*NETWORKING 2006. Networking Technologies, Services, Protocols; Performance of Computer and Communication Networks; Mobile and Wireless Communications Systems* Fernando Boavida, Thomas Plagemann, Burkhard Stiller, Cedric Westphal, Edmundo Monteiro, 2006-04-27 Here are the refereed proceedings of the 5th International IFIP-TC6 Networking Conference, NETWORKING 2006. The 88 revised full papers and 31 poster papers are organized in topical sections on caching and content management, mobile ad-hoc networks, mobility/handoff, monitoring/measurements, multicast, multimedia, optical networks, peer-to-peer, resource management and QoS, routing, topology and location awareness, traffic engineering, transport protocols, wireless networks, and wireless sensor

networks.

**NETWORKING 2009** Luigi Fratta, Henning Schulzrinne, Yutaka Takahashi, Otto Spaniol, 2009-05-07 “What a difference a year makes – 52 little weeks” This variation of the first line from Dinah Washington’s famous song, which originally reads, “What a difference a day makes – 24 little hours,” brings it to the point:

According to all experts, the press, and most people’s impression we are today in a serious economic recession. Less than one year ago, we practically lived on the “island of the blessed” (namely, at Networking 2008 that was held on the island of Singapore), or in the famous country where “milk and honey flow” (or “where wine and liquor flow”). This convenient situation has changed abruptly within less than 52 weeks. It looks like the same kind of problems has emerged in all areas – and the “Networking” area has, of course, been affected, too. Looking into the 2009 proceedings, however, you will immediately notice that the manuscripts are largely unaffected by any aspect of the economic crisis (which should be a bit of a consolation). Apparently, research directions are dictated by a process that is all too sluggish in order to be quickly and radically changed by a “tsunami.” Likewise, the conference itself was prepared in spite of such a crisis.

The 99 revised full papers and 30 poster papers cover ad hoc and sensor networks, wireless networks, and the next generation internet.
