Web Standards Leslie Sikos, 2012-01-15 Web Standards: Mastering HTML5, CSS3, and XML provides solutions to the most common website problems, and gives you a deep understanding of web standards and how they can be applied to improve your website. You will learn how to create fully standards-compliant websites and provide search engine-optimized Web documents with faster download times, accurate rendering, correct appearance and layout, lower development cost, approved accessibility, backward and forward compatibility, and easy maintenance and content updating. The book covers all major Web standards, focusing on syntax, grammar, recommended annotations, and other standardization concerns. Web Standards: Mastering HTML5, CSS3, and XML is also a comprehensive guide to current and future standards for the World Wide Web. As a web developer, you'll have seen problems with inconsistent appearance and behavior of the same site in different browsers. Web standards can and should be used to completely eliminate these problems. Web Standards: Mastering HTML5, CSS3, and XML describes how you can make the most of web standards, through technology discussions as well as practical sample code that you can use for your own sites and web applications. It also provides a quick guide to standard website creation for Web developers. Learn techniques and best practices to achieve full standards compliance Write valid markup, styles, and news feeds from scratch or standardize websites by redesign Restrict markup to semantics and provide reliable layout

A History of Water, Series III, Volume 2: Sovereignty and International Water Law Terje Tvedt, Tadesse Kasse Woldetsadik, Owen McIntyre, 2015-05-30 As global climate change threatens to change radically both the political and physical climate with regard to water issues, so a reassessment of some of the fundamental principles of international water law is emerging. One of the most important principles being reassessed is the sovereign equality of states. This volume brings together more than thirty leading international water and legal specialists to explore the development and changing relationship between water, state sovereignty and international law. Offering fresh insights into one of the most pressing issues in global water policy, Sovereignty and International Water Law will form an essential reference for water professionals, legal specialists and policy makers alike.

The National Theatre Story Daniel Rosenthal, 2013-11-07 Winner of the STR Theatre Book Prize 2014 The National Theatre Story is filled with artistic, financial and political battles, onstage triumphs – and the occasional disaster. This definitive account takes readers from the National Theatre's 19th-century origins, through false dawns in the early 1900s, and on to its hard-fought inauguration in 1963. At the Old Vic, Laurence Olivier was for ten years the inspirational Director of the NT Company, before Peter Hall took over and, in 1976, led the move into the National's concrete home on the South Bank. Altogether, the NT has staged more than 800 productions, premiering some of the 20th and 21st centuries' most popular and controversial plays, including Amadeus, The Romans in Britain, Closer, The History Boys, War Horse and One Man, Two Guvnors. Certain to be essential reading for theatre lovers and students, The National Theatre Story is packed with photographs and draws on Daniel Rosenthal's unprecedented access to the National Theatre's own archives, unpublished correspondence and more than 100 new interviews with directors, playwrights and actors, including Olivier's successors as Director (Peter Hall, Richard Eyre, Trevor Nunn and Nicholas Hytner), and other great figures from the last 50 years of British and American drama, among them Edward Albee, Alan Bennett, Judi Dench, Michael Gambon, David Hare, Tony Kushner, Ian McKellen, Diana Rigg, Maggie Smith, Peter Shaffer, Stephen Sondheim and Tom Stoppard.

Financial Regulation in Africa Iwa Salami, 2016-04-15 In the wake of the global financial crisis, there has been a worldwide search for alternative investment opportunities, away from advanced markets. The African continent is now one of the fastest-growing economic regions in the world and represents a viable destination for foreign direct and portfolio investment. This book, which is the first comprehensive analysis of financial integration

and regulation in Africa, fills a huge gap in the literature on financial regulation and would constitute an invaluable source of information to policy makers, investors, researchers and students of financial regulation from an emerging and frontier markets perspective. It considers how financial integration can facilitate African financial markets to achieve their full potential and provides a comparative study with the EU framework for financial integration and regulation. It assesses the implementation of effective and regional domestic infrastructures and how these can be adapted to suit the African context. The book also provides an assessment of government policies towards the integration of financial regulation in keeping with the regional agenda of the African Union (AU) and the African Economic Community (AEC).

