**Zoomscape** Mitchell Schwarzer,2004-03 Although a few among us are intrepid architectural tourists, visiting buildings and landscapes our cameras at the ready, most of us experience architecture through the windshield of a moving vehicle, the architectural experience reduced to a blurry and momentary drive-by. And the rest of our architectural tourism is through the images of cameras, movies, and television programs -- that is, through the lens of another's eye. Architectural hisotrian Mitchell Schwarzer calls this new mediated architectural experience the zoomscape. In this thought-provoking book, he argues that the perception of architecture has been fundamentally altered by the technologies of transportation and the camera -- we now look at buildings, neighborhoods, cities, and even entire continents as we ride in trains, cars, and planes, and/or as we view photographs, movies, and television. Zoomscape shows how we now perceive buildings and places at high speeds, across great distances, through edited and multiple reproductions. Nowadays, our views of the architectural landscape are modulated by the accelerator pedal and the remote control, by studio production techniques and airplane flight paths. Using examples from high art and popular culture -- from the novels of Don DeLillo to the opening credits of *The Sopranos* -- Mitchell Schwarzer shows that the zoomscape has brought about unprecedented and often marvelous new ways of perceiving the built environment.

**Toward a Global Idea of Race** Denise Ferreira Da Silva, In this far-ranging and penetrating work, Denise Ferreira da Silva asks why, after more than five hundred years of violence perpetrated by Europeans against people of color, is there no ethical outrage? Rejecting the prevailing view that social categories of difference such as race and culture operate solely as principles of exclusion, Silva presents a critique of modern thought that shows how racial knowledge and power produce global space. Looking at the United States and Brazil, she argues that modern subjects are formed in philosophical accounts that presume two ontological moments—historicity and globality—which are refigured in the concepts of the nation and the racial, respectively. By displacing historicity’s ontological prerogative, Silva proposes that the notion of racial difference governs the present global power configuration because it institutes moral regions not covered by the leading post-Enlightenment ethical ideals—namely, universality and self-determination. By introducing a view of the racial as the signifier of globality, *Toward a Global Idea of Race* provides a new basis for the investigation of past and present modern social processes and contexts of subjection. Denise Ferreira da Silva is associate professor of ethnic studies at University of California, San Diego.

**Urban Forms and Colonial Confrontations** Zeynep Çelik,1997 During its long history as the French colonial city par excellence, Algiers was the site of recurrent conflicts between colonizer and colonized. Through architecture and urban forms confrontations were crystallized, cultural identities were defined, and social engineering programs were shaped and challenged. In this pathbreaking book, Zeynep Çelik reads the city of Algiers as the site of social, political, and cultural conflicts during the 132 years of French occupation and argues that architecture and urban forms are integral components of the colonial discourse. Algiers' city planning, based on what Çelik calls the trial-and-error model of French colonial urbanism, included the fragmentation of the casbah, ambitious Beaux Arts schemes to create European forms of housing, master plans inspired by high modernism, and comprehensive regional plans. Eventually a dramatic housing shortage led all planning efforts to be centered on the construction of large-scale residential enclaves. French architects based their designs for domestic space on the concept of the traditional house, itself an interdisciplinary colonial concept intertwined with the discourse on Algerian women. Housing also offered the French colonizers a powerful presence in a country where periodic resistance to the occupation eventually culminated in a seven-year war of liberation and an end to French rule. Extensively illustrated with photographs, maps, and housing plans, Çelik's book presents a fascinating example of colonial urban planning. Algiers comes alive as a city that reflected all the conflicts of colonialism while embracing innovation. **France and Its Spaces of War** P. Lorcin,D. Brewer,2009-09-28 This book offers a critical study of the cultural and social phenomena of war in the French and French-speaking world through a number of lenses, including memory, gender, the arts, and intellectual history.

