In *Dying in Full Detail* Jennifer Malkowski explores digital media's impact on one of documentary film's greatest taboos: the recording of death. Despite technological advances that allow for the easy creation and distribution of death footage, digital media often fail to live up to their promise to reveal the world in greater fidelity. Malkowski analyzes a wide range of death footage, from feature films about the terminally ill (*Dying*, *Silverlake Life*, *Sick*), to surreptitiously recorded suicides (*The Bridge*), to #BlackLivesMatter YouTube videos and their precursors. Contextualizing these recordings in the long history of attempts to capture the moment of death in American culture, Malkowski shows how digital media are unable to deliver death in full detail, as its metaphysical truth remains beyond representation. Digital technology's capacity to record death does, however, provide the opportunity to politicize individual deaths through their representation. Exploring the relationships among technology, temporality, and the ethical and aesthetic debates about capturing death on video, Malkowski illuminates the key roles documentary death has played in twenty-first-century visual culture.

PRANIC NOURISHMENT - Nutrition for the New Millennium - Living on Light Series Jasmuheen, 2007-08-01 NEW 2012 UPDATED VERSION - *Pranic Nourishment*, also called *Living on Light*, is Jasmuheen's fourth book of metaphysical interest. It is a fascinating story of her personal journey into being physically sustained purely by Light. It also touches on physical immortality, spirituality and sexuality, new millennium relationships and mind mastery utilizing the powerful programming of Dimensional Biofield Science. Pioneering new yet ancient pathways, many are now exploring the option of neither being a meat eater, a vegetarian, a vegan, a fruitarian but rather a 'liquidarian' or an individual sustained and nourished purely by the Light of their own Divine nature. Formerly a 'state of being' reserved for, or attributed to, the Holy men, Saints or Sages of the East; the process described in this text offers a practical and spiritual alternative for those wishing to practically begin to embrace physical immortality, cease the aging process or simply 'live on Light'.

The Decline Effect Dean Brooks, A crisis is coming for everyone who uses math and science. For decades now, the

classical model of probability (the indifference principle and the Gaussian distribution) has been breaking down and revealing its limitations in fields from economics to epidemiology. Now a new approach has revealed the underlying non-classical principle behind all these 'anomalous' laws: – Pareto's law of elite incomes – Zipf's law of word frequencies – Lotka's law of scientific publications – Kleiber's law of metabolic rates – the Clausewitz-Dupuy law of combat friction – Moore's law of computing costs – the Wright-Henderson cost law – Weibull's law of electronics failures – the Flynn Effect in IQ scores – Benford's law of digit frequencies – Farr's law of epidemics – Hubbell's neutral theory of biodiversity – Rogers' law of innovation classes – Wilson's law of island biogeography – Smeed's law of traffic fatalities The general law behind all these particular laws (and countless others) is the decline effect. As a system ages or grows in size, the rules of probability subtly change. Entropy increases, rare items become rarer, and average performance measures decline. The human meaning of a decline may be positive (decreasing costs, falling epidemic mortality) or negative (lower customer loyalty, decreasing efficiency), but the mathematical pattern is always the same. The implications are enormous, as these examples show: All epidemic diseases decline in infectiousness and in lethality. HIV-AIDS went from a highly infectious, 95-percent fatal disease, to a survivable condition with a latency of decades. COVID-19 went from a death rate of 7 percent in early 2020, to under 2 percent in 2022. Hereditary dynasties around the world declined smoothly in lifespan, from hundreds of years to tens of years. When democracies replaced monarchies, the decline (in spans of party control) continued.

The Rise of Clickocracy: Politics for a Digital Age Justin Cash,

Meganets David B. Auerbach, 2023-03-14 How the autonomous digital forces jolting our lives – as uncontrollable as the weather and plate tectonics – are transforming life, society, culture, and politics. David Auerbach's

exploration of the phenomenon he has identified as the meganet begins with a simple, startling revelation: There is no hand on the tiller of some of the largest global digital forces that influence our daily lives: from corporate sites such as Facebook, Amazon, Google, YouTube, Instagram, and Reddit to the burgeoning metaverse encompassing cryptocurrencies and online gaming to government systems such as China's Social Credit System and India's Aadhaar. As we increasingly integrate our society, culture and politics within a hyper-networked fabric, Auerbach explains how the interactions of billions of people with unfathomably large online networks have produced a new sort of beast: ever-changing systems that operate beyond the control of the individuals, companies, and governments that created them. Meganets, Auerbach explains, have a life of their own, actively resisting attempts to control them as they accumulate data and produce spontaneous, unexpected social groups and uprisings that could not have even existed twenty years ago. And they constantly modify themselves in response to user behavior, resulting in collectively authored algorithms none of us intend or control. These enormous invisible organisms exerting great force on our lives are the new minds of the world, increasingly commandeering our daily lives and inner realities. Auerbach's analysis of these gargantuan opaque digital forces yield important insights such as: The conventional wisdom that the Googles and Facebook of this world are tightly run algorithmic entities is a myth. No one is really in control. The efforts at reform - to get lies and misinformation off meganets - run into a brick wall because the companies and executives who run them are trapped by the persistent, evolving, and opaque systems they have created. Bitcoin and other cryptocurrencies are uncontrollable and their embrace by elite financial institutions threatens the entire economy. We are asking the wrong questions in assuming that if only the Facebooks of this world could be better regulated or broken up that they would be better, more ethical citizens. Why questions such as making algorithms fair and bias-free and whether AI can be a tool for good or evil are wrong and misinformed. Auerbach then comes full circle, showing that while we cannot ultimately control meganets we can tame them through the counterintuitive measures he describes in detail.

Intellectual Property in Common Law and Civil Law Toshiko Takenaka, 2013-01-01
 Intellectual Property in Common Law and Civil Law presents the perspectives of common as well as civil law, on global IP Law's most pertinent issues ranging from inventive step all the way to injunctive relief. Edited by Professor Takenaka, director of the University of Washington's renowned Center for Advanced Studies and Research on IP (CASRIP), the book assembles deep but easy to read essays by some of the world's leading IP scholars. In short, IP Law's most important issues from a global perspective; by the world's leading scholars, yet in a nutshell. Excellent!
 Christoph Ann, Technische Universität München, Germany
 Despite increasing worldwide harmonization of intellectual property, driven by US patent reform and numerous EU Directives, the common law and civil law traditions still exert powerful and divergent influences on certain features of national IP systems. Drawing together the views and experiences of scholars and lawyers from the United States, Europe and Asia, this book examines how different characteristics embedded in national IP systems stem from differences in the fundamental legal principles of the two traditions. It questions whether these elements are destined to remain diverged, and tries to identify common

ground that might facilitate a form of harmonization. Containing the most current and up-to-date IP issues from a global perspective, this book will be a valuable resource for IP and comparative law academics, law students, policy makers, as well as lawyers and in-house counsels.