SMART - IWRM - Sustainable Management of Available Water Resources with Innovative Technologies - Integrated Water Resources Management in the Lower Jordan Rift Valley : Final Report Phase II Klinger, Jochen, Goldscheider, Nico, Hoetzel, Heinz, 2015-10-01

Proceedings of the International Seminar on Delivering Transpersonal Guidance and Counselling Services in School (ISDTGCCS 2022) Diana Septi Purnama, Mariani Binti Omar, Mohsin Shaikh, Yuli Nurmalasari, Natri Sutanti, Indriyana Rachmawati, 2023-03-23 This is an open access book. Innovation in the guidance and counseling profession is important so that counselors, teachers, or guidance and counseling practitioners can provide optimal services to their counselees. Along with the development of science, creativity and technology in the fields of psychology, education, and guidance and counseling, various innovations and intervention in the implementation of counseling have been carried out. Especially with the Covid-19 pandemic, which is still on going, various creative interventions in counseling have begun to be widely used. Starting from the use of images for therapy or art therapy, dance movement and the use of other creative media to support the counselee. The need for creative media and innovation in the implementation of counseling is very important at this time, considering that during the pandemic the intensity of face-to-face contact with counselees and counselors is quite limited and most of them use online media. Saturation in the use of online media is also possible to occur a lot, therefore with the existence of creative interventions that can be guided by a virtual counselor, it will be very interesting for the counselee as well as having a therapeutic impact. Therefore, an international seminar was held with the theme creative counseling intervention. This activity can be followed by guidance and counseling teachers, counselors or various other mental health practitioners to increase information and knowledge about creative interventions in counseling. In the end, participants can provide creative and effective counseling services to their counselees.

Managing Transboundary Waters of Latin America Asit K. Biswas, 2013-09-13 Definitive analyses of transboundary water management in Latin America are conspicuous by their absence. The situation is a little better for rivers compared to groundwater resources. Transboundary water management in Latin America has been evolving in a somewhat different manner compared to other continents. The book includes eight authoritative case studies of Latin American transboundary rivers and aquifers, as well as a thinkpiece on the complexities of managing aquifers based on global experiences. The case studies are of different scales, ranging from the mighty Amazon to small Silala. The overall focus of the book is on ways in which such difficult and complex rivers and aquifers that are shared by two or more countries can be managed efficiently and equitably, and on the lessons, both positive and negative, that other regions can learn from the Latin American experience. This book was published as a special issue of the International Journal of Water Resources Development.

Disaster Risk Reduction Approaches in Pakistan Atta-Ur- Rahman, Amir Nawaz Khan, Rajib Shaw, 2015-01-20 This book is a pioneering regional work and provides a balanced approach of theory and practice in disaster risk reduction (DRR) in Pakistan. The book analytically discusses the status of DRR and draws examples and lessons from national and community-level programs and projects and events in the country. The book covers different types

of disasters facing Pakistan, including geo-physical and hydro-meteorological hazards. This work incorporates and draws some of the key lessons learned from the pre-disaster and disaster phases to the post-disaster phase, providing an effective framework in the form of those lessons. The rich content is based on a selection of available documents, a consultative workshop with academicians from different universities undertaking DRR higher education programs, and the editors' own knowledge and experience in the field. Special emphasis is given to analyzing field experiences from academic perspectives, and pinpointing key issues and the policy relevance of DRR. Disaster Risk Reduction Approaches in Pakistan is organized into three sections with a total of 20 chapters. Section one provides the outline and basics of DRR strategies applied at the national level with supporting examples from a global review. Section two specifically highlights the wide ranges of hazards experienced in Pakistan and presents examples, policy options, institutional set-ups, risk reduction strategies, and key lessons learned. The third section of the book is given to approaches and issues of DRR practices with examples of disaster responses.