**Maps and Civilization** Norman J. W. Thrower,2008-11-15 In this concise introduction to the history of cartography, Norman J. W. Thrower charts the intimate links between maps and history from antiquity to the present day. A wealth of illustrations, including the oldest known map and contemporary examples made using Geographical Information Systems (GIS), illuminate the many ways in which various human cultures have interpreted spatial relationships. The third edition of *Maps and Civilization* incorporates numerous revisions, features new material throughout the book, and includes a new alphabetized bibliography. Praise for previous editions of *Maps and Civilization*: “A marvelous compendium of map lore. Anyone truly interested in the development of cartography will want to have his or her own copy to annotate, underline, and index for handy referencing.”—L. M. Seibert, *Geomatica*

**The Last Odyssey** James Rollins,2020-03-24 To save the world and our future, Sigma Force must embark on a dangerous odyssey into an ancient past whose horrors are all too present in this page-turning thriller from #1 New York Times bestselling author James Rollins that combines cutting-edge science, historical mystery, mythology, and pulse-pounding action. For eons, the city of Troy—whose legendary fall was detailed in Homer’s *Iliad*—was believed to be myth, until archaeologists in the nineteenth century uncovered its ancient walls buried beneath the sands. If Troy was real, how much of Homer’s twin tales of gods and monsters, curses and miracles—*The Iliad* and *The Odyssey*—could also be true and awaiting discovery? In the frozen tundra of Greenland, a group of modern-day researchers stumble on a shocking find: a medieval ship buried a half-mile below the ice. The ship’s hold contains a collection of even older artifacts—tools of war—dating back to the Bronze Age. Inside the captain’s cabin is a magnificent treasure that is as priceless as it is miraculous: a clockwork gold map imbedded with an intricate silver astrolabe. The mechanism was crafted by a group of Muslim inventors—the Banū Mūsā brothers—considered by many to be the Da Vincis of the Arab world—brilliant scientists who inspired Leonardo’s own work. Once activated, the moving map traces the path of Odysseus’s famous ship as it sailed away from Troy. But the route detours as the map opens to reveal a fiery river leading to a hidden realm underneath the

Mediterranean Sea. It is the subterranean world of Tartarus, the Greek name for Hell. In mythology, Tartarus was where the wicked were punished and the monstrous Titans of old, imprisoned. When word of Tartarus spreads—and of the cache of miraculous weapons said to be hidden there—tensions explode in this volatile region where Turks battle Kurds, terrorists wage war, and civilians suffer untold horrors. The phantasmagoric horrors found in Homer’s tales are all too real—and could be unleashed upon the world. Whoever possesses them can use their awesome power to control the future of humanity. Now, Sigma Force must go where humans fear to tread. To prevent a tyrant from igniting a global war, they must cross the very gates of Hell.

**The Deadly Life of Logistics** Deborah Cowen,2014-09-01 In a world in which global trade is at risk, where warehouses and airports, shipping lanes and seaports try to guard against the likes of Al Qaeda and Somali pirates, and natural disaster can disrupt the flow of goods, even our “stuff” has a political life. The high stakes of logistics are not surprising, Deborah Cowen reveals, if we understand its genesis in war. In *The Deadly Life of Logistics*, Cowen traces the art and science of logistics over the last sixty years, from the battlefield to the boardroom and back again. Focusing on choke points such as national borders, zones of piracy, blockades, and cities, she tracks contemporary efforts to keep goods circulating and brings to light the collective violence these efforts produce. She investigates how the old military art of logistics played a critical role in the making of the global economic order—not simply the globalization of production, but the invention of the supply chain and the reorganization of national economies into transnational systems. While reshaping the world of production and distribution, logistics is also actively reconfiguring global maps of security and citizenship, a phenomenon Cowen charts through the rise of supply chain security, with its challenge to long-standing notions of state sovereignty and border management. Though the object of corporate and governmental logistical efforts is commodity supply, *The Deadly Life of Logistics* demonstrates that they are deeply political—and, considered in the context of the long history of logistics, deeply indebted to the practice of war.

*A Theory of the Drone* GrŽgoire Chamayou,2015-01-06 The Parisian research scholar and author of *Manhunts* offers a philosophical perspective on the role of drone technology in today's changing military environments and the implications of drone capabilities in enabling democratic choices. 12,500 first printing.