13th International Symposium on Process Systems Engineering - PSE 2018, July 1-5 2018 Mario R. Eden, Gavin Towler, Maria Ierapetritou, 2018-07-19 Process Systems Engineering brings together the international community of researchers and engineers interested in computing-based methods in process engineering. This conference highlights the contributions of the PSE community towards the sustainability of modern society and is based on the 13th International Symposium on Process Systems Engineering PSE 2018 event held San Diego, CA, July 1-5 2018. The book contains contributions from academia and industry, establishing the core products of PSE, defining the new and changing scope of our results, and future challenges. Plenary and keynote lectures discuss real-world challenges (globalization, energy, environment and health) and contribute to discussions on the widening scope of PSE versus the consolidation of the core topics of PSE. Highlights how the Process Systems Engineering community contributes to the sustainability of modern society Establishes the core products of Process Systems Engineering Defines the future challenges of Process Systems Engineering

OECD Environmental Performance Reviews: Italy 2013 OECD, 2013-03-08 This report is the third OECD review of Italy's environmental performance. It evaluates progress towards sustainable development and green growth, with a focus on policies that promote more effective and efficient water management and provide better incentives to tackle climate change.

Japan's Security and Economic Dependence on China and the United States Keisuke Iida, 2017-07-06 With the rise of China, Japan and many East Asian countries are caught between maximizing profit from economic ties with her, and strengthening alliances with the United States to prevent China from overpowering them. Liberals and realists thus debate over the likelihood of either security tensions easing up or economic interdependence getting reduced eventually. On the other hand, Iida introduces a new theory that reinterprets the relationship between state security and economic interdependence among countries in the Asia-Pacific region. Based on case studies of recent episodes in East Asia, and especially on the experiences of Japan, this book highlights an interesting dynamic between security and economic interdependence: risk avoidance. By understanding how risk avoidance affects the behavior of these countries in terms of security and economics, it becomes evident how they eventually settle into what Iida calls Cool Politics and Lukewarm Economics.

Sustainable Water Management Daniel H. Chen, 2016-10-14 While the world's population continues to grow, the availability of water remains constant. Facing the looming water crisis, society needs to tackle strategic management issues as an integrated part of the solution toward water sustainability. The first volume in the two-volume set Sustainable Water Management and Technologies offers readers a practical and comprehensive look at such key water management topics as water resource planning and governance, water infrastructure planning and adaption, proper regulations, and water scarcity and inequality. It discusses best management practices for water resource allocation, ground water protection, and

water quality assurance, especially for rural, arid, and underdeveloped regions of the world. Timely topics such as drought, ecosystem sustainability, climate change, and water management for shale oil and gas development are presented. Discusses best practices for water resource allocation, ground water protection, and water quality assurance. Offers chapters on urban, rural, arid, and underdeveloped regions of the world. Describes timely topics such as drought, ecosystem sustainability, climate change, and water management for shale oil and gas development. Covers water resource planning and governance, water infrastructure planning and adaptation, proper regulations, and water scarcity and inequality. Discusses water resource monitoring, efficiency, and quality management.

Taste and Odour in Source and Drinking Water Tsair-Fuh Lin, Sue Watson, I. H. (Mel) Suffet, 2018-03-15 This book provides an updated evaluation of the characterization and management of taste and odour (T&O) in source and drinking waters. Authored by international experts from the IWA Specialist Group on Off-flavours in the Aquatic Environment, the book represents an important resource that synthesizes current knowledge on the origins, mitigation, and management of aquatic T&O problems. The material provides new knowledge for an increasing widespread degradation of source waters and global demand for high quality potable water. Key topics include early warning, detection and source-tracking, chemical, sensory and molecular diagnosis, treatment options for common odorants and minerals, source management, modelling and risk assessment, and future research directions. Taste and Odour in Source and Drinking Water is directed towards a wide readership of scientists, engineers, technical operators and managers, and presents both practical and theoretical material, including an updated version of the benchmark Drinking Water Taste and Odour Wheel and a new biological wheel to provide a practical and informative tool for the initial diagnosis of the chemical and biological sources of aquatic T&O.

Institutional Governance and Regulation of Water Services Michael J. Rouse, 2013-09-14 Institutional Governance and Regulation of Water Services aims to provide the key elements of policy, governance and regulation necessary for sustainable water and sanitation services. On policy matters, it covers important aspects including separation of policy and delivery, integrated planning, sustainable cost recovery, provisions for the poor, and transparency. Regulation and Regulatory Bodies are presented in their various forms, with discussion of why some form of independent scrutiny is essential for sustainability. The focus is on what works and what does not, based on consideration of basic principles and on case studies in both developing and developed countries. The early chapters discuss the key elements, with later chapters considering how these elements have come together in successful reforms of public sector operations. A chapter is devoted to the successful use of the private sector based on lessons learnt from 'failures' of private contracts and the need for the application of sound procurement principles. The current trend is for a public sector model which benefits from business approaches, the so-called corporatised public utility. Experience since the publication of the first edition in 2007 reinforces the importance of the key elements for sustainable water services. This second edition brings the material up to date and with some increased emphasis on public participation in its many forms. It refers to the opportunity for progress provided by the UN Declaration of Water and Sanitation as a Human Right, but only if it is implemented in a practical and sustainable way. Institutional Governance and Regulation of Water Services is aimed at providing an informative source for national and local governments responsible for water policy, for water utility managers, and for students who will be the policy makers of tomorrow. It is a teaching aid for courses on water policy, governance and regulation. About the Author: Michael Rouse is a Distinguished Research Associate at the University of Oxford and manages the Institutional Governance and Regulation module of the University's MSc Course on Water Science, Policy and Management. He was formerly Head of the Drinking Water Inspectorate in London and has extensive knowledge and experience of water governance and regulation, including all aspects of audit and enforcement, and the governance issues related to both public sector management and privatisation. He has wide knowledge of water technical and operational matters, based on his applied research and

development background at the Water Research Centre, where he spent 9 years as Managing Director. Michael has a good understanding of international water matters and advises governments on policy and regulation. He is a Past President of the International Water Association. He is a visiting professor at Tsinghua University in Beijing and at the Shanghai Academy of Social Science. In 2000 he was awarded the CBE (Commander of the British Empire) for his professional services.

Free flow UNESCO,2013-10-17 Water is an essential resource for mankind and our ecosystems. Free Flow is a fully illustrated book with over 100 authors work on water management and cooperation at international, regional, national, municipal and local levels. Their commentaries draw upon experiences around the world, reflecting how people are changing their interaction with water to improve sustainable development. The publication reflects progresses and challenges in these fields, highlighting good practices in a wide variety of societies and disciplines. The book strives to project experiences into future actions and encourages further institutional commitments to better understanding of and more effective management of water cooperation in order to achieve sustainable development.

Climate Change and Water Resources Sangam Shrestha,Mukand S. Babel,Vishnu Prasad Pandey,2014-05-22 Covering the various aspects of water and climate change, Climate Change and Water Resources presents the principles of climate change science and its effects on earth's water supply. Utilizing the knowledge and expertise from well-known experts in the field, the text provides a broad outline of the many interrelated aspects of climate variations, climate change, and connections to water resources. Designed to help managers with developing strategies, implementing policies, and investing in infrastructure and information sources for integrated water resources management, the text addresses many issues regarding climate change and water resources. It also includes adaptation options, which are essential to water resource sustainability. The material is divided into four sections. The first part of the book provides an introduction to climate change and considers theoretical aspects and available tools. The second part of the book examines the impacts that climate change has on the water sector. The third part focuses on the different adaptation measures needed to minimize the effects of climate change. The fourth part presents a number of case studies. Focused on climate change in the water sector, Climate Change and Water Resources closely analyzes scientific research and fuels study for a greater understanding of climate change and the proper management of water. This text is useful for undergraduate and postgraduate students, scientists, and design engineers as well as those working at research institutes and implementing and planning agencies.

Integrated Water Resources Management in a Changing World Dietrich Borchardt,Ralf Ibisch,2013-06-14 This volume presents a selection of the main contributions made to the international conference on Integrated Water Resources Management (IWRM) entitled 'Management of Water in a Changing World: Lessons Learnt and Innovative Perspectives' that was held from 12 to 13 October 2011 in Dresden, Germany. The book summarise the main messages issuing from the conference and contains selected papers which were presented during the conference, either as keynote lectures in plenary sessions or as submitted papers in one of the thematic sessions. The key themes of the book are: Water resources in changing environments Groundwater management Technologies and implementation Water management indicators at different scales Information and decision support systems Water governance: actors and institutions The book provides an overview on important issues concerning the conceptual framework of integrated water resources management (IWRM). All presentations and abstracts and the corresponding PowerPoint presentations as well as a video recording of the panel discussion are available at the conference website <http://www.bmbf.iwrm2011.de>. Readers are encouraged to complete their review of the conference and its messages by consulting this interesting on-line source of accompanying scientific material.
